Rethinking Pension Reform:

Rethinking Pension Reform Franco Modigliani, Arun Muralidhar, 2004 **Rethinking Pension Reform** Franco Modigliani, Arun Muralidhar, 2004-08-02 This book is unique as it presents an academic and a practical aspect on managing pension funds to clarify the global debate on social security The authors establish the basic choices in designating any system to help policy makers develop the system that achieves their many objectives The success of reforms depends on financial innovation to mitigate key risks and some innovations are discussed which also demonstrates how pension reform choices affect the achievement of retirement objectives Finally the authors examine some proposed hybrid options to show how the beneficial features of these hybrids can be captured through good design in a single fund Rethinking pension reform

Peter R. Orszag, Joseph Eugene Stiglitz, 1999 **Rethinking Pension Reform** Axel Börsch-Supan, 2000 **Rethinking the Welfare State** Martin Rein, Winfried Schmähl, 2004 The contributions to this volume offer an analysis of the pensions crisis how it has come about what it means and what measures can be taken to offset the effects of a massive shortfall between the available resources and public expectations Rethinking Public Pension Reform Initiatives Mr. Peter S. Heller, 1998-04-01 This paper argues that there are significant risks limitations and complications associated with reliance upon mandatory DC fully funded schemes as the dominant public pension pillar Policies to limit risks may result in the government being reinjected into playing an important financial role in the provision of social insurance For many countries the principal source of old age support should thus derive from a well formulated public DB pillar with a significant amount of prefunding A DC FF pillar can play a useful supplemental role in a multi pillar system for the accumulation of pension savings

Children and Pensions Alessandro Cigno, Martin Werding, 2007 An analysis of the effect of public pension schemes on a country's fertility rate and a proposal for policies to reform pension coverage in light of this The rapidly aging populations of many developed countries most notably Japan and member countries of the European Union present obvious problems for the public pension plans of these countries Not only will there be disproportionately fewer workers making pension contributions than there are retirees drawing pension benefits but the youth to age imbalance would significantly affect the total contributive capacity of future generations and hence their total income growth In *Children and Pensions* Alessandro Cigno and Martin Werding examine the way pension policy and child related benefits affect fertility behavior and productivity growth They present theoretical arguments to the effect that public pension coverage as such will reduce aggregate fertility and may raise aggregate household savings They argue further that public pensions as they are currently designed discourage parents from private human capital investment in their children to improve the children's future earning capacity After an overview of pension and child benefit policies focusing on the European Union Japan and the United States the authors offer an empirical and theoretical analysis and a simulation of the effects of the policies under discussion Their policy proposals to address declines in fertility and productivity growth include the innovative suggestion that relates a person's pension entitlements to his or her number of children and the children's earning ability proposing that in effect a person's pension could be financed in part or in full by the pensioner's own children

Labor Markets and Social Policy in Central and Eastern Europe N. A. Barr, 2005-01-01 *Labor Markets and Social Policy in Central and Eastern Europe* summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy

which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants *Pension at Stake* Muhammad Irfan Abdul Rahman, Wee Yeap Lau, 2024-09-14 This book focuses on the Defined Benefit DB pension scheme for pensionable civil servants in Malaysia as a result of the rapidly rising pattern of pension costs for public servants in the country In doing so the book explores various issues on the defined benefit pension fund that the Malaysian Government currently confronts Chapter one provides an overview of the pension system in the country covering only the civil service pension fund managed by the Retirement Fund Incorporated better known as KWAP It also discusses the issues and challenges the pension system and pensioners face Chapter two reviews the past studies sets up empirical models and examines which are the determinants of pension cost Chapter three examines the asset allocation and performance of the KWAP pension fund from the last 13 years since the Ministry of Finance established it as part of the pension reform Based on the available pension assets and liabilities data Chapter Four outlines the steps and makes the 10 year forecast to ascertain whether the pension fund will be underfunded or not in the future Chapter five examines whether the pension fund is sustainable in the long run based on the four parameters using scenario based simulation In order to solve this problem especially the longevity risk Chapter six proposes issuing longevity bonds by the authority to mitigate the longevity risk faced by the KWAP pension fund Put together the book is an interesting compilation of facts analysis and insights from this hotly debated issue the current government faces It serves as a reference for the financial market industry regulators market practitioners analysts researchers government authorities and universities *Market-Based Governance* John D. based environmental policy Archon Fung on social markets and Cary Coglianese and David Lazer The final section examines both the upside and the downside of the market based approach to improving governance Contributors include Elaine Kamarck John D Donahue Mark Moore and Robert Behn An introduction by John D Donahue frames market based governance as an effort to engineer into public work some of the intensive accountability that characterizes markets without surrendering the extensive accountability of conventional government A preface by Joseph S Nye Jr sets the book in the context of a larger inquiry into the future of governance
