Restoring Nature Perspectives From The Social Sciences And Humanities:

Restoring Nature , Using a recent controversy over ecological restoration efforts in Chicago as a touchstone for discussion Restoring Nature explores the difficult questions that arise during the planning and implementation of restoration projects in urban and wildland settings **Identity and the Natural Environment** Susan Clayton,2003-11-07 The often impassioned nature of environmental conflicts can be attributed to the fact that they are bound up with our sense of personal and social identity Environmental identity how we orient ourselves to the natural world leads us to personalize abstract global issues and take action or not according to our sense of who we are We may know about the greenhouse effect but can we give up our SUV for a more fuel efficient car Understanding this psychological connection can lead to more effective pro environmental policymaking Identity and the Natural Environment examines the ways in which our sense of who we are affects our relationship with nature and vice versa This book brings together cutting edge work on the topic of identity and the environment sampling the variety and energy of this emerging field but also placing it within a descriptive framework These theory based empirical studies locate environmental identity on a continuum of social influence and the book is divided into three sections reflecting minimal moderate or strong social influence Throughout the contributors focus on the interplay between social and environmental forces as one local activist says We don t know if we re organizing communities to plant trees or planting trees to organize communities **Proceedings of the 2005 Northeastern Recreation Research Symposium** ,2006 **General Technical Report NE** ,1980 **Handbook of Urban Ecology** ,2011 *River Restoration* Bertrand Morandi,Marylise Cottet,Hervé Piégay,2021-09-20 River Restoration River restoration initiatives are now widespread across the world The research efforts undertaken to support them are increasingly interdisciplinary focusing on ecological chemical physical as well as societal issues River Restoration Political Social and Economic Perspectives provides a comprehensive overview of research in the field of river restoration in humanities and the social sciences It illustrates how in the last thirty years or so such approaches have evolved and strengthened within the restoration sciences The scientific community working in this domain has structured itself often regionally and circumstantially to critically assess and improve restoration policies and practices As a research field river restoration tackles three thematic axes Human river interactions especially perceptions and practices of rivers and how these interactions can be changed by restoration projects Political processes with a particular interest in governance and decision making and a specific emphasis on the question of public participation in restoration projects Evaluation of the social and economic benefits of river restoration River Restoration Political Social and Economic Perspectives encompasses these three topics and more to provide the reader with the most up to date and holistic view of this constantly evolving area The book will be of particular interest to human and social scientists biophysical scientists hydrologists geomorphologists ecologists environmental scientists public policy makers design or planning officers and anyone working in the field of river restoration **Restoration and History** Marcus Hall,2010-02-01

Once a forest has been destroyed should one plant a new forest to emulate the old or else plant designer forests to satisfy our immediate needs Should we aim to re create forests or simply create them How does the past shed light on our environmental efforts and how does the present influence our environmental goals Can we predict the future of restoration This book explores how a consideration of time and history can improve the practice of restoration There is a past of restoration as well as past assumptions about restoration and such assumptions have political and social implications Governments around the world are willing to spend billions on restoration projects in the Everglades along the Rhine River in the South China Sea without acknowledging that former generations have already wrestled with repairing damaged ecosystems that there have been many kinds of former ecosystems and that there are many former ways of understanding such systems This book aims to put the dimension of time back into our understanding of environmental efforts Historic ecosystems can serve as models for our restorative efforts if we can just describe such ecosystems What conditions should be brought back and do such conditions represent new natures or better pasts A collective answer is given in these pages and it is not a unified answer **Nature and Experience in the Culture of Delusion** D. Kidner,2012-03-06

While the historical development of symbolic power has benefitted humanity enormously there is an insidious and seldom recognised price that goes beyond environmental degradation and cultural disintegration With insights from both social and natural sciences this book explores the changing character of subjectivity in contemporary life The Ideal of Nature Gregory E. Kaebnick,2022-02-03 In this provocative anthology scholars consider the meaning and merits of nature in debates about biotechnology and the environment Drawing on philosophy religion and political science this book asks what the term nature means how it should be considered and if it is even in part a social construct The contributors question if the quality of being natural is intrinsically valuable They also discuss whether appeals to nature can and should affect public policy and if so whether they are moral trump cards or should instead be weighed against other concerns Though consensus on these questions remains elusive this should not be an obstacle to moving the debate forward By bringing together disparate approaches to addressing these concepts The Ideal of Nature suggests the possibility of intermediate positions that move beyond the usual full throated defense and blanket dismissal found in much of the debate Scholars of bioethics environmental philosophy religious studies sociology public policy and political theory will find much merit in this book s lively discussion

From Landscape Research to Landscape Planning Bärbel Tress,Gunther Tres,Gary Fry,Paul Opdam,2005-10-25 This book provides guidelines for those pursuing landscape projects based on integrative concepts interdisciplinarity and transdisciplinarity whether they are members of an integrative research team or individuals working on a problem that demands integration They must define terminology choose appropriate methodologies overcome epistemological barriers and cope with the high expectations of some stakeholders while encouraging others to participate at all **Routledge**

Handbook of Regenerative Landscape Design Robert L. France,2007-10-18 What if environmentally damaged landscapes could not only be remediated from an ecological standpoint but also designed to replenish an entire community as well as the nature surrounding it The Handbook of Regenerative Landscape Design incorporates ecology engineering sociology and design elements into a new paradigm for environmental r Forest and Nature Governance Bas Arts,Jelle Behagel,Séverine van Bommel,Jessica de Koning,Esther Turnhout,2012-09-23 Today problems such as deforestation biodiversity loss and illegal

logging have provoked various policy responses that are often referred to as forest and nature governance. In its broadest interpretation, governance is about the many ways in which public and private actors from the state, market and/or civil society govern public issues at multiple scales. This book takes a fresh perspective on the study of forest and nature governance. Departing from practice theory and building upon scholars like Giddens, Bourdieu, Reckwitz, Schatzki and Callon, it seeks to move beyond established understandings of institutions, actors and knowledge. In so doing, it not only presents an innovative conceptual and methodological framework for a practice-based approach but also rich case studies and ethnographies. Finally, this book is about how actors involved in governance talk about and work with trees, forests, biodiversity, wildlife and so on while acting upon forest policies, environmental discourses, codes of conduct or scientific insights.

The Dynamic Landscape Nigel Dunnett, James Hitchmough, 2008. The Dynamic Landscape advances a fusion of scientific and ecological planning design philosophy that can address the need for more sustainable designed landscapes. It is a major statement on the design, implementation and management of ecologically inspired landscape vegetation.

Readings in the Philosophy of Technology David M. Kaplan, 2009. Collects the important works of both the forerunners and contemporary theorists of philosophy of technology addressing a wide range of topics on technology as it relates to ethics, politics, human nature, computers, science, food and the environment.

Regenerative agroubanism R. France, 2023-08-14. The core activities of urban agriculture are involved with producing, processing, marketing, distributing and consuming food. Urban agriculture also provides services and outcomes through transforming neglected or damaged landscapes, lives and livelihoods. This book focuses on the so-called ancillary benefits of urban agriculture in terms of healing, economies, connections, aesthetics, heritage and sites and societies in short, what might be referred to in an holistic sense as the emerging paradigm of agroubanism. More than seventy case studies from around the world are reviewed through the social ecological lens of regenerative landscape design. Many of these cases have never before been discussed in the literature. Topics examined include entrepreneurship, gastro tourism, food literacy, foodscaping, heritage and social and societal wellbeing. The methodological approach undertaken is layered narrative scholarship based on the phenomenology of experiencing landscapes and is facilitated through a linked website containing photo essays documenting the site visits.

Robert L. France is a world renowned scientist in the Faculty of Agriculture at Dalhousie University where he teaches courses on urban agriculture, ecohydrology, watershed management, conservation biology and environmental restoration. For more than a decade he taught and conducted research on landscape architecture, land use planning and urban design at the Harvard Design School. Dr. France is the author or editor of twenty-two books and more than two hundred journal articles on a wide range of environmental subjects which together have been cited more than ten thousand times in the professional literature. In 2010 he organized the first international academic conference on urban agriculture in Canada which led to the publication of the edited volume *Integrated Urban Agriculture: Precedents, Practices, Prospects*. The Top Books of the Year Restoring Nature Perspectives From The Social Sciences And Humanities The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Pape, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
