Y Udaya Chandar (Retd.),2017-04-24 The Modern Weaponry of the World s Armed Forces is a treatise of military

weaponry It depicts about forty present day weapon systems possessed by various nations describing three to four weapons of each category with images specifications origin development and design briefly The weapon systems presented are almost all from the twenty first century or the weapons presently under development Only a very few officers in the three services know the finer distinctions between say cruise missile and ballistic missile fourth generation jet fighter and fifth generation jet fighter and howitzer and a field gun All such nuances are explained clearly The beginning explains the history of military weapons briefly and ends with information on the missile shield erected by most countries including India The missile shield destroys the hostile incoming aircraft or missile automatically The missile shield presented is real existson the ground today and not fictitious The militaries win the war with the help of the man who stands erect in the face of the enemy fire and the weapon that is in his hands All the students of military science must read this invaluable book about the gun in the hands of a soldier what exactly it is and how much it matters

Variants of Evolutionary Algorithms for Real-World Applications

Raymond Chiong, Thomas Weise, Zbigniew Michalewicz, 2011-11-13 Evolutionary Algorithms EAs are population based stochastic search algorithms that mimic natural evolution Due to their ability to find excellent solutions for conventionally hard and dynamic problems within acceptable time EAs have attracted interest from many researchers and practitioners in recent years This book Variants of Evolutionary Algorithms for Real World Applications aims to promote the practitioner's view on EAs by providing a comprehensive discussion of how EAs can be adapted to the requirements of various applications in the real world domains It comprises 14 chapters including an introductory chapter re visiting the fundamental question of what an EA is and other chapters addressing a range of real world problems such as production process planning inventory system and supply chain network optimisation task based jobs assignment planning for CNC based work piece construction mechanical ship design tasks that involve runtime intense simulations data mining for the prediction of soil properties automated tissue classification for MRI images and database query optimisation among others These chapters demonstrate how different types of problems can be successfully solved using variants of EAs and how the solution approaches are constructed in a way that can be understood and reproduced with little prior knowledge on optimisation
