## **Retiring The State The Politics Of Pension Privatization In Latin America And Beyond:**

**Retiring the State** Raúl L. Madrid, 2003 In the 1990s numerous Latin American nations privatized their public pension systems These reforms dramatically transformed the way these countries provide retirement income and they provoked widespread protests from workers and pensioners alike Retiring the State represents the first book length study of the origins of this surprising trend Drawing on original field research including interviews with key policymakers Madrid argues that the recent reforms were driven not by social policy but by macroeconomic concerns Countries facing growing financial pressures chose to privatize their pension systems largely to boost their domestic savings rates and reduce public pension spending in the long run The author explores his arguments through detailed case studies of pension reform in Argentina Brazil and Mexico a survey of social security privatization efforts in East Europe and Latin America as a whole and a quantitative analysis of pension privatization worldwide

**Crafting Policies to End Poverty in Latin America** Ana Lorena De La O, 2015-03-26 This book provides a theory and evidence to explain the initial decision of governments to adopt a conditional cash transfer program the most prominent type of anti poverty program currently in operation in Latin America and whether such programs are insulated from political manipulations or not Ana Lorena De La O shows that whether presidents limit their own discretion or not has consequences for the survival of policies their manipulation and how effective they are in improving the lives of the poor This book is the first of its kind to present evidence from all Latin American CCTs

**Privatizing Pensions** Mitchell A. Orenstein, 2008-08-11 To what extent do international organizations global policy networks and transnational policy entrepreneurs influence domestic policy makers Have we entered a new phase of globalization that unbeknownst to most citizens shapes policies that used to be the sole domain of domestic politics Privatizing Pensions reveals how international institutions such as the World Bank USAID and other transnational policy actors have played a seminal role in the development diffusion and implementation of new pension reforms that are transforming the postwar social contract in more than thirty countries worldwide including the United States Mitchell Orenstein shows how transnational actors have driven change in a policy area once thought to be beyond reform in many countries and how they have done so by deploying their unique resources and legitimacy to promote new ideas recruit disciples worldwide and provide a broad range of technical assistance to government reformers over the long term He demonstrates that while domestic decision makers may retain veto power over these reforms which replace traditional social security with individual pension savings accounts transnational policy makers play the role of proposal actors shaping the information preferences and resources of their domestic clients Privatizing Pensions argues that even the most quintessentially domestic areas of policy have been thoroughly globalized and that these international influences must be better understood

**When Strangers Become Family** Ronald Angel, Verónica Montes-de-Oca Zavala, 2021-09-30 As the 21st Century unfolds the traditional welfare state that evolved during the 20th Century faces serious threats to the solidarity

that social programs were meant to strengthen The rise of populist and nationalist parties reflects the decline of a sense of belonging and inclusiveness that mass education and economic progress were meant to foster as traditional politics and parties are rejected by working and middle class individuals who were previously their staunchest supporters Increasingly these groups reject the growing gaps in income power and privilege that they perceive between themselves and highly educated and cosmopolitan business academic and political elites When Strangers Become Family examines the potential role of civil society organizations in guaranteeing the rights and addressing the needs of vulnerable groups paying particular attention to their role in advocacy for and service delivery to older people The book includes a discussion of the origins and functions of this sector that focuses on the relationship between the state and non governmental organizations as well as a close examination of Mexico a middle income nation with a rapidly aging population and limited state welfare for older people The data reveals important aspects of the relationship among government actors civil society organizations and political parties Ronald Angel and Ver nica Montes de Oca Zavala ask the fundamental question about the extent to which civil society organizations represent a potential mechanism whereby vulnerable individuals can join together to further their own interests and exercise their individual and group autonomy

**The Resurgence of the Latin American Left** Steven Levitsky, Kenneth M. Roberts, 2011-09-01 Latin America experienced an unprecedented wave of left leaning governments between 1998 and 2010 This volume examines the causes of this leftward turn and the consequences it carries for the region in the twenty first century The Resurgence of the Latin American Left asks three central questions Why have left wing parties and candidates flourished in Latin America How have these leftist parties governed particularly in terms of social and economic policy What effects has the rise of the Left had on democracy and development in the region The book addresses these questions through two sections The first looks at several major themes regarding the contemporary Latin American Left including whether Latin American public opinion actually shifted leftward in the 2000s why the Left won in some countries but not in others and how the left turn has affected market economies social welfare popular participation in politics and citizenship rights The second section examines social and economic policy and regime trajectories in eight cases those of leftist governments in Argentina Bolivia Brazil Chile Ecuador Uruguay and Venezuela as well as that of a historically populist party that governed on the right in Peru Featuring a new typology of Left parties in Latin America an original framework for identifying and categorizing variation among these governments and contributions from prominent and influential scholars of Latin American politics this historical institutional approach to understanding the region s left turn and variation within it is the most comprehensive explanation to date on the topic

**Development, Democracy, and Welfare States** Stephan Haggard, Robert R. Kaufman, 2020-06-16 This is the first book to compare the distinctive welfare states of Latin America East Asia and Eastern Europe Stephan Haggard and Robert Kaufman trace the historical origins of social policy in these regions to crucial political changes in the mid twentieth century and show how the legacies of these early

choices are influencing welfare reform following democratization and globalization After World War II communist regimes in Eastern Europe adopted wide ranging socialist entitlements while conservative dictatorships in East Asia sharply limited social security but invested in education In Latin America where welfare systems were instituted earlier unequal social security systems favored formal sector workers and the middle class Haggard and Kaufman compare the different welfare paths of the countries in these regions following democratization and the move toward more open economies Although these transformations generated pressure to reform existing welfare systems economic performance and welfare legacies exerted a more profound influence The authors show how exclusionary welfare systems and economic crisis in Latin America created incentives to adopt liberal social policy reforms while social entitlements from the communist era limited the scope of liberal reforms in the new democracies of Eastern Europe In East Asia high growth and permissive fiscal conditions provided opportunities to broaden social entitlements in the new democracies This book highlights the importance of placing the contemporary effects of democratization and globalization into a broader historical context     Pension Reform Robert Holzmann,Edward E. Palmer,2006 This book presents 25 state of the art papers on the conceptual foundations and issues surrounding Non financial or Notional Defined Contribution NDC country implementation of NDC Italy Latvia Poland and Sweden and case studies for countries where NDC is figured in the reform debate This book is intended to be a handbook for academics and policy makers who want to become informed about what NDC is and to learn about the pros and cons of this attractive reform proposal     Understanding Global Social Policy Nicola Yeates,2014-03-01 This book written by an international team of leading social policy analysts is the first student aimed textbook that comprehensively engages with the field of global social policy     Radical Inequalities Nara Dillon,2020-05-11 The Chinese Communist welfare state was established with the goal of eradicating income inequality But paradoxically it actually widened the income gap undermining one of the most important objectives of Mao Zedong s revolution Nara Dillon traces the origins of the Chinese welfare state from the 1940s through the 1960s when such inequalities emerged and were institutionalized to uncover the reasons why the state failed to achieve this goal Using newly available archival sources Dillon focuses on the contradictory role played by labor in the development of the Chinese welfare state At first the mobilization of labor helped found a welfare state but soon labor s privileges turned into obstacles to the expansion of welfare to cover more of the poor Under the tight economic constraints of the time small temporary differences evolved into large entrenched inequalities Placing these developments in the context of the globalization of the welfare state Dillon focuses on the mismatch between welfare policies originally designed for European economies and the very different conditions found in revolutionary China Because most developing countries faced similar constraints the Chinese case provides insight into the development of narrow unequal welfare states across much of the developing world in the postwar period     **The Oxford Handbook of Transformations of the State** Stephan Leibfried,Evelyne Huber,Matthew Lange,Jonah D. Levy,Frank Nullmeier,John D. Stephens,2015 This Handbook

offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges

*Democracy and the Left* Evelyne Huber, John D. Stephens, 2012-09-01 Although inequality in Latin America ranks among the worst in the world it has notably declined over the last decade offset by improvements in health care and education enhanced programs for social assistance and increases in the minimum wage In *Democracy and the Left* Evelyne Huber and John D Stephens argue that the resurgence of democracy in Latin America is key to this change In addition to directly affecting public policy democratic institutions enable left leaning political parties to emerge significantly influencing the allocation of social spending on poverty and inequality But while democracy is an important determinant of redistributive change it is by no means the only factor Drawing on a wealth of data Huber and Stephens present quantitative analyses of eighteen countries and comparative historical analyses of the five most advanced social policy regimes in Latin America showing how international power structures have influenced the direction of their social policy They augment these analyses by comparing them to the development of social policy in democratic Portugal and Spain The most ambitious examination of the development of social policy in Latin America to date *Democracy and the Left* shows that inequality is far from intractable a finding with crucial policy implications worldwide

Angel, Jacqueline L. Angel, 2017-07-06 Almost all families will at some time have to make difficult decisions concerning aging family members involving institutionalization moving from medical interventions to palliative care and even physician assisted death Yet the historical transition from traditional to post traditional society means that these decisions are no longer determined by strict rules and norms and the growing role of the welfare state has been accompanied by changes in the nature of family and social solidarity Advances in medical technology and greatly expanded life spans further complicate the decision making process Family Intergenerational Solidarity and Post Traditional Society examines a range of difficult issues that families commonly face during the family life course within these contexts The book explores both practical and ethical questions regarding filial responsibility and the roles of the state and adult children in providing financial and instrumental support to dependent parents The book follows the experiences and deliberations of a fictional family through a series of vignettes in which its members must make difficult decisions about the treatment of a seriously ill parent Advanced undergraduate and graduate students in family studies gerontology aging sociology social work health and social care and nursing will find this essential reading     The Politics of Non-state Social Welfare Melani Cammett, Lauren M. MacLean, 2014-06-25 Across the world welfare states are under challenge or were never developed extensively in the first place while non state actors increasingly provide public goods and basic welfare In many parts of the Middle East and South Asia sectarian organizations and political parties supply basic services to ordinary people more extensively and effectively than governments In sub Saharan Africa families struggle to pay hospital fees and nongovernmental organizations NGOs launch welfare programs as states cut subsidies and social programs Likewise in parts of Latin America international and domestic NGOs and increasingly private firms are key suppliers of social welfare in both urban and rural communities Even in the United States where the welfare state is far more developed secular NGOs and faith based organizations are critical components of social safety nets Despite official entitlements to public

welfare citizens in Russia face increasing out of pocket expenses as they are effectively compelled to seek social services through the private market In *The Politics of Non State Social Welfare* a multidisciplinary group of contributors use survey data analysis spatial analysis in depth interviews and ethnographic and archival research to explore the fundamental transformation of the relationship between states and citizens The book highlights the political consequences of the non state provision of social welfare including the ramifications for equitable and sustainable access to social services accountability for citizens and state capacity The authors do not assume that non state providers will surpass the performance of weak inefficient or sometimes corrupt states but instead offer a systematic analysis of a wide spectrum of non state actors in a variety of contexts around the world including sectarian political parties faith based organizations community based organizations family networks informal brokers and private firms

**Political Competition, Partisanship, and Policy Making in Latin American Public Utilities** Maria Victoria Murillo, 2009-08-24 This book studies policymaking in the Latin American electricity and telecommunication sectors Murillo s analysis of the Latin American electricity and telecommunications sectors shows that different degrees of electoral competition and the partisan composition of the government were crucial in resolving policymakers tension between the interests of voters and the economic incentives generated by international financial markets and private corporations in the context of capital scarcity Electoral competition by credible challengers dissuaded politicians from adopting policies deemed necessary to attract capital inflows When electoral competition was low financial pressures prevailed but the partisan orientation of reformers shaped the regulatory design of market friendly reforms In the post reform period moreover electoral competition and policymakers partisanship shaped regulatory redistribution between residential consumers large users and privatized providers
