Modern Text Book Of Astrology:

The Modern Text-book of Astrology Margaret Ethelwyn Hone, 1978 It was a long time ago and few alive now remember what life was like in England in the years after World War II Yes the Luftwaffe and Vengeance weapons had made a fine mess in the south of the country but during the war years the Yanks were there millions of them seducing the womenfolk brawling in pubs and most importantly spending their pay with local shopkeepers May 1945 the war ended and all the Americans left Most went home but a sizeable contingent set up shop in Germany where to the best of their ability given the local ruins they carried on as before seducing the womenfolk brawling in pubs and spending their pay with the surviving shopkeepers The Americans were joined by contingents of English French and Soviet troops As a result the surprising fact long forgotten is that after the war conditions in England were even worse than they were in post Third Reich Germany Some in Britain rued winning the war as deprivation became their fate In London after the war books were so scarce that used vendors had long lists of people waiting for the few books that turned up For schools in London which taught astrology the situation was impossible Responding to the post WWII book shortage Margaret Hone published this ultimate Astrology Text Book She was born in Birmingham England on October 2 1892 at 2 13 am Her ascendant was 27 Leo her Sun was 9 Libra her Moon was 13 Aquarius Her midheaven was 15 Taurus Of Ms Hone James Holden wrote English astrologer educator and author She was a professional astrologer and private teacher for many years and later was Principal and Director of Studies of the Faculty of Astrological Studies 1954 1969 and Vice President of the Astrological Lodge of London Mrs Hone was an advocate of the Equal House system of house division She is best known in the U S for her two instruction manuals This book is dedicated to Charles E O Carter 1887 1968 Carter succeeded Alan Leo as head of the Astrological Lodge 1920 1952 and was First Principal of the Faculty of Astrological Studies which he helped found in 1948 Hone succeeded Carter at FAS She passed away on October 14 1969 In his Preface while quick to praise Hone a personal friend Charles Carter also pointed out that this book s high price was justified that padding has been rigorously excluded He goes on to praise the workmanship the carefully worded definitions as well as the fact that the book was complete and entire in itself Save for ephemeris and tables of houses this one book would suffice beginning as well as advanced students for some years In addition Hone also includes one of the earliest modern histories of astrology short biographies of leading astrologers past and present astrology and public opinion daily horoscopes in the newspapers were a recent innovation On a more practical side Hone gives a thorough analysis of the principal house systems of the day Equal Campanus Regiomontanus Placidus and even mentions C G Jung s recently developed Depth Psychology The Modern Text-book of Astrology Margaret E. World War to Covid-19 William Burns, 2023-10-11 This book gathers contributions on the topic of astrology in the West during the twentieth and twenty first centuries from 1914 to 2022. It is the first collection exclusively devoted to a period that has been mostly neglected by historians of astrology who have mostly devoted themselves to the ancient medieval and early modern periods. Uninterested in vindicating or debunking astrology, contributors consider its cultural impact, its relation to historical events and the ways in which it has changed in the last century. The broad range of subjects on modern Europe and the US include the relation of astrology with indigenous thought, interwar Polish astrology and the relation of American astrologers to COVID. A bibliography of studies of modern astrology on a global basis is also included. This collection is a thoughtful contribution to the history of astrology and the sociology of belief as well as carrying significant implications for twentieth and twenty first century history broadly.

Astrology and Popular Religion in the Modern West Nicholas Campion, 2016-04-15 This book explores an area of contemporary religion, spirituality and popular culture which has not so far been investigated in depth: the phenomenon of astrology in the modern west. Locating modern astrology historically and sociologically in its religious, New Age and millenarian contexts, Nicholas Campion considers astrology's relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of New Age ideology. This book challenges the notion that astrology is either marginal or a feature of postmodernism. Concluding that astrology is more popular than the usual figures suggest, Campion argues that modern astrology is largely shaped by New Age thought influenced by the European Millenarian tradition that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west.

Modern Astrology, 1928 **What Do Astrologers Believe?** Nicholas Campion, 2014-11-06 And God said: Let there be lights in the firmament of the heavens to separate the day from the night, and let them be for signs and for seasons and for days and years. Genesis 1:14. Astrology: the notion that the stars and planets hold significance for human life exists in most cultures. It is evident in Stone Age lunar calendars dating back to 30,000 BCE. Today 90 per cent of Indians consult astrologers about their forthcoming marriages while over 50 per cent of people in the West read their horoscopes in newspapers or magazines. How has this pre-Christian, pre-scientific view of the cosmos survived to the present day and what is its enduring appeal? Astrology's techniques and philosophical foundations are complex and there is no single tradition. Astrology may be seen as science, art, religion, craft or superstition. For most adherents it is either a path to self-understanding or an organizing principle that helps give purpose to an otherwise meaningless world. Nicholas Campion explores astrology's past and present, its claims and appeal, and explains what astrologers really believe.
