Restructuring Telecommunications:

Restructuring Telecommunications P. Curwen, 1997-10-27 The first of January 1998 was the deadline for market liberalisation within the European Union which together with the passing of the USA Telecommunications Act has served to open up major markets in the Telecommunications Industry This book examines the changes that have been occurring in the industry in recent years seeking to impose a coherent structure upon a rapidly changing environment It includes case studies of the UK Germany and the USA *Implementing Reforms in the Telecommunications Sector* Bjorn Wellenius, Peter A. Stern, 1994-01-01 Presents a compilation of information from a worldwide pool of experts on their practical experiences in telecommunications sector reform This study compiles a wealth of information from a worldwide pool of experts on their practical experiences in telecommunications sector reform It provides an up to date account of approaches to the major policy and structural issues and describes developments in Latin America Asia and the Pacific and Europe The study also examines issues related to investment regulation and implementation While each of the eight parts centers on a particular aspect of telecommunications sector reform the study highlights several recurring themes and looks at a number of country experiences from the perspective of policymakers regulators investors operators the international development community and other industry specialists This volume provides valuable information on how to implement telecommunications reforms offers insights into the effectiveness of these reforms and identifies critical areas in which further discussion of related policy and implementation issues in this increasingly important economic sector **Education Policy and Telecommunications**

Technologies Arthur D. Sheekey, 1991 The International Telecommunications Regime: Domestic Preferences and Regime Change Juan Ratto-Nielsen, 2009-12-26 This study examines the evolution of the international regime in telecommunications with the main objective of furthering our understanding of the process of regime transformation The dominant theories of international relations realism and institutional liberalism specify how states with shared interests use institutions to realize joint gains and to minimize the possibility of defection But these theories have little to say about when states will attempt to change the objectives that lead them to create the international institution in the first place The main goal of this book is to investigate and test the assumption that domestic politics by themselves can explain the dynamics of regime creation evolution and change as it happened within the International Telecommunications Union ITU

Telecommunications Politics Bella Mody, Johannes M. Bauer, Joe Straubhaar, 1995-09-01 This volume brings together scholars and policymakers to address the issue of telecommunications policy in developing countries It elaborates on the position that economics and technology determine the framework for discussion but politics makes the decision Politics in this case refers to the dynamics of the power structure generated by the h *Competition Problems in Liberalized Telecommunications* Milena Stoyanova, 2008-01-01 This innovative study of the role of competition law in the telecommunications industry starts from a classic perspective While in principle regulation benefits social welfare and

efficient allocation of resources past regulatory experience shows that regulation can be flawed and lead to welfare harm rather than good In the telecommunications industry specifically inappropriately designed sector specific remedies and regulatory delays in the introduction of new telecommunications services can hold up the development of the market towards effective competition and could incur considerable welfare losses In addition conventional antitrust analysis still lags behind the dynamic nature of the electronic communications markets Milena Stoyanova sets out to establish a new understanding of the role of sector specific regulation and competition law enforcement in the electronic communications sector addressing such questions as the following and Why a new regulatory framework and Are sectoral regulation and competition law enforcement mutually exclusive or complementary and Why should electronic communications markets be regulated to conform to competition law principles and What does competition law add to sector specific regulation and What is the relationship or proportion between regulation and competition law enforcement An overview of the telecommunications liberalization process initiated at European Community level reveals such problems as a divergent approach of national regulatory authorities in the application of one and the same norms inability of competition authorities to rightly assess the technicalities underlying a competition problem and difficulty in carrying out a periodical oversight of compliance with the competition law remedies The author discusses the legal basis and rationale for the application of the essential facility doctrine to the electronic communications sector and argues for new regulatory responses to the emergence of collective dominant firms in an oligopolistic setting and to the potential of multifirm conduct to restrict competition through price squeezing and other tactics The book concludes with a specific case study on the harmonisation of recent Bulgarian legislation with the European Community sector specific and competition law regimes and proposes the electronic communications sector Effective competition in the electronic communications market is crucial for securing the dynamic role of the entire information and communications technologies sector of which electronic communications form the largest segment The sound and well informed recommendations in this book ably address common and persistent problems making *Competition Problems in Liberalized Telecommunications* a forward looking mainstay for practitioners and other professionals involved in all aspects of the field *Telecommunications and Universal Service* S. O'Siochrú ((Seán)), International Development Research Centre (Canada), 1996 Telecommunications and Universal Service International experience in the context of South African policy reform *Telecommunication* Howard Williams, Mark Borman, 1994 This work comprises the revised papers from the 8th European Communications Policy Research conference CPR in October 1993 incorporating the key elements emanating from the discussions **China's Telecommunications Reforms** Scott Yunxiang Guan, 2003 In the early 1990s China started to reform its telecommunications regime by removing barriers to foreign and private investment and encouraging competition This text applies the Public Choice Plus theory developed in the study of economics to the analysis of the policymaking process of China's telecommunications reforms Guan is a senior fellow at the
