Issues in the Psychology of Women Maryka Biaggio, Michel Hersen, 2007-05-08 Over the past 15 years I MB have taught a graduate level course in Psychology of Women to students in two different professional psychology programs Because my students were at the doctoral level and often had some familiarity with the psychology of women these courses focused on bringing a feminist analysis of psychology and integrating a feminist analysis into one's scholarly work and professional activities Although I used several fine psychology of women textbooks during this time I found none that was specifically designed for graduate students Thus I always augmented the textbook with journal articles on specific aspects of the topic and these focused articles have typically been well received by the students The students whom I have encountered in these courses have often expressed a wish for a textbook that is designed for their needs I think what they are asking for is one that could serve as a foundation for their scholarly analysis of psychology as well as a springboard for thoughtful application of a feminist perspective to the profession of psychology Therefore Issues in the Psychology of Women has been designed to serve as a textbook for advanced undergraduate or graduate courses including Psychology of Women or Feminist Analysis of Psychology This book is the collective work of authors with special expertise in their chapter topic

The Subject of Liberty Nancy J. Hirschmann, 2009-01-10 This book reconsiders the dominant Western understandings of freedom through the lens of women's real life experiences of domestic violence welfare and Islamic veiling Nancy Hirschmann argues that the typical approach to freedom found in political philosophy severely reduces the concept's complexity which is more fully revealed by taking such

practical issues into account Hirschmann begins by arguing that the dominant Western understanding of freedom does not provide a conceptual vocabulary for accurately characterizing women's experiences Often free choice is assumed when women are in fact coerced as when a battered woman who stays with her abuser out of fear or economic necessity is said to make this choice because it must not be so bad and coercion is assumed when free choices are made such as when Westerners assume that all veiled women are oppressed even though many Islamic women view veiling as an important symbol of cultural identity Understanding the contexts in which choices arise and are made is central to understanding that freedom is socially constructed through systems of power such as patriarchy capitalism and race privilege Social norms practices and language set the conditions within which choices are made determine what options are available and shape our individual subjectivity desires and self understandings Attending to the ways in which contexts construct us as subjects of liberty Hirschmann argues provides a firmer empirical and theoretical footing for understanding what freedom means and entails politically intellectually and socially
