Structure, Consciousness, and History Richard Harvey Brown, Stanford M. Lyman, 1978-08-31 First published in 1978 this volume is addressed to the crisis prevailing in the social and cultural sciences The authors explore the conflict between positivism and romanticism between hard and soft sociological research methods and between objectivity and subjectivity conflicts that were particularly acute in sociology at the time of publication All of the essays adopt the approach of symbolic realism or cognitive aesthetics to overcome the dualism in conventional sociological theory This strategy of symbolic realism is a philosophical amalgam forged from findings in existential phenomenology ordinary language philosophy and pragmatism It establishes a legitimate basis for the application of aesthetic criteria to truth seeking in the social sciences The synthesis emergent from these essays suggests a paradigm with broad implications for all the human studies Students of culture will find this volume a provocative point of departure for their own investigations

Contemporary Sociological Theory Classical and Contemporary Sociological Theory and Sociological Theory **Anthony**

Giddens and Modern Social Theory Kenneth Tucker,1998-09-24 Anthony Giddens is widely recognized as one of the most important sociologists of the post war period This is the first full length work to examine Giddens social theory It guides the reader through Giddens early attempt to overcome the duality of structure and agency He saw this duality as a major failing of social theories of modernity His attempt to resolve the problem can be regarded as the key to the development of his landmark structuration theory The book is the most complete and thorough assessment of Giddens work currently available It incorporates insights from many different perspectives into his theory of structuration his work on the formation of cultural identities and the fate of the nation state This far reaching work also touches on issues such as the transformation of modern intimacy and sexuality and the fate of politics in late modern society **Contemporary Sociological Theory** Jonathan H.

Turner,2012-09-20 Written by award winning scholar Jonathan Turner Contemporary Sociological Theory covers the range of diversity of theory in nine theoretical traditions and variants of theoretical approaches in these traditions The result is a comprehensive review of present day theorizing in sociology covering functional evolutionary ecological conflict interactionist exchange structuralist cultural and critical theories and the major proponents of these theories Moreover for each theoretical tradition its origins are examined in a separate chapter with an eye to how classical theorists influenced the work of key contemporary scholars This book will serve as a valuable resource for those readers seeking in depth and comprehensive coverage of contemporary traditions in their historical contexts Unlike many texts coverage is comprehensive and deep The theories and their origins are examined in detail so that readers can fully understand the origins and present profile of theories in present day sociology Unlike many texts that skim over theories on the surface this book seeks to unlock for the reader their underlying structure of each theory The book is written in a modular format so that theories and traditions can be examined in any order and in many diverse combinations If desired only the contemporary theories can be read without attention to their historical contexts or the reverse is true if readers want to understand the historical origins of a particular theoretical tradition Since Jonathan Turner is an active theorist in his own right he brings to the book an appreciation of how theories are created as an insider rather than as only a commentator on theory As such he is able to

bring out the underlying assumptions structure and form of a theory in new and interesting ways for casual readers and scholars alike *Agency and Structure (RLE Social Theory)* Piotr Sztopka, 2014-08-21 A striking feature of the human condition is its dual contradictory inherently split character on the one hand autonomy and freedom on the other constraint and dependence on social structure This volume addresses this central problem of the linkage between human action and social structure in sociological and social science theory Contributions cover several different approaches to the agency structure problematic and represent the work of a number of leading international sociologists Their efforts point to a reorientation of social theory both on philosophical and methodological levels
