including Schelling Hegel Friedrich Schlegel Herder and Novalis transformed the conceptual framework within which the nature of religion could be considered Furthermore in doing so they significantly shaped the philosophical perspectives from within which later thinkers such as Feuerbach Kierkegaard Wagner and Nietzsche could re pose the question of religion This volume explores the spaces opened during this extended period of post Kantian thinking for a reconsideration of the place of religion within the project of human self fashioning

Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it as today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world
