Resuscitatio Or Bringing Into Publick:

Notes on the Bacon-Shakespeare Question Charles Allen, 1900 **Elizabeth** Phillipa Jones, 2017-03-07 The author of The Other Tudors delves into the Virgin Queen myth Elizabeth's secret love life and the children she may have had as a result. Virgin Queen is the name for which the powerful and fearless daughter of Henry the Eighth and Anne Boleyn is best remembered and may explain why Elizabeth was the last of the Tudor monarchs. But how appropriate is that reputation? Were Elizabeth's suitors and favorites really just innocent intrigues? Or were they much more than that? Was Elizabeth really a woman driven by her passions who had affairs with several men including Thomas Seymour while he was still the husband of her guardian Catherine Parr and Robert Dudley Earl of Leicester a man adjudged to have been the great love of her life? Are the rumors of Elizabeth's illegitimate children true? Was the Virgin Queen image a carefully thought out piece of Tudor propaganda? Historian Philippa Jones author of the acclaimed The Other Tudors challenges the many myths and truths surrounding Elizabeth's life and reveals the passionate woman behind the scenes.

Transformations of Medical Education and Practice Impacting Critical Care in the New Millennium David W. Crippen, 2024-11-30 There have been major changes in the Education of critical care providers in recent years. Some of these changes involve the psychology of Generation Z applicants, new technological training aids, the issue of training disadvantaged trainees, exploring the difference between diversity and equity as well as the rise of physician extenders, physician assistants, and registered nurse practitioners. Many of these changes have a direct effect on the quality and quantity of new physicians entering the work force in the new millennium. Accordingly, these Emerging Issues will have a direct impact on how critical care trainees are selected and trained, directly affecting patient care. This Volume is structured to illustrate three platforms, each resting on the platform below. The three main sections include medical education, including the culture of medicine and critical care medicine in the new millennium. The first section includes examinations of Generation Z and medical education, evolution of resident house staff, implications for onerous medical training costs, simulation models in medical education versus direct patient care, emerging providers in medical ethics, and futuristic concepts for innovative medical education. The second section details politics, internet, and social media use, the future of malpractice issues in health care, metabolic investigations at point of care, hope versus experience in long term ICU care, and anti-vaxxers in the pandemic era. The final section details triage and ICU care of critically ill patients, algorithms that might replace clinical intuition, risks and benefits of artificial intelligence, music and the brain, ICU care during global pandemics, the rise of physician extenders, probability theory in interpreting clinical outcomes, new ideas in death by neurologic criteria, as well as the future of death. Written by experts in the field, Transformations of Medical Education and Practice Impacting Critical Care in the New Millennium serves as a detailed guide for seasoned clinicians working to teach the new generation of critical care physicians.

A Critical Impulse to e-Governance in the Asia Pacific

AMITA SINGH,2013-11-26 This book presents a comparative study of the vision ability and dynamism on the part of governments in selected Asian Pacific countries as they engage in the distribution of e governance Consequently it creates a platform for mutual learning and offers a dispassionate evaluation of mega e projects It is an interdisciplinary study of information and communication technology within mainstream social science research and attempts to bridge the gap in empirical research between the nature of technology and the manner in which it is governed The analysis shows that hegemonic and panoptic structures of surveillance and control may derail efforts to establish sustainable e governance while a liberal futuristic framework with open socio technology networks on Big Data analytics IPv6 and Cloud Computing may strengthen the trend towards democratizing institutions Further the book highlights the extraordinary energy being generated in the emerging new world through their use of the internet and suggests how governments could translate this into a new wealth of economic opportunities social inclusion and equitable development in addition to achieving the MDGs Millenium Development Goals Lastly it emphasizes the importance of a visionary approach which wherever present has been able to sustain e governance by meaningfully linking the micro to the macro and heritage to the horizon *Electrical World* ,1912
