**Ethics and Economics of Assisted Reproduction** Maura A. Ryan, 2003-06-11 For those who undergo it infertility treatment is costly time consuming invasive and emotionally and physically arduous yet technology remains the focus of most public discussion of the topic Drawing on concepts from medical ethics feminist theory and Roman Catholic social teaching Maura A Ryan analyzes the economic ethical theological and political dimensions of assisted reproduction Taking seriously the experience of infertility as a crisis of the self the spirit and the body Ryan argues for the place of reproductive technologies within a temperate affordable sustainable and just health care system She contends that only by ceasing to treat assisted reproduction as a consumer product can meaningful questions about medical appropriateness and social responsibility be raised She places infertility treatments within broader commitments to the common good thereby understanding reproductive rights as an inherently social rather than individual issue Arguing for some limits on access to reproductive technology Ryan considers ways to assess the importance of assisted reproduction against other social and medical prerogatives and where to draw the line in promoting fertility Finally Ryan articulates the need for a compassionate spirituality within faith communities that will nurture those who are infertile

**Reproduction and Society**, Carole Joffe, Jennifer Reich, 2025-05-30. The new edition of *Reproduction and Society* assembles an authoritative collection of the best scholarship on reproductive matters to help students and readers think critically and more expansively about acts of reproduction as social phenomena. The social, political, and personal meanings of reproduction have become increasingly important and surround us in the news during elections and even within popular culture. In the aftermath of the United States Supreme Court's decision to overturn a nearly 50-year-old precedent guaranteeing a constitutional right to abortion, these issues have become even more pressing. Exploring the topic from a sociological lens and drawing on influential writing from other fields including history, economics, anthropology, and medicine, editors Carole Joffe and Jennifer Reich are assured and accessible guides as they lead readers across six core thematic areas, analyzing reproductive self-determination and why it matters. From a reproductive justice perspective, the new edition examines issues related to contraception and sterilization, abortion, pregnancy, maternal-fetal conflicts, and uses of reproductive technologies. Readers will encounter classical texts that have contributed to the foundation

of this exciting field as well as more recent research that continues to push the field forward all in the service of sharpening their understanding of why reproductive politics have been and continue to be contentious complicated and high stakes Refreshed and significantly expanded with over two dozen new selections the second edition of this reader will have wide appeal for undergraduate and graduate students who are new to the study of reproduction both in courses that focus on the topic across different disciplines and as a supplement to courses on the family gender health care social problems and sexuality
