Japan has long been regarded as an exemplar of a stakeholder model of corporate governance where the interests of employees, customers, suppliers, and the wider community, in addition to shareholders, are taken into account in decision making. However, Japan's traditional stakeholder-focused corporate governance model is facing new pressures as the economy has undergone changes including increasing foreign share ownership, calls for more transparency, and a shift towards UK and US style corporate governance. This book provides an in-depth analysis of Japan's changes and challenges in balancing the interests of shareholders and stakeholders in corporate governance. The first section of the book provides a comprehensive overview of the history of corporate governance in Japan and its evolution. It includes information on the key regulatory and legal frameworks including the Companies Act and the Financial Instruments and Exchange Law. The second section delves into the implementation of the Abenomics corporate governance reforms and their impact on Japan's corporate landscape. It also includes information on the codes of Stewardship 2014 and Corporate Governance 2015. The final part provides an in-depth analysis of the challenges faced by Japanese companies in terms of corporate governance and the prospects of further corporate governance reforms in Japan. It discusses the convergence trend of Japan's traditional bank-based stakeholder-orientated corporate governance model and a shareholder value-driven corporate governance system in the UK and the US. This book is aimed at executives, policymakers, business leaders, academics, and anyone interested in the future of business and corporate governance. It will be of particular interest to those interested in learning about the unique approach to stakeholder capitalism and corporate governance that has been developed in Japan and how this approach is shaping the future of business worldwide. *Japan's Economic Challenge* United States. Congress. Joint Economic Committee, 1990.

The Japanese Economic and Social System Claude Lonien,2003 The Japanese economy is currently at a crossroads and the embarrassing situation the country faces today is even worse than the Meiji restoration of 1868 the defeat after World War II in 1945 and the yen appreciation after the Plaza Agreements of 1985 Indeed the traditional Japanese model is doomed to failure mainly due to economic and industrial structures that are inappropriate towards increasing globalization liberalization and deregulation However Japanese style industrial capitalism is in this work compared to the economic and social models of other developed countries and this enables us to point out the path the Japanese economy may take in the 21st century in order to survive
