Blaner, 2012-12-06 In the future the decade of the 1990s will likely be viewed as a Golden Age for retinoid research There have been unprecedented research gains in the understanding of retinoid actions and physiology since the retinoid nuclear receptors were first identified and the importance of retinoic acid in develop mental processes was first broadly recognized in the late 1980s Between then and now our knowledge of retinoid action has evolved from one of a near complete lack of understanding of how retinoids act within cells to one of sophisticated understanding of the molecular processes through which retinoids modulate transcription In this volume we have tried to provide a comprehensive update of the present understanding of retinoid actions with an emphasis on re cent advances The initial chapters of the volume or Section A focus on the physicochemical properties and metabolism of naturally occurring retinoids N OY provides an uncommonly encountered view of retinoid effects from the perspective of the physiochemical properties of retinoids V AKIANI and BUCK lend a perspective on the biological occurrence and actions of retro and anhydro retinoids Section B considers both the retinoid nuclear receptors and their mechanisms of action as well as synthetic retinoids that have been used exper imentally to provide mechanistic insights into receptor actions and have potential therapeutic use for treating disease PIEDRAFITA and PFAHL provide a comprehensive review of retinoid nuclear receptor biochemistry and molecular biology **Retinoids, Differentiation and Disease - Symposium** CIBA Foundation Symposium, 1986-04-17 **Cancer Treatment Reports** , 1987 **Vitamin A in Health and Disease** Rune Blomhoff, 1994-02-01 This book is intended as a source of information for the many scientists who now enter the growing research field of vitamin A in health and disease reviewing the epidemiological aspects related to vitamin A *JNCI, Journal of the National Cancer Institute* National Cancer Institute (U.S.), 1984 *Vitamin A and Cancer Prevention Conference* United States-Japan Cooperative Medical Science Program.
