Modern Urban Landscape 1880 To The Present:

The Modern Urban Landscape E. C. Relph, 2016-09-15 Why do the cities of the late twentieth century look as they do What values does their appearance express and enfold For E C Relph the landscape of late twentieth century cities must be envisioned as a total environment not just streets and buildings but billboards and parking meters as well The Modern Urban Landscape traces the developments since 1880 in architecture technology planning and society that have formed the visual context of daily life Each of these shaping influences is often viewed in isolation but Relph surveys the ways in which they have operated independently to create what we see when we walk down a street shop in a mall or stare through a windshield on an expressway Two sets of ideas and fashions Relph argues have had an especially important impact on urban landscapes in the twentieth century An internationalism made possible by new building technologies and design ideologies has replaced regional style and custom as the dominant feature of city appearance while a firm belief in the merits of self consciousness has imposed logical analysis and technical manipulation on such commonplace objects as curbstones and park benches As a result writes Relph the modern urban landscape is both rationalized and artificial which is another way of saying that it is intensely human This edition features a new preface in which the author identifies the major visible changes in urban landscapes over the past thirty years including destination architecture coffee shops condominium towers revitalized downtown streets and the creation of edge cities He also considers the less visible yet pervasive impacts associated with the emergence of electronic technologies and sustainable development

The Modern Urban Landscape E. C. Relph, 1987-08 Why do the cities of the late twentieth century look as they do What values do their appearance express and enfold Their sheer scale and the durability of their materials assure that our cities will inform future generations about our era in the same way that gothic cathedrals and medieval squares tell us something of the Middle Ages In the meantime our urban landscapes can tell us much about ourselves For E C Relph the urban landscape must be envisioned as a total environment not just streets and buildings but billboards and parking meters as well The Modern Urban Landscape traces the developments since 1880 in architecture technology planning and society that have formed the visual context of daily life Each of these shaping influences is often viewed in isolation but Relph surveys the ways in which they have operated independently to create what we see when we walk down a street shop in a mall or stare through a windshield on an expressway Two sets of ideas and fashions Relph argues have had an especially important impact on urban landscapes in the twentieth century An internationalism made possible by new building technologies and more rapid communications has replaced regional style and custom as the dominant feature of city appearance while a firm belief in the merits of self consciousness has imposed logical analysis and technical manipulation on such commonplace objects as curbstones and park benches As a result writes Relph the modern urban landscape is both rationalized and artificial which is another way of saying that it is intensely human

The Oxford Handbook of the Archaeology of the Contemporary World Paul Graves-Brown,Rodney Harrison,Angela Piccini,2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts

Urban Memory in City Transitions Ali Cheshmehzangi,2021-04-02 As a continuation of *Identity of Cities and City of Identities* this book covers the arguments around the memory experience cognition nexus concerning palimpsests and urban places As cities experience transitional phases of growth development decline and decay the author urges considering the notion of urban memory in place making strategies and design decision making processes These explorations would add value to primary fields of architecture architectural history cognitive science human geography and urbanism Divided into eight chapters this book puts together a comprehensive knowledge of urban memory in city transitions By studying urban memory the author delves into conceptions of mental mapping knowledge of environments cognition of places and the perceptual dimension of urbanism Undoubtedly urban memory plays a significant part in the future movements of humanistic urbanism Given the significances of scale pace and mode of city transitions globally we should remember who are the ultimate users of those living environments Therefore in this book the author debates two contradictions of memory of place vs place of memory and significance of place vs place of significance Each of these is believed to be a paradox of its own indicating places are significant through the systematic networks of cities memories are meaningful through the neural information processing and place memories are the essence of urban identities The book s ultimate goal is to demonstrate the effectiveness of the space time frame of place in making memorable places Through the comprehensive explorations of many global examples we can evaluate the significance of place in mind more carefully This is narrated based on the recognition of nostalgia in cities socio temporal qualities in places and the network of processes in our minds In return the aim is to provide new knowledge to make memorable cities enhance social experiences and capture and value the significance of place in mind

The Digital City Germaine R. Halegoua,2020-01-21 Shows how digital media connects

people to their lived environments Every day millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit They may share texts or images of themselves and these places en route or after their journey is complete We don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place Critics have argued that digital media alienates users from space and place but this book argues that the exact opposite is true that we habitually use digital technologies to re-embed ourselves within urban environments The Digital City advocates for the need to rethink our everyday interactions with digital infrastructures navigation technologies and social media as we move through the world Drawing on five case studies from global and mid-sized cities to illustrate the concept of re-placing Germaine R Halegoua shows how different populations employ urban broadband networks social and locative media platforms digital navigation smart cities and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments Through timely narratives of everyday urban life Halegoua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media

Everyday Soviet Utopias Anna Alekseyeva, 2019-02-06 This book explores how intellectuals of the later Soviet decades the 1970s and 1980s sought to bring about the socialist utopian world It argues that the last two decades of the Soviet Union were not characterised by state withdrawal and malaise as some scholars have argued attempts to envisage and enact Utopia remained as imaginative and creative as ever The book considers what these utopian ideas looked like through housing schemes layouts of districts and cities design of objects and interiors and proposals for the organisation of family and social life Relating developments in the Soviet Union to evolving social theory and postmodernism more broadly the book draws transnational parallels between the intellectual history of east and west in the late twentieth century **Imperial**

The Changing American Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of

date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
