of British politics foreign policy international relations and related courses      Capitalism, Coronavirus and War Radhika Desai, 2022-12-09 Capitalism Coronavirus and War investigates the decay of neoliberal financialised capitalism as revealed in the crisis the novel coronavirus triggered but did not cause a crisis that has been deepened by the conflict over Ukraine and its repercussions across the globe Leading domestically to economic and political breakdown the pandemic accelerated the decline of the US led capitalist world s imperial power intensifying the tendency to lash out with aggression and militarism as seen in the US led West s New Cold War against China and the proxy war against Russia over Ukraine The geopolitical economy of the decay and crisis of this form of capitalism suggests that the struggle with socialism that has long shaped the fate of capitalism has reached a tipping point The author argues that mainstream and even many progressive forces take capitalism s longevity for granted misunderstand its historical dynamics and deny its formative bond with imperialism Only a theoretically and historically accurate account of capitalism s dynamics and historical trajectory which this book provides can explain its current failures and predicament It also reveals why though the pandemic by revealing capitalism s obscene inequality and shocking debility prompted the most serious critiques of capitalism to emerge in decades hopes of building back better were so quickly dashed This book sheds searching light on the dominant narratives that have normalised the neoliberal financialised capitalism and the dollar creditocracy dominating the world economy with even critics unable to link capitalism s neoliberal turn to its financialisations historical decay productive debility and international decline It contends that only by appreciating the seriousness of the crisis and rectifying our understanding of capitalism can progressive forces thwart a future of chaos and or authoritarianism and begin the long task of building socialism This book will be of great interest to students scholars and researchers of international relations international political economy comparative politics and global political sociology The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Thanks to the support of libraries working with Knowledge Unlatched [www.knowledgeunlatched.org](http://www.knowledgeunlatched.org)      *Post-War British Literature and the "End of Empire"* Matthew Whittle, 2017-01-03 This book examines literary texts by British colonial servant and settler writers including Anthony Burgess Graham Greene William Golding and Alan Sillitoe who depicted the impact of decolonization in the newly independent colonies and at home in Britain The end of the British Empire was one of the most significant and transformative events in twentieth century history marking the beginning of a new world order and having an indelible impact on British culture and society Literary responses to this moment by those from within Britain offer an enlightening and often overlooked exploration of the influence of decolonization on received notions of race and class while also prefiguring conceptions of multiculturalism As Matthew Whittle argues in this sweeping study these works not only view decolonization within its global context alongside the aftermath of the Second World War the rise of America and mass immigration but often propose a solution to imperial decline through cultural renewal      *After Brexit and Other Essays*

Andrew Gamble, 2021-04-28 Being more like America again and less like Europe is the heart of the UK model of capitalism but there are many respects in which Britain remains unlike America despite its strong appeal to the British political class In After Brexit Andrew Gamble sets out the economic models and external relationships that Britain has pursued since the Second World War and examines the choices it now faces as it adjusts to life outside of the European Union This volume brings together this essay with some of Andrew Gamble's most important and influential writings on British politics and political economy from the last forty years They reflect on many of the issues that animate British politics from the relative decline of the economy and the reshaping of the welfare state to the transformation of the Conservative and Labour parties and the changing constitutional order with the devolution of power to Wales Scotland and Northern Ireland The volume is introduced by the author and includes his notes on each of the essays as well as an epilogue which considers their original context and what has changed since Taken together the essays in this volume are testament to the acuity of one of Britain's foremost political thinkers and provide rich insight into debates and ideas that continue to influence British politics and Britain's place in the world A companion volume of Andrew Gamble's essays The Western Ideology and Other Essays focusing on political ideas and ideologies is also available from Bristol University Press [Penguin Books and political change](#) Dean Blackburn, 2020-11-12 Founded in 1935 by a young publisher disillusioned with the class prejudices of the interwar publishing trade Penguin Books set out to make good books available to all The Penguin Specials a series of current affairs books authored by leading intellectuals and politicians embodied its democratising mission Published over fifty years and often selling in vast quantities these inexpensive paperbacks helped to shape popular ideas about subjects as varied as the welfare state homelessness social class and environmental decay Using the Specials as a lens through which to view Britain's changing political landscape Dean Blackburn tells a story about the ideas that shaped post war Britain Between the late 1930s and the mid 1980s Blackburn argues Britain witnessed the emergence and eclipse of a meritocratic moment at the core of which was the belief that a strong relationship between merit and reward would bring about social stability and economic efficiency Equal opportunity and professional expertise values embodied by the egalitarian aspirations of Penguin's publishing ethos would be the drivers of social and economic progress But as the social and economic crises of the 1970s took root many contemporary thinkers and politicians cast doubt on the assumptions that informed meritocratic logic Britain's meritocratic moment had passed [The Political Economy of the Special Relationship](#) Jeremy Green, 2020-07-28 How America's global financial power was created and shaped through its special relationship with Britain The rise of global finance in the latter half of the twentieth century has long been understood as one chapter in a larger story about the postwar growth of the United States The Political Economy of the Special Relationship challenges this popular narrative Revealing the Anglo American origins of financial globalization Jeremy Green sheds new light on Britain's hugely significant but often overlooked role in remaking international capitalism alongside America Drawing from new archival research Green

questions the conventional view of international economic history as a series of cyclical transitions among hegemonic powers. Instead he explores the longstanding interactive role of private and public financial institutions in Britain and the United States, most notably the close links between their financial markets, central banks and monetary and fiscal policies. He shows that America's unparalleled post WWII financial power was facilitated and in important ways constrained by British capitalism as the United States often had to work with and through British politicians, officials and bankers to achieve its vision of a liberal economic order. Transatlantic integration and competition spurred the rise of the financial sector, an increased reliance on debt, a global easing of regulation, the ascendance of monetarism and the transition to neoliberalism. From the gold standard to the recent global financial crisis and beyond, *The Political Economy of the Special Relationship* recasts the history of global finance through the prism of Anglo-American development. Race, nation and empire

Catherine Hall, Keith McClelland, 2024-06-04. The essays in this collection show how histories written in the past in different political times dealt with, considered or avoided and disavowed Britain's imperial role and issues of difference. Ranging from enlightenment historians to the present, these essays consider both individual historians including such key figures as E. A. Freeman, G. M. Trevelyan and Keith Hancock, and also broader themes such as the relationship between liberalism, race and historiography, and how we might re-think British history in the light of trans-national, trans-imperial and cross-cultural analysis. Britishness and what British history is have become major cultural and political issues in our time. But as these essays demonstrate, there is no single national story; race, empire and difference have pulsed through the writing of British history. The contributors include some of the most distinguished historians writing today: C. A. Bayly, Antoinette Burton, Saul Dubow, Geoff Eley, Theodore Koditschek, Marilyn Lake, John M. MacKenzie, Karen O'Brien, Sonya O. Rose, Bill Schwarz, Kathleen Wilson.

**Freedom From America** Robert Corfe, 2006-01-16. Anti-Americanism has now become an imperative for the sanity and stability of the world. Over the past 30 years, almost every foreign adventure of the US has led to failure, compounding existing problems and, after the withdrawal of her forces, conditions have been left worse than when she intervened. Added to that is the resistance of her government to recognise the reality of global warming and, most recently, blundering policies have instigated a series of unexpected terrorist outrages on innocent victims which have made the world a more dangerous place. There are many justifications for anti-Americanism, but there is one which rises above all others: viz. a financial-industrial system which clashes with the long traditions of the social democracies in Europe and the Far East. Two incompatible capitalist systems have emerged amongst the advanced industrial economies in the post-war period: the rentier capitalism of the US and the productive capitalism of Europe and the Far East. Each is guided by its own ideology: the Neoliberalism of America versus the social democracy, a broad-term transcending party politics of Europe and the Far East Tiger economies. With America emerging as the clear victor of the Cold War in 1989, her government and corporations have been sufficiently confident to impose their financial-industrial system on the rest of the world, and this is proving disastrous to the

social democratic consensus and welfare policies built up since 1945 and before. The argument is propagated that the European is no longer viable and must therefore surrender to the American way and globalisation but this is shown to be a fiction invented by US policy makers. There is an in depth analysis of American culture which explains its political system and the US is revealed to be very far from a true democracy. It is in Europe and elsewhere where the ideals of democracy, justice and equity are best promoted. The final chapters home in on a European resolution to the most difficult problems of our time viz the Israeli Palestinian conflict and how to defuse the causes of Terror. The book is an appeal for the cause of civilisation, social justice and equity for all humanity. *European Enlargement across Rounds and Beyond Borders* Haakon A.

Ikonomou, Aurélie Andry, Rebekka Byberg, 2017-03-16 Enlargement has been an almost constant part of European integration history going from an improvised exercise to the EU's most developed foreign policy tool. However, neither the longevity nor the complexity of enlargement has been properly historicised. *European Enlargement across Rounds and Beyond Borders* offers three interdisciplinary innovative and indeed radical new ways of understanding and analysing EC/EU enlargements: first tracing Longue Durée developments, second investigating enlargement Beyond the Road to Membership and third exploring the Entangled Exchanges and synergies between the EC/EU and its outside. This edited volume will provide fresh perspectives on enlargement as one of the defining processes in Europe in the second half of the 20th century. How are we to understand enlargement as a policy? How has it changed the EU? What is the historical role of the British press in shaping the UK's visions of Europe? How has enlargement played into Russia's relationship with today's EU? Giving answers to these questions and many more, this volume wishes to spark a broad debate about the roots, range and repercussions of enlargement and how historians and other scholars should engage with it. This publication will be of key interest to scholars and students of modern European history and politics, the European integration process, EU studies and more broadly multilateral international institutions, history, law and the social sciences. *Canals in a Changing Britain* Jules P.

Gehrke, 2024-12-15 *Canals in a Changing Britain: Construction, Culture and Environment 1760-1968* assesses canals as a major technological system re-shaping Britons' relationship with their landscape and environment for over 200 years. It offers a sustained narrative addressing canal construction in the late eighteenth century, living and working communities alongside canals in the nineteenth century, canals' relationship to concerns regarding de-industrialization in the early twentieth century and canals as sites for the experience of nature and rural life in the postwar era between 1945 and 1968. This book makes use of a variety of archival and published material on canals and references academic publications on histories of technology and the environment as well as scholarship related specifically to canals. It argues contemporary conversations regarding the current and future use of canals as multi-faceted sites of recreation, leisure, heritage and experience of the natural environment in Britain must be seen in the context of an arc of historical experience between 1760 and 1968. *From Crisis to Crisis* Brian O'Sullivan, 2018-12-11 *From Crisis to Crisis* examines the impact of the harsh conditions of the interwar

economy on the British merchant banks The financial crises of 1914 and 1931 are assessed using primary sources The competitive threats including the rise of New York as a rival financial centre are considered It challenges alleged special treatment and provides fresh perspectives on the interwar rationalisation of industry During the late nineteenth century Britain's merchant banks had become pre eminent in a world of fixed exchange rates free trade and the unfettered mobility of international capital This world was increasingly challenged in the interwar period being replaced by floating exchange rates trade protectionism and restrictions on capital movements This book fills a gap in the historiography of British banking by recovering the histories of long forgotten merchant banks rather than focusing on the better known firms Using a wide range of archival resources it traces the strategic transformation by some merchant banks from higher risk capital intensive activities to lower risk advisory services Brian O Sullivan has been jointly awarded the 2019 BAC Wadsworth Prize for From Crisis to Crisis The Transformation of Merchant Banking 1914 1939 It was judged by the Business Archives Council BAC to have made an outstanding contribution to the study of British business history Brian shared the prize with Professor Priya Satia of Stanford University in California
