## **Rethinking Disability Principles For Professional And Social Change:**

Rethinking Disability Elizabeth DePoy, Stephen French Gilson, 2004 This book provides a theoretical lens through which to view Disability Rather than taking a medical diagnostic stance which has been the traditional perspective the authors explain disability as category in which membership is based on of judgments about explanations for what people do experience and how they appear In Part I the authors discuss various aspects of the history and current trends which influence how disability is defined and addressed In Part II Explanatory Legitimacy EL theory is explained in detail and applied to an analysis of disability In Part III the EL theory is applied to rethinking disability now and in the future

**Branding and Designing Disability** Elizabeth DePoy, Stephen Gilson, 2014-06-27 Over the past fifty years design and branding have become omnipotent in the market and have made their way to other domains as well Given their potential to divide humans into categories and label their worth and value design and branding can wield immense but currently unharnessed powers of social change Groups designed as devalued can be undesigned redesigned and rebranded to seamlessly and equivalently participate in community work and civic life This innovative book argues that disability as a concept and category is created reified and segregated through current design and branding that begs for creative change Transcending models of disability that locate it either as an embodied medical condition or as a socially constructed entity this book challenges the very existence and usefulness of the category itself Proposing and illustrating creative and responsible design DePoy and Gilson include thinking and action strategies that are useful and potent for undesigning redesigning and rebranding to meet the full range of human needs and to enhance full participation in local through global communities Divided into two parts the first section presents a critical examination of disability as a designed and branded phenomenon exploring what exactly is being designed and branded and how The second part investigates the redesign of disability and provides principles for redesign and rebranding illustrated with examples from high tech to place based sustainable strategies The book provides a unique and contemporary framework for thinking about disability as well as providing relevant design and branding guidance to designers and engineers interested in embodiment issues **The Human Experience** Elizabeth DePoy, 2007 The Human Experience examines analyzes and applies theories of humans environments and human environment interaction to professional thinking and action The authors highlight tacit values and assumptions that underlie theory generation and application to professional practice and challenge the reader to answer two questions how do we know and what do we do with our knowledge Significant critical emphasis is devoted to diversity of humans and environments and the value perimeter in which professionals think and act Participation in Health and Welfare Services Arne H. Eide, Staffan Josephsson, Kjersti Vik, 2017-02-17 Today healthy ageing and active meaningful lives are core values and aims for international and national health policies Health services are challenged to ensure that the recipients of their services are active participants in their own care and beyond Participation allows patients to become less

dependent on healthcare providers increasing their control over their own treatment and health. Increasingly the idea of participation is shifting from participation in services to participation in mainstream society. This book examines the concept of participation as well as the different meanings it takes on in the context of health and welfare services. It asks how services can enable and stimulate participation outside of those services. The contributions in this volume particularly focus on participation as engagement in daily life and everyday life in order to develop the field of participation beyond the sphere of health and social care services. This book will appeal to researchers in the fields of health and social care, social services, occupational therapy and the sociology of health and illness. It will be of interest to practitioners of health and welfare services.

*Transgressive Devotion* Natalie Wigg-Stevenson, 2021-02-28. Academic theology is in need of a new genre. In *Transgressive Devotion* Natalie Wigg-Stevenson articulates a theological vision of that genre as performance art. She argues that theology done as performance art stops trying to describe who God is and starts trying to make God appear. Recognising that the act of studying theology or practicing ministry is always a performance where the boundaries between what we see, feel, experience and learn are not just blurred but potentially invisible, Wigg-Stevenson brings together ethnographic, theological fieldwork, historical and contemporary Christian theological traditions and performance artworks themselves. A daring vision of theology which will energise

anybody feeling boxed in by the discipline Transgressive Devotion blurs borders between orthodoxy heterodoxy and heresy to reveal how the very act of doing theology makes God and humanity vulnerable to each other This is theology which is a liturgy of Divine incantation In other words this is theology which is also prayer *Human Behavior Theory* Roberta R. *Understanding Child Maltreatment* Maria Scannapieco, Kelli Connell-Carrick, 2005-02-10. Child maltreatment professionals from all disciplines struggle to find better ways of understanding and treating the families and children affected by maltreatment. Since the mid-1960s, the battered child syndrome and recent high-profile abuse cases, a plethora of research and literature on child maltreatment has emerged, yet this is the first volume to offer a comprehensive, integrated analysis for understanding, assessing, and treating child maltreatment within the ecological framework in a developmental context. This framework systematically organizes and integrates the complex empirical literature in child maltreatment and development, including the often-overlooked period of adolescence. Viewing child maltreatment from an ecological perspective, this volume identifies the risk and protective factors correlated with abuse and neglect. The authors present a comprehensive assessment framework addressing the multiple developmental and environmental factors unique to each case. This framework fully considers risk and protective factors and their relationship to individuals, families, and environmental elements, presenting a much-needed perspective for today's child protective services workers. *Understanding Child Maltreatment* is the first of its kind. While most books broadly address the developmental consequences of maltreatment, this volume goes further by proposing assessment and intervention strategies based on a deep understanding of each stage of a child's development. Interventions center on the caregiver and the family, with particular attention to parenting skills and the challenges the child may experience within his or her developmental stage. Each chapter emphasizes empirically based interventions and includes a case illustration that guides readers in applying these concepts to their own practice. Providing a comprehensive, nuanced perspective on maltreatment, this book will be invaluable to students, researchers, and professionals.
