Unexpected Gains David Simpson, Lynda Miller, 2018-03-08 Psychoanalytic psychotherapy is a new development in the treatment of people with learning disabilities and mental health problems which traditionally has utilised behavioural management and limited counselling The papers collected here have evolved from the work of the pioneering Learning Disabilities Service at the Tavistock Clinic London which is made up from specialised professionals from the fields of psychology psychiatry child and adolescent psychotherapy adult psychotherapy and social work The service mainly offers individual psychotherapy but also provides group work parent work family therapy and consultative work with professionals where necessary

Conjunctions Andrew Cooper, 2018-06-04 Conjunctions engages separately and connectively with therapeutic social work practice psychoanalytically informed research methods and philosophy as well as contemporary human service organisational cultures and predicaments and the societal dynamics affecting social work and psychoanalysis The chapters are gathered into several thematic sections Practice Organisations Politics Policy and Culture Research and a final chapter on death dying and social work The writing on each topic uses a blend of psychoanalysis social theory and philosophy to illuminate and develop a psycho social account of individual organisational and social processes and dynamics The author draws directly upon his own and others lived experience of clinical work organisational stresses and strains social processes and research to generate conceptualised accounts of inner and outer experiential worlds in the hope of mobilising emotional and thinking responses in his readership Conjunctions is therefore intended to be an intervention in modern professional therapeutic and social life as well as a contribution to understanding it

Counselling Adults with Learning Disabilities Sally Hodges, 2017-04-21 The major barrier in the way of competent counselling provision for people with learning disabilities is not the presence of a learning disability but the lack of understanding of the relevance of counselling by potential referrers Sally Hodges has written for a wide range of professionals who work with people with learning disabilities and introduces theoretical concepts in an accessible way by using clinical vignettes to illustrate each point An introduction to theory and some time spent thinking about different life stages personal histories presenting problems and relationship issues will provide an invaluable introduction to the emotional worlds of people with learning disabilities from the Foreword by Sheila Hollins Professor of Psychiatry of Learning Disability

St George's Hospital Medical School University of London Counselling Adults with Learning Disabilities draws on a psychodynamic framework to bring together current ideas and thinking in an approachable and practical way. Through vivid clinical material and case examples the book creatively illustrates how complex theories can be translated into clinical practice. Common problems are tackled and addressed within a lifespan framework with attention given to key issues such as Bereavement Abuse Mental illness Challenging behaviour Sexual relationships Relationships with peers families and staff. Additionally given the increasing importance of evidence based practice the book concludes with a review of the literature in the area of learning disabilities and its efficacy. SALLY HODGES is a Consultant Clinical Psychologist at the Tavistock Clinic with their Learning Disabilities Service. Previously she worked for learning disabilities services in Redbridge and Plymouth.

Mapping Psychic Reality James Rose, 2018-05-08 This book is about how we can deepen our understanding of subjectivity through the use of the concept of triangulation. Fundamentally this book seeks to address the question of how we can be objective about subjectivity. If psychology as a scientific discipline is concerned with the study of human experience which is essentially subjective then we are faced with the problem of how to apply the scientific method as it is commonly understood. If experience is essentially unique to the experiencer then there seems to be a basic incompatibility with the scientific method. As currently practised this method searches for psychic phenomena which can be validly measured e.g. intelligence showing a range of individual differences. But this does not enable us to examine individual experience. An individual's experience seems to become impenetrable because generalisation across different individuals' experience entails the loss of individuality in the generalisation. The Oxford Handbook of Public Management Ewan Ferlie, Laurence E.

Lynn, Christopher Pollitt, 2007 The public sector continues to play a strategic role across the world and in the last thirty years there have been major shifts in approaches to its management. This text identifies the trends in public management and the effects these have had as well as providing a broad overview to each topic. **Crime and Regulation** Fiona

Haines, 2017-11-30 This volume brings together key articles in the burgeoning field of regulation. The collection is interdisciplinary in keeping with study of regulation itself yet the book arranges and explores these articles to make the bewildering array of issues and concepts that comprise the study of regulation comprehensible to a criminological audience. It will be of interest to all scholars and students of criminology and criminal justice as well as those concerned with reducing the crimes and harms of the powerful.
