Rethinking Water Management Cecilia Tortajada And Johan Rockstrom Edited By Caroline M. Figueres, 2003 If water resources are to be distributed efficiently equitably and cost effectively in this rapidly changing world then it is clear that current water management practices are no longer feasible Innovative approaches are required to meet the increasing water demands of a growing world population and economy and the needs of the ecosystems supporting them New approaches have to be employed at global national and local levels In *Rethinking Water Management* a new generation of water experts from around the world examine the critical challenges confronting the water profession including rainwater and groundwater management recycling and reuse water rights transboundary access to water and financing of water They offer important new perspectives on the use management and conservation of fresh water in terms of both quantity and quality for the domestic agricultural and industrial sectors and show how a new set of paradigms can be applied to successfully manage water for the future Caroline Figueres is Head of the Urban Infrastructure Department at UNESCO IHE Water Education Institute in The Netherlands Cecilia Tortajada is Vice

President of the Third World Centre for Water Management in Mexico and Vice President elect of the International Water Resources Association Johan Rockström is Water Resources Expert at UNESCO IHE **Water** Unesco, World Water Assessment Programme (United Nations), 2006 This illustrated report sets out a global review of the state of the world's freshwater resources based on the collective work of 24 United Nations agencies following on from the conclusions of the first UN World Water Development Report Water for People Water for Life published in 2003 ISBN 9231038818 This second edition discusses progress towards the water related targets of the UN Millennium Development Goals and examines a range of key issues including population growth and increasing urbanisation changing ecosystems food production health industry and energy as well as risk management valuing and paying for water and increasing knowledge and capacity It contains 16 case studies which consider key challenges in water resource management and makes a number of recommendations to guide future action and encourage sustainable use productivity and management of our increasingly scarce freshwater resources Handbook on Water Security Claudia Pahl-Wostl, Anik Bhaduri, Joyeeta Gupta, 2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security Re-thinking Water and Food Security Luis Martinez-Cortina, Alberto Garrido, Elena Lopez-Gunn, 2010-09-30 This book provides an overview by leading world experts on key issues in global water and food security The book is divided in a series of over arching themes and sections The first part of the book provides an overview of water and food security The second and third sections look at global trade and virtual water trade and provide some *Water and Post-Conflict Peacebuilding* Erika Weinthal, Jessica J. Troell, Mikiyasu Nakayama, 2014-02-24 Water is a basic human need and despite predictions of water wars shared waters have proven to be the natural resource with the greatest potential for interstate cooperation and local confidence building Indeed water management plays a singularly important role in rebuilding trust after conflict and in preventing a return to conflict Featuring nineteen case studies and analyses of experiences from twenty eight countries and territories in Africa Asia Europe the Americas and the Middle East and drawing on the experiences of thirty five researchers and practitioners from around the world this book creates a framework for understanding how decisions governing water resources in post conflict settings

can facilitate or undermine peacebuilding The lessons will be of value to practitioners in international development and humanitarian initiatives policy makers students and others interested in post conflict peacebuilding and the nexus between water management and conflict Water and Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six edited books of case studies and analyses with contributions from practitioners policy makers and researchers Other books in this series address high value resources land livelihoods assessing and restoring natural resources and governance

Recarbonizing global soils - A technical manual of recommended management practices Food and Agriculture Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15 Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1 This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints This manual presents different sustainable soil management SSM practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications Volume 4 includes 51 case studies dealing with cropland grassland integrated systems and farming approaches

Natural Resource Conflicts M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as

well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

Innovations and Interdisciplinary Solutions for Underserved Areas Abdulhameed Danjuma Mambo, Assane Gueye, Ghada Bassioni, 2023-01-31 This book constitutes the refereed post conference proceedings of the 5th EAI International Conference on Innovations and Interdisciplinary Solutions for Underserved Areas InterSol 2022 held in Nile University of Nigeria Abuja Nigeria in March 2022 The 26 papers presented were selected from 66 submissions and issue different problems in underserved and unserved areas They face problems in almost all sectors such as energy water communication climate change food education transportation social development and economic growth

Water Governance, Policy and Knowledge Transfer Cheryl De Boer, Joanne Vinke-de Kruijf, Gül Özerol, Hans Th. A. Bressers, 2013-05-29 In an increasingly global community of researchers and practitioners new technologies and communication means have made the transfer of policies from one country or region to another progressively more prevalent There has been a lot of attention in the field of public administration paid to policy transfer and institutional transplantation This book aims to create a better understanding of such transfers in the water management sector These include the adoption of modern water management concepts such as integrated water resources management and forms of water governance which are strongly promoted and sometimes also imposed by various international organizations Transfers also occur within the scope of development aid or for the purpose of creating business opportunities In addition many research organisations consultancies and governmental agencies are involved in cross border work The purpose of this book is therefore to present practical examples of the transfer of modern water management from one locality to another and to critically discuss the transferability of policy and governance concepts by analysing the contextual needs and factors Case studies are included from North America Europe the Middle East and Asia It is argued that in many cases context matters in water management and that there is no panacea or universal concept that can be applied to all countries or regions with different political economic cultural and technological contexts Yet it is also shown that some countries are facing pressing and similar water management issues that cut across national borders and hence the transfer of knowledge may be beneficial

Green Technologies: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2011-03-31 Green Technologies Concepts Methodologies Tools and Applications assembles the most up to date collection of research results and recent discoveries in environmental and green technology This comprehensive anthology covers a wide range of topics

Prospects for productive use of saline water in West Asia and North Africa, 2006 This study of the potential to use saline water for irrigation in Egypt Jordan Syria and Tunisia concludes that it is technically feasible but its economic viability remains to be established Expert opinion suggests that saline irrigated agriculture is most likely to succeed in the West Asia North Africa region as a complement to small scale mixed livestock and cropping farming

systems Precise quantification of the available saline water resources is not possible because of the lack of hard data As a result precise quantification of the likely impact of introducing saline irrigated agriculture on poverty alleviation and food security is also impossible although anecdotal evidence suggests that this would be positive The report argues that the environmental effects of saline irrigated agriculture both positive and negative need to be integrated into policies and decisions on the use of saline water Uses other than agricultural for example amenity uses industrial landscaping carbon sequestration or biomass production for energy also need to be considered and may be more socially and economically beneficial *The United Nations World Water Development Report* Cosgrove, Catherine E., Cosgrove, William J., UNESCO World Water Assessment Programme, 2012-12-31

Sustainable Development: National Aspirations, Local Implementation Alan Terry, 2016-04-01 Using case studies from Africa South America Asia and the Caribbean this book examines the progress made in uniting national aspirations of sustainable development strategies with their local implementation Comparing the situation on the ground with formal national environmental action plans the book compares progress or the lack of progress between different sectors cultures regions and resources throughout the developing world It examines whether local knowledge and actions are undermining national aspirations or whether they are being ignored at the national level with detrimental consequences to sustainable development The measurement of sustainable development the role of formal and informal education in sustainable development and the significance of diverse voices in the practice of sustainable development are considered The book draws lessons from those cases which appear to be experiencing positive moves towards sustainability and examines whether common frameworks exist which suggest that good practice may be transferable from one milieu to another

Climate Change, Justice and Sustainability Ottmar Edenhofer, Johannes Wallacher, Hermann Lotze-Campen, Michael Reder, Brigitte Knopf, Johannes Müller, 2012-06-25 Analysing and synthesising vast data sets from a multitude of disciplines including climate science economics hydrology and agricultural research this volume seeks new methods of combining climate change mitigation adaptation development and poverty reduction in ways that are effective efficient and equitable A guiding principle of the project is that new alliances of state and non state sector partners are urgently required to establish cooperative responses to the threats posed by climate change This volume offers a vital policy framework for linking our response to this change with progressive principles of global justice and sustainable development
