Challenges for Electricity Restructuring (1)

- Electricity follows the laws of physics above all else
 - Dispatchers cannot control its path if there is more than one circuit or branch at a particular **node**
- Kirchhoff's Laws
 - Dictate how current and power flows
 - Dependent on impedance (resistance)
 - Electricity will follow the path of least resistance
 - Transmission lines have limited capacity
 - Electricity may be forced to follow alternate paths
- No telling who is getting what electricity
 - Like trying to figure out if one drop of water in a swimming pool came out of a particular nozzle when there are multiple points of injection.

Restructuring And Resistance:

Restructuring Trade Agreements Juscelino F. Colares, Mustafa T. Durmuş, 2021-07-27 To avoid trade bargain erosion countries involved in large scale bilateral or regional trade arrangements must reconcile preserving close economic ties and supply chains with the need to dynamically adjust to new opportunities with other partners Using the growing deterioration of the European Union Turkey Customs Union as an illustration to a new model of trade agreement restructuring this well researched and deeply insightful book outlines and demonstrates how this trade arrangement can be successfully renegotiated thus providing expert practical guidance in a crucial area of trade law and policy that rarely receives the attention it deserves The book s novel framework features a clearly articulated legal foundation a transactional deployment strategy and a sequential negotiating approach applicable to bilateral and regional trade arrangements whose original terms no longer reflect the changed capabilities and interests of at least one of its parties The authors respond in detail to questions such as When should a country pursue bargain rebalancing How should trade diplomats pursue renegotiation and or new partnerships legally and transactionally Given that free trade agreements keep each country s trade sovereignty mostly intact under which circumstances should a country ever consider entering a customs union How may free trade agreements help countries address trade imbalances while enhancing supply chain resilience What are the limits to WTO litigation as an effective market barrier opening tool How should trade agreement restructuring be deployed as a path to further trade liberalization In depth attention is paid to identifying and investigating trade arrangements that are ripe for renegotiation and assessing sources of domestic and external support for or against renegotiating such bargains This book s model of international trade agreement restructuring fits well with emerging thinking on greater trade diversification and supply chain resilience The authors provide a clear actionable approach for considering and conducting the renegotiation of trade deals For these reasons this book will be welcomed by trade lawyers supply chain executives economists government officials and academics who are grappling with rising economic frictions in the fault lines of national sovereignty economic interdependence and the limits of current trade arrangements

Global Land Grabbing and Political Reactions 'from Below' Marc Edelman, Ruth Hall, Saturnino M. Borrás Jr., Ian Scoones, Ben White, Wendy Welford, 2017-08-15 When the 2007 2008 food and financial crises triggered a global wave of land grabbing scholars activists and policy practitioners assumed that this would be met with massive peasant resistance As empirical evidence accumulated however it became clear that political reactions from below to land grabbing were quite varied and complex Violent resistance outright expulsions everyday weapons of the weak and demands for better terms of incorporation into land deals were among the outcomes that emerged Readers of this collection will encounter a multinational group of scholars who use the tools of social movements theory and critical agrarian studies to examine cases from Argentina Mexico Guatemala Nicaragua Colombia Ethiopia Madagascar Mozambique Uganda Mali Ukraine India and Laos as well as the Rio 20 Sustainable Development Conference

Initiatives from below in response to land deals have involved local and transnational alliances and the use of legal and extra legal methods and have brought victories and defeats This book was first published as a special issue of The Journal of Peasant Studies

Varieties of Unionism Carola Frege, John Kelly, 2004-08-19 As unions face an ongoing crisis all over the industrialized world they have often been portrayed as outmoded remnants of an old economic structure This book argues that despite structural shifts in the economy and in politics unions retain important functions for capitalist economies as well as for political democracy Union revitalization in the face of their current difficulties is therefore of fundamental importance The book charts the strategies unions are using to respond to global union decline and to revive their fortunes in five countries US UK Germany Italy and Spain providing a wide range of institutional settings union structures identities and union responses It provides a rich source of documentation about union activity but more importantly it goes beyond description to address two of the big questions in comparative research How can we explain cross country differences of union responses to global decline And how effective are these actions in helping to revitalize the labour movements Union strategies and union revitalization outcomes varied strongly across countries and were shaped by national industrial relations institutions as well as by the interactions between union employer and state strategies These findings support the argument for national divergence of the varieties of capitalism literature and challenge the globalization thesis which predicts a degree of convergence in the fate of union movements across the advanced capitalist world There is no single revitalization strategy that works well for all union movements the same strategy is likely to produce different results in different countries Moreover evidence for variation in revitalization outcomes emerges most clearly when we adopt a multi dimensional conceptualization of revitalization moving beyond union membership and density to embrace economic and political power as well as the institutional dimension of union reform Despite serious revitalization attempts in all countries the scale of revitalization is extremely modest when compared to the great upsurges of unionism in history
