Modern Science Modern Thought:

Modern Science and Modern Thought, by S. Laing ... Samuel Laing (le jeune.), 1885 **Modern Science and Modern Thought** Samuel Laing, 1895 Science, Art and Nature in Medieval and Modern Thought A.C. Crombie, 1990-07-01 The author sees the history of Western Science as the history of a vision and an argument initiated by the ancient Greeks in their search for principles at once of nature and of argument itself This scientific vision explored and controlled by argument and the diversification of both vision and argument by scientific experience and by interaction with the wider contexts of intellectual culture constitute the long history of European scientific thought Underlying that development have been specific commitments to conceptions of nature and of science and its intellectual and moral assumptions accompanied by a recurrent critique their diversification has generated a series of different styles of scientific thinking and of making theoretical and practical decisions which the work describes *Science, Optics, and Music in Medieval and Early Modern Thought* Alistair Cameron Crombie, 1990-01-01 A C Crombie is one of the best known writers on the history of Science Science Optics and Music in Medieval and Early Modern Thought brings together a coherent body of essays that complement his books and are of independent value A C Crombie traces general themes in the development of Science the Aristotelian inheritance and the importance of the search for logical explanation in the middle ages the ambitions and limitations of experiment and quantification changing attitudes to scientific progress the relations between Science and the Arts and between Mathematics Music and Medical Science and the study of the senses In particular he shows how the mechanistic hypothesis stimulated the experimental and philosophical study of vision **Neoplatonism and Contemporary Thought** R. Concurrently philosophers established the conceptual foundations of modernity This rich and comprehensive volume surveys and illuminates the numerous and complicated interconnections between philosophical and scientific thought as both were radically transformed from the late sixteenth to the mid eighteenth century The chapters explore reciprocal influences between philosophy and physics astronomy mathematics medicine and other disciplines and show how thinkers responded to an immense range of intellectual material and institutional influences The volume offers a unique perspicuity viewing the entire landscape of early modern philosophy and science and also marks an epoch in contemporary scholarship surveying recent contributions and suggesting future investigations for the next generation of scholars and students Faith and Modern Thought Timothy Hull, 2020-10-29 Get the full picture Understand the whole story Faith and Modern Thought is a jargon busting and engaging introduction providing an imaginative and creative way into the great minds that have forged the modern world especially Kant and Hegel and the revolutionary philosophies of existentialism and Marxism they inspired Tim Hull provides the wider intellectual picture the fuller philosophical story in which modern theology was forged After an engaging introduction to the European Enlightenment and the cultural crisis it triggered the stage is set to understand the essence of modern theology From that essential background the radical faith of many of the most influential of modern theologians and philosophers of religion is explored exposing a deep rooted indebtedness to the Enlightenment tradition

Writing the History of the Mind Cristina Chimisso, 2016-02-11 For much of the twentieth century French intellectual life was dominated by theoreticians and historians of mentalit Traditionally the study of the mind and of its limits and capabilities was the domain of philosophy however in the first decades of the twentieth century practitioners of the emergent human and social sciences were increasingly competing with philosophers in this field ethnologists sociologists psychologists and historians of science were all claiming to study how people think Scholars including Gaston Bachelard Georges Canguilhem Leon Brunschvicg Lucien Levy Bruhl Lucien Febvre Abel Rey Alexandre Koyr and Helene Metzger were all investigating the mind historically and participating in shared research projects Yet as they have since been appropriated by the different disciplines literature on their findings has so far failed to recognise the connections between their research and their importance in intellectual history In this exemplary book Cristina Chimisso reconstructs the world of these intellectuals and the key debates in the philosophy of mind particularly between those who studied specific mentalities by employing prevalently historical and philological methods and those who thought it possible to write a history of the mind outlining the evolution of ways of thinking that had produced the modern mentality Dr Chimisso situates the key French scholars in their historical context and shows how their ideas and agendas were indissolubly linked with their social and institutional positions such as their political and religious allegiances their status in academia and their familial situation The author employs a vast range of original research using philosophical and scientific texts as well as archive documents correspondence and seminar minutes from the period covered to recreate the milieu in which these relatively neglected scholars made advances in the

history of philosophy and science and produced Myth Analyzed Robert A. Segal, 2020-10-13 Comparing and evaluating modern theories of myth this book offers an overview of explanations of myth from the social sciences and the humanities This ambitious collection of essays uses the viewpoints of a variety of disciplines psychology anthropology sociology politics philosophy religious studies and literature Each discipline advocates a generalization about the origin the function and the subject matter of myth The subject is always not what makes any myth distinct but what makes all myths myth The book is divided into five sections covering topics such as myth and psychoanalysis hero myths myth and science myth and politics and myth and the physical world Chapters engage with an array of theorists among them Freud Jung Campbell Rank Winnicott Tylor Frazer Malinowski Levy Bruhl Levi Strauss Harrison and Burkert The book considers whether myth still plays a role in our lives is one of the issues considered showing that myths arise anything but spontaneously They are the result of a specific need which varies from theory to theory This is a fascinating survey by a leading voice in the study of myth As such it will be of much interest to scholars of myth and how it interacts with Sociology Anthropology Politics and Economics

Conscientious Thinking David Bosworth, 2017 David Bosworth cuts through all the noise of today's political dysfunction and cultural wars to sound the deeper causes of our discontent He explores the ways in which Americans are affected by the irreversible forces set loose by technology's drastic revision of our everyday lives Paulin Hountondji and the Science Question in Africa Zeyad el Nabolsy, 2025-07-18 This book offers a systematic reconstruction of Paulin Hountondji's

contributions to the debate about the place of modern science on the African continent The book shows that Hountondji develops an account of modern science that is sociologically sensitive to the entanglement between modern science and colonialism on the African continent without falling into epistemic relativism about the claims of modern science It is argued that Hountondji's views on modern science express a strong historical materialist influence and that he develops a theory of science that draws both on the Hessen Grossmann hypothesis and dependency theory Thus this book brings together two strands of historical materialist thought about science that have hitherto been isolated from one another This book is of interest to scholars who specialize in African philosophy history and philosophy of science global philosophy and African studies
