

The background of the cover is a still life painting. It features a large, light blue ceramic pitcher with a curved handle, positioned in the upper right. To its left are two ripe red tomatoes. The objects are resting on a dark, textured wooden surface, possibly a table or a shelf. The lighting is soft, creating gentle shadows and highlights on the ceramic and the tomatoes. The overall color palette is dominated by the blue of the pitcher and the red of the tomatoes, set against the dark wood and a muted greenish-blue background.

## **Simple Days A Journal On What Really Matters:**

**Simple Days** Marlene A. Schiwy, 2002 How much is enough What matters most Is it possible to live simply while earning a living How do I balance family self and career These are some of the questions many people are contemplating today In *Simple Days* Marlene Schiwy shares her journey toward living a simpler life in a journal that she kept over the course of a year looking for answers to these questions She shares her reflections on paying attention to what matters most and looking more closely at where our lives are heading Unique among books on simple living *Simple Days* is not a how to manual nor a list of shortcuts to a simpler life Rather it helps illuminate the path to simplicity not by giving all purpose answers but by sharing Marlene's believable experiences and encouraging readers to ponder the questions in their own lives

**Topologies of the Flesh** Steven M. Rosen, 2006 The concept of flesh in philosophical terms derives from the writings of Maurice Merleau-Ponty This was the word he used to name the concrete realm of sentient bodies and life processes that has been eclipsed by the abstractions of science technology and modern culture Topology to conventional understanding is the branch of mathematics that concerns itself with the properties of geometric figures that stay the same when the figures are stretched or deformed *Topologies of the Flesh* is an original blend of continental thought and mathematical imagination Steven M. Rosen opens up a new area of philosophical inquiry topological phenomenology Through his unique application of qualitative mathematics he extends the approaches of Merleau-Ponty and Heidegger so as to offer a detailed exploration of previously uncharted dimensions of human experience and the natural world Rosen's unprecedented marriage of topology and phenomenology is motivated by the desire to help overcome the pervasive dualism of contemporary philosophy and Western culture at large To carry this to completion he must address his own dualistic stance as author Challenging the author's traditional posture of detachment and anonymity Rosen makes his presence vividly felt in his final chapter and his philosophical analysis is transformed into a living reality
