Rethinking State Theory:

Rethinking State Theory Mark J. Smith, Mark J. Smith, 2013-10-11 In the last two decades objects of analysis such as the state have increasingly been seen as uncertain and contested theoretical concepts Mark J. Smith presents a counter argument that highlights how existing theoretical approaches can provide useful tools for understanding contemporary political developments

State Theory Bob Jessop, 2013-04-30 This volume develops a novel approach to state theory It offers a comprehensive review of the existing literature on the state and sets a new agenda for state research Four central themes define the scope of the book an account of the bases of the operational autonomy of the state the need to develop state theory as part of a more general social theory the possibilities of explaining capitalist societalization without assuming that the economy is the ultimate determinant of societal dynamics and a defence of the method of articulation in theory construction In developing these issues Bob Jessop both builds on and goes well beyond the view presented in his earlier books *The Capitalist State* 1982 and *Nicos Poulantzas* 1985 The result is a highly original statement which will become a center point of discussion The volume confirms the author's standing as one of the most important post War Marxist state theorists

Rethinking State Theory Mark J. Smith, 2000 Examines the connection between theories of the State and approaches to knowledge construction It focuses on neo pluralist neo liberalist and neo Marxist thought analysing the work of Hayek and others

State Theory and Andean Politics Christopher Krupa, David Nugent, 2015-04-14 In the last few decades Andean states have seen major restructuring of the organization leadership and reach of their governments With these political tremors come major aftershocks regarding both definitions and expectations What is a state Who or what makes it up and where does it reside In what capacity can the state be expected to right wrongs raise people up protect them from harm maintain order or provide public services What are its powers and responsibilities *State Theory and Andean Politics* attempts to answer these questions and more through an examination of the ongoing process of state creation in Andean nations Focusing on the everyday extra official and frequently invisible or partially concealed permutations of rule in the lives of Andean people the essays explore the material and cultural processes by which states come to appear as real and tangible parts of everyday life In particular they focus on the critical role of emotion imagination and fantasy in generating belief in the state among the governed and the governing alike This approach pushes beyond the limits of the state as conventionally understood to consider how non state acts of governance intersect with official institutions of government while never being entirely determined by them or bound to their authorizing agendas *State Theory and Andean Politics* asserts that the state is not simply an institutional bureaucratic apparatus but one of many forces vying for a claim to legitimate political dominion Featuring an impressive array of Andeanist scholars as well as eminent state theorists Akhil Gupta and Gyanendra Pandey *State Theory and Andean Politics* makes a bold and novel claim about the nature of states and state making that deepens understanding not only of the Andes and Global South but of the world at large Contributors Kim Clark Nicole Fabricant

Lesley Gill Akhil Gupta Christopher Krupa David Nugent Gyanendra Pandey Mercedes Prieto Maria Clemencia Ram rez Irene Silverblatt Karen Spalding Winifred Tate Rule and Rupture Christian Lund, Michael Eilenberg, 2017-07-11 Rule and Rupture State Formation Through the Production of Property and Citizenship examines the ways in which political authority is defined and created by the rights of community membership and access to resources Combines the latest theory on property rights and citizenship with extensive fieldwork to provide a more complex nuanced assessment of political states commonly viewed as weak fragile and failed Contains ten case studies taken from post colonial settings around the world including Cambodia Nepal Indonesia Afghanistan Rwanda Somalia Democratic Republic of Congo Colombia and Bolivia Characterizes the results of societal ruptures into three types of outcomes for political power reconstituted and consolidated challenged and fragmented Brings together exciting insights from a global group of scholars in the fields of political science development studies and geography *Cooperation Networks and Economic Development* Andrés Cárdenas O'Farrill, 2021-02-11 For most Western audiences Cuba is a touristic paradise stuck in time and virtually detached from world technology networks by the US embargo anything but a hub of industrial innovation and high value added biotechnology However a closer look reveals more subtle but equally powerful stories that challenge the homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban economy and industry From this kind of enquiry emerges the case of the internationally respected Cuban biotech industry as the most successful case of science and technology policy in the country's economic history The book takes an interdisciplinary approach exploring issues such as interdependency purpose and history as natural constituencies of the innovation process It also examines the dynamic and crucial role played by the state in the formation of innovative business enterprises This book will be of interest to academic researchers in the fields of innovation and economic development **Power and Resistance, 7th ed.** Jessica Antony, Wayne Antony, 2022-06-30T00:00:00Z Power and Resistance debunks the dominant neoliberal hyper individualist approach to society's problems that sees poverty as a result of laziness environmental crises as a result of market demands for products that pollute and Indigenous Peoples struggles as a result of not assimilating We argue that it is social inequality and oppression that are the underlying causes of social problems In a society like ours powerful groups make choices that benefit them and force those choices onto others creating life problems for others and society as a whole The powerful also have influence over what is and is not called a social problem Solving social problems requires changing the structures of inequality and oppression For example industrial corporate agriculture has created huge profits for a few gigantic food corporations but left much of the world hungry But farmers and their allies are pushing back through agroecology an agriculture based on local small scale ecologically sustainable farming that brings eaters and growers closer to one another The seventh edition of Power and Resistance includes new chapters on anti Black racism in schools Indigenous people and mental health food security and sovereignty and work in the gig economy Handbook of Political Anthropology Harald

philosophy this new approach offers a particular set of logics social political and fantasmatic with which to construct critical explanations of practices and regimes While the first part of the book critically engages with lawlike interpretivist and causal approaches to critical explanation the second part elaborates an alternative grammar of concepts informed by an ontological stance rooted in poststructuralist theory In developing this approach a number of empirical cases are included to illustrate its basic concepts and logics ranging from the apartheid regime in South Africa to recent changes in higher education The book will be a valuable tool for scholars and researchers in a variety of related fields of study in the social sciences especially the disciplines of political science and political theory international relations social theory cultural studies anthropology and philosophy

Remaking Indigeneity in the Amazon Esteban Rozo,2023-09-28 Drawing on archival and ethnographic work this book analyzes how indigeneity Christianity and state making became intertwined in the Colombian Amazon throughout the 20th century At the end of the 19th century the state gave Catholic missionaries tutelage over Indigenous groups and their territories but in the case of the Colombian Amazon this tutelage was challenged by evangelical missionaries that arrived in the region in the 1940s with different ideas of civilization and social change Indigenous conversion to evangelical Christianity caused frictions with other actors while Indigenous groups perceived conversion as way of leverage with settlers This book shows how evangelical Christianity shaped new forms of indigeneity that did not coincide entirely with the ideas of civilization or development that Catholic missionaries and the state promoted in the region Since the 1960s the state adapted development policies and programs to Indigenous realities and practices while Indigenous societies appropriated evangelical Christianity in order to navigate the changes brought on by colonization modernity and state formation This study demonstrates that not all projects of civilization were the same in Amazonia nor was missionization of Indigenous groups always subordinate to the state or resource extraction

Power and Resistance Wayne Antony, 2020-05-06T00:00:00Z How do we make sense of the social problems that continue to plague Canadian society Our understanding of issues such as poverty racism violence homophobia crime and pollution stems from our view of how society is structured From the dominant neoliberal perspective social problems arise from individuals making poor choices From a critical perspective however these social troubles are caused by structural social inequalities Disparities in economic social and political power that is relations of power based on class race gender and sexual orientation are the central structural element of capitalist patriarchal colonialist societies The contributors to Power and Resistance use this critical perspective to explore Canadian social issues such as poverty colonialism homophobia violence against women climate change and so on This sixth edition adds chapters on the corporatization of higher education the lethal impacts of colonialism democracy the social determinants of health drug policy and sexual violence on campus

The Punishment Monopoly Pem Davidson Buck, 2019-11-22 Examines the roots of white supremacy and mass incarceration from the vantage point of history Why asks Pem Davidson Buck is punishment so central to the functioning of the United States a country proclaiming liberty and justice for all The Punishment Monopoly challenges our everyday understanding of American history focusing on the constructions of race class and gender upon which the United States was built and which still support racial capitalism and the carceral state After all Buck writes a state to be a state has to punish bottom line that is what a state and the force it controls is for Using stories of her European ancestors who arrived in colonial Virginia in the seventeenth and eighteenth centuries and following their descendants into the early nineteenth century Buck shows how struggles over the right to punish backed by the growing power of the state governed by a white elite made possible the dispossession of Africans Native Americans and poor whites Those struggles led to the creation of the low wage working classes that capitalism requires locked in by a metastasizing white supremacy that Buck's ancestors with many others defined as white helped establish and manipulate Examining those foundational struggles illuminates some of the most contentious issues of the twenty first century the exploitation and detention of immigrants mass incarceration as a central institution Islamophobia white privilege judicial and extra judicial killings of people of color and

some poor whites The Punishment Monopoly makes it clear that none of these injustices was accidental or inevitable that shifting our state sanctioned understandings of history is a step toward liberating us from its control of the present
