Field - Volume 4 ,2023-11-02 COVID wrought havoc on the world s economic systems Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems Some institutions were prepared for the required transition to online learning Most were not Whether prepared or not educators rose to the challenge The innovativeness of educators met the challenges as digital learning replaced the face to face environment In fact some of the distance models proved so engaging that many students no longer desire a return to the face to face model As with all transitions some things were lost while others were gained This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century The book is organized into four sections on Embracing Quality Assurance Educational Standards and Quality Assurance Evaluating Educational Access and Why Assessment It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process These discussions shed light on the impact of the pandemic and the future of higher education post COVID Higher education has been forever changed and higher education as it once was may never return While many questions arise the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic

Language, Migration and In/Exclusion in the Workplace Jo Angouri,Julie Kerekes,Minna Suni,2023-09-12 In today s globalised world large scale migration is the norm A contributing factor to the successful settlement of migrants is the ability to access work and economic security This book focuses on the lived experiences of migrants who try to access the workplace and explores the barriers and support they encounter The editors bring together studies which look at the ways in which inclusion and exclusion from the workplace are done linguistically from historical discourse analytical narrative and language assessment perspectives The chapters represent an innovative holistic intersectional and multidisciplinary approach to the subject and illustrate a wide range of analytical methods and theoretical tools for the study of multilingualism and professional identity The rich empirical data contained in the book cover a variety of professional contexts and countries and the book will appeal to both specialist and non specialist audiences **South African Journal of Labour Relations** ,1990

Geriatric Medicine C.K. Cassel,J.R. Walsh,2012-12-06 With the appearance of a textbook as comprehensive as this one it is clear that the field of geriatrics is coming of age The broad scope of these volumes shapes a substantial answer to the question What is geriatrics and why should we be interested in it As I see it there are at least five reasons First the scientific or intellectual reason gerontology is the study of aging from the biologic psychological and social perspectives There is increasing interest in the fascinating insights into the biologic mechanisms of aging errors in protein synthesis DNA repair mechanisms alterations of the neuroendocrine system changes in the immune system genetic controls and somatic mutations Second the demographic reason this is the century of old age There has been a 26 year gain in the average life expectancy

This gain compares with that acquired from 3 000 years B C the Bronze Age to the year 1900 which was about 29 years. Therefore in one century there has been a gain in the average life expectancy almost equal to 5 000 previous years of human history. In 1830 one of three newborn infants survived beyond 60 years of age. *Congressional Record* United States. Congress, 1969. The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789-1824, the Register of Debates in Congress 1824-1837 and the Congressional Globe 1833-1873.

Evaluating Democratic Innovations Kenneth Newton, Brigitte Geissel, 2012-07-26. In the face of increasing political disenchantment many Western governments have experimented with innovations which aim to enhance the working and quality of democracy as well as increasing citizens' political awareness and understanding of political matters. This text is the most comprehensive account of these various democratic innovations. Written by an outstanding team of international experts it examines the theories behind these democratic innovations, how they have worked in practice and evaluates their success or failure. It explains experiments with new forms of democratic engagement such as Direct Democracy, Deliberative Democracy, Co-Governance, E-Democracy. Drawing on a wide variety of theoretical perspectives and with a broad range of case studies, this is essential reading for all students of democratic theory and all those with an interest in how we might revitalise democracy and increase citizen involvement in the political process.

Federal Register, 1998-03. Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer, Hanno Hortsch, Oliver Michler, Thomas Köhler, 2022-01-27. This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences, best practice, are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning ICL2021 which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between pure scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices, Research in Engineering Pedagogy, Engineering Pedagogy Education, Entrepreneurship in Engineering Education, Project Based Learning, Virtual and Augmented Learning, Immersive Learning in Healthcare, and

Maturation of Teams in Organizations: Theories, Methodologies, Discoveries & Interventions, 2nd Edition Eduardo Salas, Marissa Shuffler, Michael Rosen, 2020-12-08 Publisher's note In this 2nd edition the following article has been added Shuffler ML Salas E and Rosen MA 2020 The Evolution and Maturation of Teams in Organizations Convergent Trends in the New Dynamic Science of Teams Front Psychol 11 2128 doi 10 3389/fpsyg 2020 02128 **Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective** Chang Liu, Linden John Ball, Haiying Long, Wangbing Shen, 2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth

understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive processes and mechanisms in the creativity process at both individual and collective levels across different cultures by using theoretical and empirical evidence
