Respect For Persons:

Respect for Persons Robert Silcock Downie, Elizabeth Telfer, 1969 *Respect for Persons* Robert (R. S.) Downie, Elizabeth Telfer, 2020-07-20 Originally published in 1969 this book provides a sustained examination of the idea of the individual person as of supreme worth in the language of analytical philosophy An important contribution to debates in moral philosophy it will be of use to students in the philosophy of religion and education and to those who are interested in the contribution which philosophical analysis can make to the understanding of traditional moral and political ideas

Respect for Persons as a Moral Principle - II William Gauld MacLagan, 1960 *Essays in Ancient Greek Philosophy* IV John Peter Anton, George L. Kustas, Anthony Preus, 1971-01-01 Papers originally presented at the annual meetings of the Society for Ancient Greek Philosophy Seventeen essays demonstrate a shared and strikingly high regard for Plato as a major thinker in the western philosophical tradition a recognition that the dialogues he wrote continue to exert influence as well as attract theoretical attention Paper edition 18 95 not seen The essays in this collection have been selected from a much larger set of papers on Aristotle's ethics presented before the Society for Ancient Greek Philosophy during the past decade The essays are arranged roughly according to several unifying themes methodology ergon virtue and character moral reasoning and persons and property Annotation copyrighted by Book News Inc Portland OR **The Presence of God and the Presence of Persons** James Kellenberger, 2019-07-31 This book treats the presence of God and the presence of persons The experience of the presence of God is a well recognized religious experience in theistic traditions The experience of the presence of persons this book argues is an analogous moral experience As it is possible for individuals to come into the presence of God to have this phenomenal experience so it is possible for them to come into the presence of persons Kellenberger explores how coming into the presence of persons is structurally analogous with coming into the presence of God Providing a highly focused analysis of the two seemingly distinct concepts normally thought to fall under different subfields of philosophy the chapters carefully draw parallels between them Kellenberger then goes on show how analogous to the death of God a loss of the consciousness of the reality of God and his presence is a death of persons felt as a loss of the sense of the inherent worth of persons and their presence This volume finishes with an examination of the concrete moral and religious ethical implications of coming into the presence of persons and in particular the implications of coming into the presence of all persons *Values for Care Practice* Sue Cuthbert, Jan Quallington, 2008-04-14 Foreword Introduction 1 Rights Equality and Anti discriminatory Practice 2 Respect and Dignity 3 Autonomy 4 Trust Confidentiality and Truth telling 5 Protection from Harm and Promoting Independence 6 Values Accountability and Responsibility 7 Conclusion Value based Reflection References Index *Philosophy in Social Work* Noel Timms, David Watson, 2018-11-09 Originally published in 1978 *Philosophy in Social Work* is a collection of papers that invites reflective consideration of the philosophical issues arising out of social work The work stemmed from a series of meetings at the University of Glasgow designed to encourage

philosophers to look at traditional problems raised in the comparatively unfamiliar setting of social work and social service and for social workers to see the place for philosophical reflection on what they are doing Among the subjects discussed in the collection are discretion rights charity and the Welfare State the morality of law and the politics of probation authority and the social workers and social work and ideology The underlying theme of all the papers is the way in which philosophy can revive discussion of beliefs and values in social work It also asks philosophers to intensify their treatment of concrete issues of social significance Handbook on Border Criminology Mary Bosworth, Katja Franko, Maggy Lee, Rimple

Mehta, 2024-12-09 This topical Handbook investigates the nature and impact of intersections between border control and criminal justice Using comparative and decolonial perspectives it demonstrates the corrosive effect of harsh border practices not just on those subject to them but to many of the key principles of liberal democracy **Political Theory and the**

Displacement of Politics Bonnie Honig, 2023-03-15 Political Theory and the Displacement of Politics originally published in 1993 has been called a founding text of agonism which treats political contestation not as a regrettably necessary way to correct political imperfections but as a necessary sometimes joyful feature of democratic life As Bonnie Honig writes in the preface to this thirtieth anniversary edition the agonism that informs this book is democratic it is committed to shared spaces and relational practices in which diverse groups and individuals set and reset the terms of living together as equals By rethinking the established relation between politics and political theory Honig argues that political theorists of opposing positions often treat political theory less as an exploration of politics than as a series of devices for its displacement She characterizes Kant Rawls and Sandel as virtue theorists of politics arguing that they rely on principles of right rationality community and law to protect their political theories from the conflict and uncertainty of political reality Drawing on Nietzsche and Arendt as well as Machiavelli and Derrida Honig instead explores an alternative politics of virtue which treats the disruptions of political order as valued sites of democratic freedom and individuality *Children, Families, and Health*

Care Decision Making Lainie Friedman Ross, 1998 ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester Soren Holm University of Copenhagen Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes All too often ethical analysis has lagged behind these changes The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just health care trainees and professionals but also social scientists philosophers lawyers social workers and legislators The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest Philosophers doctors and lawyers from several countries already feature among the contributors to the series It

promises to become the leading channel for the best original work in this burgeoning field this book Lainie Friedman Ross presents an original and controversial examination of the moral principles that guide parents in making health care decisions for their children and the role of children in the decision making process She opposes the current movement to increase child autonomy in favour of respect for family autonomy She argues that children should be included in the decision making process but that parents should be responsible for their children s health care even after the children have achieved some threshold level of competency The first half of the book presents and defends a model of decision making for children s health care the second half shows how it works in various practical contexts considering children as research subjects and as patients organ donorship and issues relating to adolescent sexuality Implementation of Ross s model would result in significant changes in what informed consent allows and requires for paediatric health care decisions This is the first systematic medical ethics book that focuses specifically on children s health care It has important things to say to health care providers who work with children as well as to ethicists and public policy analysts Compromise, Peace and Public Justification Fabian Wendt, 2016-07-11 This book explores the morality of compromising The author argues that peace and public justification are values that provide moral reasons to make compromises in politics including compromises that establish unjust laws or institutions He explains how it is possible to have moral reasons to agree to moral compromises and he debates our moral duties and obligations in making such compromises The book also contains discussions of the sources of the value of public justification the relation between peace and justice the nature of modus vivendi arrangements and the connections between compromise liberal institutions and legitimacy In exploring the morality of compromising the book thus provides some outlines for a map of political morality beyond justice Mechatronics in Engineering Design and Product Development Dobrivoje Popovich, 1998-09-30 This work presents a systematic and comprehensive overview to the theory and applications of mechatronic processes emphasizing the adaptation and incorporation of this important tool in fulfilling desired performance and quality requirements The authors address the core technologies needed for the design and development of the mechatronic product cover design approaches discuss related mechatronic product design aspects and detail mechatronic product application examples MCAT Physics and Math Review 2020-2021 Kaplan Test Prep, 2019-08-06 Kaplan s MCAT Physics and Math Review 2020 2021 is updated to reflect the latest most accurate and most testable materials on the MCAT A new layout makes our book even more streamlined and intuitive for easier review You ll get efficient strategies detailed subject review and hundreds of practice questions all authored by the experts behind the MCAT prep course that has helped more people get into medical school than all other major courses combined Efficient Strategies and In Depth Review High Yield badges indicate the most testable content based on AAMC materials Concept summaries that boil down the need to know information in each chapter including any necessary equations to memorize Chapter Profiles indicate the degree to which each chapter is tested and the testmaker content categories to which it aligns

Belmont Revisited James F. Childress,Eric M. Meslin,Harold T. Shapiro,2005-10-03 Research with human subjects has long been controversial because of the conflicts that often arise between promoting scientific knowledge and protecting the rights and welfare of subjects Twenty five years ago the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research addressed these conflicts The result was the Belmont Report Ethical Principles and Guidance for Research Involving Human Subjects a report that identified foundational principles for ethical research with human subjects respect for persons beneficence and justice

Since the publication of Belmont these three principles have greatly influenced discussions of research with human subjects While they are often regarded as the single most influential set of guidelines for biomedical research and practice in the United States and other parts of the world not everyone agrees that they provide adequate guidance Belmont Revisited brings together a stellar group of scholars in bioethics to revisit the findings of that original report Their responses constitute a broad overview of the development of the Belmont Report and the extent of its influence especially on governmental commissions as well as an assessment of its virtues and shortcomings Belmont Revisited looks back to reexamine the creation and influence of the Belmont Report and also looks forward to the future of research with a strong call to rethink how institutions and investigators can conduct research more ethically

Practice Sue Cuthbert, Jan Quallington, 2017-05-15 Values and Ethics for Care Practice introduces readers to values and ethics and their importance in patient centred care Values and ethics are integral to the provision practice and delivery of patient centred health and social care This book which is an expanded and updated version of Values for Care Practice introduces readers to these concepts and helps them understand how they can apply them to become compassionate care professionals The patient perspective and patient voice are seen and heard throughout the book Readers are encouraged to reflect on their personal values and on those underpinning health and social care work and to understand how values and ethics are articulated in the latest Codes of Practice The text uses activities and case studies to enable readers to apply theory in their practice This book will help readers to understand why good caring is more than merely a practical

intervention it also requires a personal investment and quality of character that involves genuine concern and respect for others

Rhetorical Citizenship and Public Deliberation Christian Kock, Lisa Villadsen, 2015-06-29 Citizenship has long been a central topic among educators philosophers and political theorists Using the phrase rhetorical citizenship as a unifying perspective Rhetorical Citizenship and Public Deliberation aims to develop an understanding of citizenship as a discursive phenomenon arguing that discourse is not prefatory to real action but in many ways constitutive of civic engagement To accomplish this the book brings together in a cross disciplinary effort contributions by scholars in fields that rarely intersect For the most part discussions of citizenship have focused on aspects that are central to the liberal tradition of social thought that is questions of the freedoms and rights of citizens and groups This collection gives voice to a republican conception of citizenship Seeing participation and debate as central to being a citizen this tradition looks back to the Greek city states and republican Rome Citizenship in this sense of the word is rhetorical citizenship Rhetoric is thus at the core of being a citizen Aside from the editors the contributors are John Adams Paula Cossart Jonas Gabrielsen Jette Barnholdt Hansen Kasper M ller Hansen Sine N rholm Just Ildik Kaposi William Keith Bart van Klink Marie Lund Klujeff Manfred Kraus Oliver W Lembcke Berit von der Lippe James McDonald Niels M ller Nielsen Tatiana Tatarchevskiy Italo Testa Georgia Warnke Kristian Wedberg and Stephen West

Heirs of Oppression Angelo J. Corlett, 2010-11-16 Packing his case with moral argument and relevant facts Angelo Corlett offers the most comprehensive defense to date in favor of reparations for African Americans and American Indians As Corlett see it the heirs of oppression are both the descendants of the oppressors and the descendants of their victims Corlett delves deeply into the philosophically related issues of collective responsibility forgiveness and apology and reparations as a human right in ways that no other book or article to date has done He recommends specific policies and tests the basic arguments of this book with a lengthy chapter considering several objections to the line of reasoning grounding the project

Why and How We Give and Ask for Reasons Preston Stovall, Ladislav Koren, 2025 The social practices and skills for giving assessing and responding to reasons play a key role in the constitution of uniquely human conceptual epistemic and deliberative powers Although theorists in the past have articulated intriguing views on this topic current research opens up new vistas that promise a deeper understanding of the way reason seeking or querying activities shape and scaffold the operations of human cognition This volume offers resources for philosophers cognitive scientists developmental and comparative psychologists and evolutionary anthropologists to continue this conversation
