Responding To The Livestock Revolution:

Responding to the Livestock Revolution E. Owen, 2004-01-01 This book discusses the Livestock Revolution which is occurring in some developing countries and is foreseen to become a wider phenomenon over the next 20 years due to increases in population urbanisation and incomes As a result a gigantic increase in demand for meat and milk is predicted The many implications for animal agriculture in developing countries and globally are considered **Responding to the "Livestock Revolution" - The Case for Livestock Public Policies**, 2007 *Livestock Report 2006* Food and Agriculture Organization of the United Nations. Animal Production and Health Division, 2006-01-01 The 2006 Livestock Report Highlights critical issues that arise from the globalisation of the Livestock sector It is the first of a series that aims to stimulate broad debate and to this end it covers a wide spectrum of topics Five papers take a global perspective on various topics including the management of transboundary animal diseases the future of small scale dairying animal genetic resources and one takes a snapshot of the Asian region Also available in French and Spanish *Political Ecologies of Meat* Jody Emel, Harvey Neo, 2015-05-15 Livestock production worldwide is increasing rapidly in part due to economic growth and demand for meat in industrializing countries Yet there are many concerns about the sustainability of increased meat production and consumption from perspectives including human health animal welfare climate change and environmental pollution This book tackles the key issues of contemporary meat production and consumption through a lens of political ecology which emphasizes the power relations producing particular social economic and cultural interactions with non human nature Three main topics are addressed the political ecology of global livestock production trends changes in production systems around the world and their implications for environmental justice and existing and emerging governance strategies for meat production and consumption systems and their implications Case studies of different systems at varying scales are included drawn from Asia Africa the Americas and Europe The book includes an editorial introduction to set the context and synthesize key messages for the reader *Economics of Agricultural Development* George W. Norton, Jeffrey Alwang, William A. Masters, 2014-09-25 *Economics of Agricultural Development* examines the causes severity and effects of poverty population growth and malnutrition in developing countries It discusses potential solutions to these problems progress made in many countries in recent years and the implications of globalization for agriculture poverty and the environment Topics covered in the book include Means for utilizing agricultural surpluses to further overall economic development The sustainability of the natural resource environment Gender issues in relation to agriculture and resource use The contribution of agricultural technologies The importance of agricultural and macroeconomic policies as related to development and trade and the successes and failures of such policies Actions to encourage more rapid agricultural and economic development The globalization of trade in goods services and capital has been fundamental to changes being experienced in the agricultural and rural sectors of developing countries It has major implications for the fight against poverty and food insecurity and for

environmental sustainability Recently agriculture has returned to a position of center stage in the development dialog as food price volatility has increased along with water scarcity and concerns grow over the effects of climate change on food supply and food security This new edition of the essential textbook in the field builds on the 2010 edition and reflects the following developments Growth in foreign demand for land and other natural resources Significant progress in agricultural and economic development in some low income countries while others are being left behind Continued growth in demand for higher valued farm products This book is essential reading for undergraduate students seeking to understand the economics of agricultural development and the world food system including environmental and human consequences international trade and capital flows

Grassland: a global resource D.A. McGilloway, 2023-08-28 The concept of grasslands as a global resource is not new Indeed many recognised authorities have been canvassing for a global approach to understanding managing and exploiting this resource for many years This is the first book that gathers together leading experts from around the world to outline our current understanding of this complex ecosystem the ways in which it can be enhanced and utilised and where the research challenges are for the future The following themes unite the book Efficient production from grassland Grassland and the environment Delivering the benefits from grassland The reader is given an in depth understanding of the biology of the system and how grasslands are crucial for soil stabilisation and water quality Secondly much attention is given to how grasslands offer the possibility of increasing food supply and income generation which is a hugely important but often ignored facet in today's climate of extensification and biodiversity Current advances in the grassland sciences have a proven potential to promote the economic development and environmental stability of regions nations and peoples particularly in some of the most resource limited areas of the world Approaches for achieving the most effective development and adoption of new technology are reviewed

Livestock and Wealth Creation E. Owen, A. Kitalyi, T. Smith, N. Jayasuriya, 2020-11-22 This unique report involving 105 contributors from 26 countries provides invaluable information concerning livestock keeping and poverty alleviation in developing countries

The Economics of Animal Health and Production Jonathan Rushton, 2009 The efficient functioning of the livestock sector encompassing all facets of input supply production processing and marketing is critical for food security and safety This book draws on both extensive literature and experience in animal health economics and livestock issues in Europe Asia Africa and Latin America It provides comprehensive coverage of the history of livestock and animal health economics theory and tools for the economics of animal health and production a review of the application of economics to animal diseases and health problems and worldwide examples of economic analysis and policy making

Global food security: ethical and legal challenges Carlos M. Romeo Casabona, Leire Escajedo San Epifanio, Aitziber Emaldi Ciri3n, 2023-09-04 Food security will exist when all people at all times have physical and economic access to sufficient safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life as stated in the Rome Declaration in 1996 Given the dimension of the current global food crisis food

security means adopting effective and specific actions at individual household national regional and global levels Food security invites us to reflect upon ethical principles like human equity justice between current and future generations respect for human dignity and sustainable food production We strive to maintain our basic ethical convictions and engage in societal debates about other important values While we do this we may have to change our ways of life and learn to create new priorities in the face of global responsibility Science and technology are key tools to reach the Millenium Goals providing both society and decision makers alike with relevant information and new options within an ethical framework The contributions found in this publication bring together the perspectives of a diverse group of authors Coming from the academic world the public sector and non governmental organisations NGOs they provide the latest views on Global food security ethical and legal challenges *Outlook on Agriculture* ,2011 **Sustainable Agriculture Reviews 14** Harry Ozier-Lafontaine, Magalie Lesueur-Jannoyer, 2014-09-03 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children Sustainable agriculture is a discipline that addresses current issues such as climate change increasing food and fuel prices poor nation starvation rich nation obesity water pollution soil erosion fertility loss pest control and biodiversity depletion Novel environmentally friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy soil science molecular biology chemistry toxicology ecology economy and social sciences Indeed sustainable agriculture decipher mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries For that scientists use the system approach that involves studying components and interactions of a whole system to address scientific economic and social issues In that respect sustainable agriculture is not a classical narrow science Instead of solving problems using the classical painkiller approach that treats only negative impacts sustainable agriculture treats problem sources Because most actual society issues are now intertwined global and fast developing sustainable agriculture will bring solutions to build a safer world **Animal Oppression and Capitalism** David Nibert, 2017-09-08 This important two volume set unapologetically documents how capitalism results in the oppression of animals ranging from fish and chickens to dogs elephants and kangaroos as well as in environmental destruction vital resource depletion and climate change Most traditional narratives portray humanity s use of other animals as natural and necessary for human social development and present the idea that capitalism is generally a positive force in the world But is this worldview accurate or just a convenient easy to accept way to ignore what is really happening a systematic oppression of animals that simultaneously results in environmental destruction and places insurmountable obstacles in the path to a sustainable and peaceful future David Nibert s *Animal Oppression and Capitalism* is a timely two volume set that calls into question the capitalist system at a point in human history when inequality and the imbalance in the distribution of wealth are growing domestically and internationally Expert contributors show why the oppression of animals particularly the use of other

animals as food is increasingly being linked to unfavorable climate change and the depletion of fresh water and other vital resources Readers will also learn about the tragic connections between the production of animal products and global hunger and expanded regional violence and warfare and they will understand how many common human health problems including heart attacks strokes and various forms of cancer develop as a result of consuming animal products Animal Science Reviews 2010 David Hemming,2011 Animal Science Reviews 2010 provides scientists and students in animal science with timely analysis on key topics in current research Originally published online in CAB Reviews this volume makes available in printed form the reviews in animal science published during 2010 Food Policy for the Poor Joachim Von Braun,Rajul Pandya-Lorch,2005-01-01 **Emerging Development of Agriculture in East Africa** Takashi Yamano,Keijiro Otsuka, Frank Place,2011-04-28 Emerging Development of Agriculture in East Africa offers case studies that find promise in many new innovations Farmers in Uganda have quickly learned the management of NERICA rice a new upland rice variety which is being disseminated in a limited way in the region Also in Uganda farmers living in more remote areas have improved access to markets due to the expansion of mobile phones In Kenya improved milk marketing systems have increased efficiency and led to tangible increases in the adoption of dairy production technologies And the adoption of intensive dairy production systems in Kenya and Uganda are providing significant amounts of manure and positively impacting yields of maize and banana **One Billion Hungry** Gordon Conway,2012-10-16 Hunger is a daily reality for a billion people More than six decades after the technological discoveries that led to the Green Revolution aimed at ending world hunger regular food shortages malnutrition and poverty still plague vast swaths of the world And with increasing food prices climate change resource inequality and an ever increasing global population the future holds further challenges In One Billion Hungry Sir Gordon Conway one of the world s foremost experts on global food needs explains the many interrelated issues critical to our global food supply from the science of agricultural advances to the politics of food security He expands the discussion begun in his influential The Doubly Green Revolution Food for All in the Twenty First Century emphasizing the essential combination of increased food production environmental stability and poverty reduction necessary to end endemic hunger on our planet Beginning with a definition of hunger and how it is calculated and moving through issues topically both detailed and comprehensive each chapter focuses on specific challenges and solutions ranging in scope from the farmer s daily life to the global movement of food money and ideas Drawing on the latest scientific research and the results of projects around the world Conway addresses the concepts and realities of our global food needs the legacy of the Green Revolution the impact of market forces on food availability the promise and perils of genetically modified foods agricultural innovation in regard to crops livestock pest control soil and water and the need to both adapt to and slow the rate of climate change One Billion Hungry will be welcomed by all readers seeking a multifaceted understanding of our global food supply food security international agricultural development and sustainability Development and the Politics of Human Rights Scott Nicholas

Romaniuk, Marguerite Marlin, 2015-12-15 Despite decades spent confronting human rights violations around the world particularly in regions of instability the issue remains one of the most divisive chaotic and challenging to address Development and the Politics of Human Rights takes a much needed holistic approach It unpacks the questions of human advocacy and policy identifies tra

The Dry Forests and Woodlands of Africa Emmanuel N. Chidumayo, Davison J. Gumbo, 2010 The dry forests and woodlands of Sub Saharan Africa are major ecosystems with a broad range of strong economic and cultural incentives for keeping them intact However few people are aware of their importance compared to tropical rainforests despite them being home to more than half of the continent s population This unique book brings together scientific knowledge on this topic from East West and Southern Africa and describes the relationships between forests woodlands people and their livelihoods Dry forest is defined as vegetation dominated by woody plants primarily trees the canopy of which covers more than 10 per cent of the ground surface occurring in climates with a dry season of three months or more This broad definition wider than those used by many authors incorporates vegetation types commonly termed woodland shrubland thicket savanna wooded grassland as well as dry forest in its strict sense The book provides a comparative analysis of management experiences from the different geographic regions emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs Further the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of all but more importantly the communities that live off these vegetation formations Thus the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide The State of the World's Animal Genetic Resources for Food and Agriculture Barbara Rischkowsky, Dafydd Pilling, 2007-01-01 Sustainable management of the world s livestock genetic diversity is of vital importance to agriculture food production rural development and the environment This publication is the first global assessment of these resources Drawing on 169 Country Reports contributions from a number of international organizations and 12 specially commissioned thematic studies it presents an analysis of the state of agricultural biodiversity in the livestock sector origins and development uses and values distribution and exchange risk status and threats and of capacity to manage these resources institutions policies and legal frameworks structured breeding activities and conservation programs Needs and challenges are assessed in the context of the forces driving change in livestock production systems Tools and methods to enhance the use and development of animal genetic resources are explored in sections on the state of the art in characterization genetic improvement economic evaluation and conservation As well providing a technical reference document the country based preparation of The State of the World has led to a process of policy development and a Global Plan of Action for Animal Genetic Resources which once adopted will provide an agenda for action by the international community Publisher s description *Life Cycle Assessment in the Agri-food Sector* Bruno Notarnicola, Roberta Salomone, Luigia Petti, Pietro A. Renzulli, Rocco Roma, Alessandro K.

Cerutti,2015-01-06 The book presents an overview of the International practices and state of the art of LCA studies in the agri food sector both in terms of adopted methodologies and application to particular products the final purpose is to characterise and put order within the methodological issues connected to some important agri food products wine olive oil cereals and derived products meat and fruit and also defining practical guidelines for the implementation of LCAs in this particular sector The first chapter entails an overview of the application of LCA to the food sector the role of the different actors of the food supply chain and the methodological issues at a general level The other chapters each with a particular reference to the main foods of the five sectors under study have a common structure which entails the review of LCA case studies of such agri food products the methodological issues the ways with which they have been faced and the suggestion of practical guidelines
