Union Japan Africa Transition countries and the developing nations of Asia and Latin America **Global Financial Regulation** Howard Davies, David Green, 2013-05-08 As international financial markets have become more complex so has the regulatory system which oversees them The Basel Committee is just one of a plethora of international bodies and groupings which now set standards for financial activity around the world in the interests of protecting savers and investors and maintaining financial stability These groupings and their decisions have a major impact on markets in developed and developing countries and on competition between financial firms Yet their workings are shrouded in mystery and their legitimacy is uncertain Here for the first time two men who have worked within the system describe its origins and development in clear and accessible terms Howard Davies was the first Chairman of the UK's Financial Services Authority the single regulator for the whole of Britain's financial sector David Green was Head of International Policy at the FSA after spending thirty years in the Bank of England and has been closely associated with the development of the current European regulatory arrangements Now with a revised and updated introduction which catalogues the changes made since the credit crisis erupted this guide to the international system will be invaluable for regulators financial market practitioners and for students of the global financial system wherever they are located The book shows how the system has been challenged by new financial instruments and by new types of institutions such as hedge funds and private equity Furthermore the growth in importance of major developing countries who were excluded for far too long from the key decision making for a has led to a major overhaul The guide is essential reading for all those interested in the development of financial markets and the way they are regulated The revised version is only available in paperback *The EU Internal Market in Comparative Perspective* Dominik Hanf, 2008 The European Union's internal market is the hard core of integration and by far its most precious asset However a number of deep seated factors have impeded the development of a systematic and wide ranging academic research programme dedicated to the internal market The purpose of this book is to begin to address this predicament with a tri disciplinary analysis of the internal market as scant opportunities for mutual understanding and learning across disciplines law economics and politics currently exist Internal market scholars from all three disciplines collaborated on this project in which each chapter was read and critiqued by a scholar from a different discipline The editors trust that this unique exercise reveals to many readers the enormous potential for in depth and continuous analysis of the internal market and all that it entails It also provides an accessible text for students and scholars from all three disciplines interested in the internal market Economics of the European Union Michael Artis, Frederick Nixon, 2007-05-17 The new edition of this successful text analyses the current economic issues facing a rapidly changing Europe The authors combine policy history and data to present a global perspective of the EU written with a range of students taking an introductory module in European Economics in mind With new material on the economic relationship between the EU and the US Enlargement and the Lisbon process the authors consider the changing landscape and Europe's development as a major global player The
