Restructuring Korea Inc Jang-Sup Shin, Ha-Joon Chang, 2002-12-31 The 1997 South Korean financial crisis not only shook the country itself but also sent shock waves through the financial world at large This impressive book critically assesses the conventional wisdom surrounding the Korean crisis and the performance of the IMF sponsored reform programme Looking first at the strengths and weaknesses of Korea Inc in comparison with other East Asian countries the authors describe the challenges faced by Korea in the 1990s due to the acceleration of globalisation By arguing that the transition attempted by Korea was badly conceived and ill designed Restructuring Korea Inc focuses on corporate reform after the crisis that has led to the running up of huge transition costs This snappy informative and readable book has a broad historical overview and with its suggestions for structural change for Korea this book is an important contribution not only to Asian studies but also to the study of financial crises and the political economy of economic reform

The Global Financial Crisis and the Korean Economy Jang-Sup Shin, 2013-12-04 The world economy fell into a global financial crisis in 2008 9 and is still jittered by its aftershocks Like other financial crises happened in the world economy it came as a surprise In historical perspective financial crises should be understood as a natural fact of life in the world economy and a more pertinent question that should be posed would be why people so easily forget and do not learn from the historical experience This book deals with the question in two ways First it investigates the frame of mind that distances people from the reality of life At the heart of it it argues that there are wrong perceptions on the working of the world economy in particular the international financial market It summarizes them as the five conventional wisdoms in the international financial market and by critically examining them it draws on the five financial theorems which would provide intellectual pillars for a more realistic understanding of the global financial market Second the book examines in detail the case of an emerging market economy that fell into a financial crisis twice in the recent decade South Korea provides us with an interesting case of emerging market financial crises that came as surprises it faced a financial crisis in 1997 98 after it had been acclaimed as one of East Asian miracle economies and it was again befallen to a crisis during the global financial crisis in 2008 2009 after it was widely regarded as a country that had recovered from the crisis with one of the most successful implementations of the IMF sponsored reforms The book attempts to provide the readers with a realistic understanding of emerging market financial crises by interpreting the recent global financial crisis and the Korean crises with some general concepts manifested in the five financial theorems It also tries to draw more general implications for policy management of emerging market economies

Institutional Change in Southeast Asia Fredrik Sjöholm, Jose L.

Tongzon, 2005 *Institutional Change in Southeast Asia* examines the institutional changes taking place in and challenges facing the region since 1997. The book focuses on determinants to the adjustments and on implementations of the reforms. It also describes various differences in the reform process between countries in the region. Southeast Asia's economic development over the last decades has been impressive. Most of the region achieved consistently high growth rates accompanied by significant structural transformation and industrialization, poverty alleviation and improvements in their overall standard of living as indicated by such social indicators as greater longevity, more widespread delivery of basic education and lower infant mortality rates. However, the crisis that struck Southeast Asia in 1997 had severe economic, social and political consequences in the region. It also threw into doubt the future economic prosperity of the countries in Southeast Asia and raised intriguing questions about the quality of their institutions and their approach to economic development. Sjoholm and Tongzon argue that the economies of Southeast Asia need to reform their institutions if the previous rapid development is to continue. The institutional weaknesses have been addressed to different degrees and with different success in the affected countries. Against the backdrop of Southeast Asia's importance in the world economy, it is hardly possible to overestimate the need to understand this process of change.

After the Storm Jomo Kwame Sundaram, 2004. *After the Storm* discusses restructuring and growth strategies adopted in Indonesia, Malaysia, Thailand and South Korea after the currency and financial crisis of 1997-98. These four Asian economies were the most adversely affected despite achieving rapid growth in the 1970s and 1980s with low inflation and current account surpluses. Although macroeconomic fundamentals in these countries were relatively sound prior to the crisis, early analyses of the crisis dwelled on the failure of corporate governance, currency controls and immature financial institutions and infrastructure in some countries. The book offers fresh insights into the causes of the crisis and postcrisis restructuring, the growth strategies adopted and domestic initiatives taken by these countries. It also reveals why reforms recommended by the IMF, World Bank and others were met with resistance, thereby contributing to the ongoing discourse on the effects of globalisation.

The New Political Economy of Southeast Asia Rajah Rasiah, Johannes Dragsbaek Schmidt, 2010-01-01. This well-researched book examines the dramatic transformation of Southeast Asian countries from agricultural and mining economies to industrial nations. In doing so, it explores the effects of development policy on a number of interdisciplinary issues and the emergence of new social and political pressures created by industrialization. These include their heightened vulnerability to complex economic crises, their use of sophisticated instruments in the labour process and increased awareness of environmental issues. The distinguished authors present a regional and cross-border focus on transnational actors and institutions and the policy issues and problems which have a wider impact on spatial configurations in the region. This insightful study will appeal to researchers, academics and policymakers working on the economics and development of Southeast Asia.

State-Firm Coordination and Upgrading Angela Garcia Calvo, 2021. Since the 1980s, Spain and South Korea have experienced dramatic economic transformations.

Malaysian "bail Outs"? Sook Ching Wong, Jomo Kwame Sundaram, Kok Fay Chin, 2005 As Malaysia's government responded to the 1997-98 financial crisis the global financial community criticised its measures as bail outs for politically influential corporate interests This book examines the Asian crisis and government policy responses with emphasis on capital controls as well as corporate bank and debt restructuring exercises

Making Environmental Markets Work Tabitha M. Benney, 2014-11-27 Perhaps the most defining characteristic of the global economy today is the rise of emerging market economies EMEs Many states have experienced rapid economic growth over the past two decades that has led to an increasing share of global wealth Such dramatic changes are highly relevant because they raise important issues about the distribution of global monetary and fiscal power As the EMEs have gained importance in the global economy their influence and significance have grown across a wide range of policy domains One particularly relevant example is the increasingly critical role of EMEs in addressing climate change Contrary to the popular belief that the level of development determines a country's ability to produce positive environmental outcomes this book shows that the variation in environmental outcomes among the EMEs is due to differences in the types of economic institutions prevalent in their economies Since EMEs differ dramatically on a number of variables examining national variations in economic institutions helps explain why international climate policy has been more successful in some countries than in others To assess how variations in capitalism may influence important outcomes this book explores a representative sample of 31 EMEs and employs a mixed method research design that incorporates both conventional regression analysis and Qualitative Comparative Analysis QCA to explain these outcomes The analysis shows that although liberal market economies were expected to perform better than other types of capitalism their performance fell below expectations On the contrary economic institutions related to coordinated types of capitalism like those found in China and Brazil have led to greater Clean Development Mechanism CDM market participation Theoretically informed this book employs innovative ways of understanding a broad set of increasingly important but understudied states in an effort to highlight the interactions found in complex socio political and ecological systems With the growing importance of the EMEs a better understanding of how to design market based policies with them in mind will be required if future efforts across a range of policy issues are to be meaningful and effective

Global Challenges - Local Responses Daniel Fleming, 2006

Supercorporate Michael Prentice, 2022-06-14 What should South Korean offices look like in a post hierarchical world In *Supercorporate* anthropologist Michael M Prentice examines a central tension in visions of big corporate life in South Korea's twenty first century should corporations be sites of fair distinction or equal participation As South Korea distances itself from images and figures of a hierarchical past Prentice argues that the drive to redefine the meaning of corporate labor echoes a central ambiguity around corporate labor today Even as corporations remain idealized

Lost Decades in Growth Performance Y. Chu,2015-04-20

There have been many noticeable incidents of lost decades in economic growth occurring in countries across the world It has been found that in many economies the lost decade phenomenon persists even after the conventional set of contributing factors such as per capita income fertility rate life expectancy rule of law educational attainment ratio of investment to national income and openness have been taken into account This book explains where and how these lost decades in economic growth occur in the world The authors identify that dominant macroeconomic factors contributing to their occurrence are an abnormal supply of credits relative to national income and poor demand management The study pays special attention to the cases of Japan South Korea and Taiwan exploring their specific cases and analyzing contributing factors While Japan suffered from excessive credit prior to the bubble bursting and from insufficient domestic demand subsequently Korea s growth has been stunted through structural imbalances between and within industries as well as through changes in the orientation of public policies from growth to equality Adversely reduced economic growth in Taiwan has led from its populism ridden democracy and mass media as well as from internal disputes over national identity Lost Decades in Growth Performance provides a revealing insight into the factors affecting economic growth across the world and will be an invaluable resource for anyone with an interest in global and Asian economics It also offers a fundamental source of reference for students and academics in general equilibrium models economic development and East Asian economies

Trade and Capital Flow among Asian Economies Chris

Rowley,2013-10-18 Trade and capital are important in the Asia region Trade in the APEC region has been increasing but the large rise in China s exports has also been disturbing as it exhibits export substitution The first two papers conclude that every economy has gained in trade though some are more successful than others And that rise in export has a lot to do with a rise in foreign direct investments Macroeconomic stability is the pre condition to growth Empirical studies show that the lack of stability has encouraged capital to flee an economy Similarly a market oriented price driven and matured financial market provides an alternative source of funding The lesson in economic development is that success in economic growth requires both an externally friendly market environment as well as consistent and favourable internal policies

The East Asian

High-tech Drive Yunpeng Zhu, Hal Hill, 2006-04-26 East Asia has been an area of high economic growth for several decades. The East Asian High Tech Drive argues that to maintain the growth momentum, the more advanced East Asian economies need to pay particular attention to policies designed to upgrade their industrial capabilities. The authors argue that effectively functioning institutions, predictable commercial policies, investments in human capital and infrastructure, openness and macroeconomic stability are essential for growth and technological development. Regarding the two lower income economies in the sample, Indonesia is found to have the smallest improvement in the skill intensity of its exports, while the Philippines has registered the slowest economic growth. For both countries, industrial upgrading issues are not as imperative as achieving or regaining rapid labour intensive growth as both recently experienced major political instabilities.

Neoliberalism and Global Cinema Jyotsna Kapur, Keith Wagner, 2011-05-09 In cinema studies today, rarely do we find a direct investigation into the culture of capitalism and how it has been refracted and fabricated in global cinema production under neoliberalism. However, the current economic crisis and the subsequent Wall Street bailout in 2008 have brought about a worldwide skepticism regarding the last four decades of economic restructuring and the culture that has accompanied it. In this edited volume, an international ensemble of scholars looks at neoliberalism both as culture and political economy in the various cinemas of the world. In essays encompassing the cinemas of Asia, Africa, Latin America, Europe, and the United States, the authors outline how the culture and subjectivities engendered by neoliberalism have been variously performed, contested, and reinforced in these cinemas. The premise of this book is that the cultural and economic logic of neoliberalism, i.e. the radical financialization and market driven calculations of all facets of society, are symptoms best understood by Marxist theory and its analysis of the central antagonisms and contradictions of capital. Taking a variety of approaches ranging from political economy, ideological critique, the intersection of aesthetics and politics, social history, and critical cultural theory, this volume offers a fresh, broad-based Marxist analysis of contemporary film media. Topics include the global, albeit antagonistic, nature of neoliberal culture; the search for a new aesthetic and documentary language; the contestation between labor and capital in cultural production; the political economy of Hollywood; and questions of gender, sexuality, and the nation-state in relation to neoliberalism.

Clickbait capitalism Amin Samman, Earl Gammon, 2023-09-26 The notion of clickbait speaks to the intersection of money, technology, and desire, suggesting a cunning ruse to profit from unsavoury inclinations of one kind or another. Clickbait capitalism pursues the idea that the entire contemporary economy is just such a ruse, an elaborate exercise in psychological capture and release. Pushing beyond rationalist accounts of economic life, this volume puts psychoanalysis and political economy into conversation with the cutting edges of capitalist development. Perennial questions of death, sex, aggression, enjoyment, despair, hope, and revenge are followed onto the terrain of the contemporary, with chapters devoted to social media, online dating apps, cryptocurrencies, NFTs, and meme stocks. The result is a unique and compelling portrait of the latest institutions to stage, channel, or reconfigure the psychic energies of political and economic life.
