Publisher's description **The Changing Shape of Nursing Practice** Davina Allen, 2002-01-04 Bringing together sociological theories and nursing practice this text develops a dynamic conceptualisation of the nursing role which is rooted in the work setting It looks at the factors which have shaped nursing work in the past and those which are likely to shape it in the future Nurses work is changing in two respects the place nursing occupies in the health care division of labour and the routine shifting of work boundaries that nurses experience in their daily work Drawing on her detailed observations of the

reality of nursing work in a district general hospital Davina Allen explores these linked themes focussing on five key work boundaries nurse doctor nurse manager nurse support worker nurse patient nurse nurse The text provides new insight into many of the tensions and dilemmas nurses routinely face and the processes and constraints through which their work is fashioned It offers a new way of thinking about the nursing role which is particularly relevant at a time when the scope of nursing practice is expanding and when the integrated approach to health and social care is seen as the key to provision and improved services *Practising Social Work Sociologically* Priscilla Dunk-West, Fiona Verity, 2018-02-13 This timely and much needed text book presents an innovative theoretically based approach that helps students practitioners and researchers alike orientate their view and sensibilities in a rapidly evolving modern world Traditional social work approaches are often ill equipped to take into account the emerging social change which has resulted from technological change globalisation and mobilities as well as environmental change By bringing sociological social work perspectives to contemporary practice it draws on concepts from a range of disciplines in recognition that we are collective thinkers and actors and that our ideas are shaped by what we read and build upon Whether taking a social work theory module or preparing for placement this sociological perspective provides a crucial foundation for practice and puts the social back in to social work
