Bryan Nelson, 2006-01-26 The pelecaniformes are a large and important group of seabirds containing many spectacular species This book addresses the breeding biology of the six pelecaniform families which comprise the closely related core groups pelicans cormorants shags darters gannets boobies and their more distant relatives the frigate birds and tropic birds Many fundamental questions can be addressed through the pelecaniformes Why do they breed in colonies What are the links between their feeding methods and their reproduction What part does territorial and pairing behaviour play in their life cycles These and scores of comparable issues including those related to man are woven here into a richly interpretative text The author's approach to the subject is threefold First the pelecaniformes are placed within the framework of four discrete disciplines with chapters on evolutionary relationships comparative behaviour ecology and the birds relationship with humans Secondly each of the six families is discussed elucidating the range of taxonomy behaviour and ecology within each Finally we progress to specific level using the same structure as for the family accounts In this way each of the 60 odd species can be understood not just as discrete units but as part of their family and order The book is unique in its coverage of the entire order and in its combination of facts and interpretation Pelicans Cormorants and their Allies will enable readers not only to identify the many spectacular species which make up this large and important group of seabirds but also to understand their breeding biology

NATO, a Bibliography and Resource Guide Augustus R. Norton, 1984 *Resilience and Food Security in a Food Systems Context* Christophe Béné, Stephen Devereux, 2023-03-25 This open access book compiles a series of chapters written by internationally recognized experts known for their in depth but critical views on questions of resilience and food security The book assesses rigorously and critically the contribution of the concept of resilience in advancing our understanding and ability to design and implement development interventions in relation to food security and humanitarian crises For this the book departs from the narrow beaten tracks of agriculture and trade which have influenced the mainstream debate on food security for nearly 60 years and adopts instead a wider more holistic perspective framed around food systems The foundation for this new approach is the recognition that in the current post globalization era the food and nutritional security of the world's population no longer depends just on the performance of agriculture and policies on trade but rather on the capacity of the entire food system to produce process transport and distribute safe affordable and nutritious food for all in ways that remain environmentally sustainable In that context adopting a food system perspective provides a more appropriate frame as it incites to broaden the conventional thinking and to acknowledge the systemic nature of the different processes and actors involved This book is written for a large audience from academics to policymakers students to practitioners This is an open access book *Ewles and Simnett's Promoting Health: A Practical Guide - E-Book* Angela Scriven, Gareth Morgan, James
