closing of windows an example extracted from a real case study In turn the authors elaborate the concept of an Historic Indoor Microclimate HIM based on Original Indoor Microclimate OIM which proves useful in identifying the optimal conditions for preserving the materials that make up historic buildings The book s main goal is to draw attention to the advantages of an indoor microclimatic approach to the preservation of existing historic materials manufacture by studying the original conditions of the buildings The introduction of new systems in historic buildings not only has a direct traumatic effect on the actual building and its components but also radically changes one of its vital immaterial elements the Indoor Microclimate Architects restorers and engineers will find that the book addresses the monitoring of the indoor microclimate in selected historic buildings that have managed to retain their original state due to the absence of new HVAC systems and reflects on the advantages of a renewed attention to these aspects
