Reconceiving Writing, Rethinking Writing Instruction Joseph Petraglia, 2013-11-05 To a degree unknown in practically any other discipline the pedagogical space afforded composition is the institutional engine that makes possible all other theoretical and research efforts in the field of rhetoric and writing But composition has recently come under attack from many within the field as fundamentally misguided Some of these critics have been labelled New Abolitionists for their insistence that compulsory first year writing should be abandoned Not limiting itself to first year writing courses this book extends and modifies calls for abolition by taking a closer look at current theoretical and empirical understandings of what contributors call general writing skills instruction GWSI the curriculum which an overwhelming majority of writing instructors is paid to teach that practically every composition textbook is written to support and the instruction for which English departments are given resources to deliver The vulnerability of GWSI is hardly a secret among writing professionals and its intellectual fragility has been felt for years and manifested in several ways in persistently low status of composition as a study both within and outside of English departments in professional journal articles and conference presentations that are growing both in theoretical sophistication and irrelevance to the composition classroom and in the rhetoric and writing field s ever increasing attention to

nontraditional sites of writing behavior But to date there has been relatively little concerted discussion within the writing field that focuses specifically on the fundamentally awkward relationship of writing theory and writing instruction This volume is the first to explicitly focus on the gap in the theory and practice that has emerged as a result of the field's growing professionalization The essays anthologized offer critiques of GWSI in light of the discipline's growing understanding of the contexts for writing and their rhetorical nature Writing from a wide range of cognitivist critical theoretical historical linguistic and philosophical perspectives contributors call into serious question basic tenets of contemporary writing instruction and provide a forum for articulating a sort of zeitgeist that seems to permeate many writing conferences but which has until recently not found a voice or a name

The Future of English Teaching Worldwide Andrew Goodwyn, Cal Durrant, Wayne Sawyer, Lisa Scherff, Don Zancanella, 2018-10-31 The seminal Dartmouth Conference 1966 remains a remarkably influential moment in the history of English teaching Bringing together leading voices in contemporary English education this book celebrates the Conference and its legacy drawing attention to what it has achieved and the questions it has raised Encompassing a multitude of reflections on the Dartmouth Conference *The Future of English Teaching Worldwide* provides fresh and revisionist readings of the meeting and its leading figures Chapters showcase innovative and exciting new insights for English scholars and address both theoretical and practical elements of teaching English in a variety of settings and countries Covering topics including the place of new media in English curricula the role of the canon poetry and grammar the text is divided into three accessible parts Historical perspectives Dartmouth today why it still matters Reflections but for the future This powerful collection will be of value to researchers postgraduate students literature scholars practitioners teacher educators trainee and in service teachers as well as other parties involved in the teaching and study of English
