## **Resolution Methods For The Decision Problem:**

*Resolution Methods for the Decision Problem* C. Fermüller, 1993-07-29 This volume contains work on the decision problem done in Kazan Russia Tallinn Estonia and Vienna Austria The authors met several times to discuss and exchange their results and finally decided to write this monograph together Besides a unified treatment of previously published results there are many new results first presented in this volume The monograph opens with an introduction and a chapter on terminology followed by chapters on Semantic clash resolution as decision procedure Completeness of ordering refinements Semantic tree based resolution variants Deciding the class K by an ordering refinement A resolution based method for building finite models A final chapter on applications completes the volume The Classical Decision Problem Egon

Börger, Erich Grädel, Yuri Gurevich, 2001-08-28 This book offers a comprehensive treatment of the classical decision problem of mathematical logic and of the role of the classical decision problem in modern computer science The text presents a revealing analysis of the natural order of decidable and undecidable cases and includes a number of simple proofs and exercises **Theorem Proving with Analytic Tableaux and Related Methods** Peter Baumgartner, Reiner Ha

hnle, Joachim Posegga, 1995-04-26 This volume constitutes the proceedings of the 4th International Workshop on Theorem Proving with Analytic Tableaux and Related Methods TABLEAU 95 held at Schlo Rheinfels St Goar Germany in May 1995 Originally tableau calculi and their relatives were favored primarily as a pedagogical device because of their advantages at the presentation level The 23 full revised papers in this book bear witness that these methods have now gained fundamental importance in theorem proving particularly as competitors for resolution methods The book is organized in sections on extensions modal logic intuitionistic logic the connection method and model elimination non clausal proof procedures linear logic higher order logic and applications Logic and Foundations of Mathematics Andrea Cantini, Ettore Casari, Pierluigi Minari, 2013-03-09 The 10th International Congress of Logic Methodology and Philosophy of Science which took place in Florence in August 1995 offered a vivid and comprehensive picture of the present state of research in all directions of Logic and Philosophy of Science The final program counted 51 invited lectures and around 700 contributed papers distributed in 15 sections Following the tradition of previous LMPS meetings some authors whose papers aroused particular interest were invited to submit their works for publication in a collection of selected contributed papers Due to the large number of interesting contributions it was decided to split the collection into two distinct volumes one covering the areas of Logic Foundations of Mathematics and Computer Science the other focusing on the general Philosophy of Science and the Foundations of Physics As a leading choice criterion for the present volume we tried to combine papers containing relevant technical results in pure and applied logic with papers devoted to conceptual analyses deeply rooted in advanced present day research After all we believe this is part of the genuine spirit underlying the whole enterprise of LMPS studies

**Automated Deduction in Classical and Non-Classical Logics** Ricardo Caferra, Gernot Salzer, 2003-07-31 This volume

presents a collection of thoroughly reviewed revised full papers on automated deduction in classical modal and many valued logics with an emphasis on first order theories Five invited papers by prominent researchers give a consolidated view of the recent developments in first order theorem proving The 14 research papers presented went through a twofold selection process and were first presented at the International Workshop on First Order Theorem Proving FTP 98 held in Vienna Austria in November 1998 The contributed papers reflect the current status in research in the area most of the results presented rely on resolution or tableaux methods with a few exceptions choosing the equational paradigm Automated Deduction -CADE-13 Michael A. McRobbie, J.K. Slaney, 1996-07 This book constitutes the refereed proceedings of the 13th International Conference on Automated Deduction CADE 13 held in July August 1996 in New Brunswick NJ USA as part of FLoC 96 The volume presents 46 revised regular papers selected from a total of 114 submissions in this category also included are 15 selected system descriptions and abstracts of two invited talks The CADE conferences are the major forum for the presentation of new results in all aspects of automated deduction Therefore the volume is a timely report on the state of the art in the area Theory Reasoning in Connection Calculi Peter Baumgartner, 2005-07-11 The ability to draw inferences is a central operation in any artificial intelligence system Automated reasoning is therefore among the traditional disciplines in AI Theory reasoning is about techniques for combining automated reasoning systems with specialized and efficient modules for handling domain knowledge called background reasoners Connection methods have proved to be a good choice for implementing high speed automated reasoning systems They are the starting point in this monograph in which several theory reasoning versions are defined and related to each other A major contribution of the book is a new technique of linear completion allowing for the automatic construction of background reasoners from a wide range of axiomatically given theories The emphasis is on theoretical investigations but implementation techniques based on Prolog are also covered
