## **Modern Science Moral Values Proc:**

*Modern Science and Moral Values*, 1973      **Prophets and Protons** Benjamin E Zeller, 2010-03-01 This in depth study shows how new religious movements offer a variety of strategies for reconciling science and religious faith By the twentieth century established religious traditions were forced to grapple with the challenges presented by scientific knowledge and innovation But emerging religions still led by a living founder to guide them found new ways to respond to science The Hare Krishnas the Unification Church and Heaven's Gate each found distinct ways to incorporate major findings of modern American science understanding it as central to their wider theological and social agendas In *Prophets and Photons* Benjamin Zeller examines how these New Religious Movements NRMs crafted their views on science during their founding period and how those views evolved over time These NRMs shed light on how religious groups new old alternative or mainstream could respond to the tremendous growth of power and prestige of science in late twentieth century America In this engrossing book Zeller carefully shows that religious groups had several methods of creatively responding to science and that the often assumed conflict based model of science vs religion must be replaced by a more nuanced understanding of how religions operate in our modern scientific world      [Proceedings of the 2012 International Conference of Modern Computer Science and Applications](#) Zhenyu Du, 2012-08-22 This volume contains the proceedings of the 2012 International Conference of Modern Computer Science and Applications MCSA 2012 which was held on September 8 2012 in Wuhan China The MCSA 2012 provides an excellent international forum for sharing knowledge and results in theory methodology and applications of modern computer science and applications in theoretical and practical aspects      **The Centrality of Science and Absolute Values**, 1975      *Proceedings of the 2025 11th International Conference on Humanities and Social Science Research (ICHSSR 2025)* Bootheina Majoul, Abdullah Abdullah, Sharifah Faizah Syed Mohammed, Fonny Dameaty

**Beyond a World Divided** Erika Erdmann, David Stover, 2000-12 Thinkers as diverse as C. P. Snow, J. Bronowski and Carl Sagan have described the rift between the two cultures of science and the humanities as the greatest barrier to solving the many problems threatening today's world During the last two decades of his life Nobel laureate Roger W. Sperry best known for his pioneering split brain studies that highlighted the differing aptitudes of the two hemispheres of the human brain turned his energies to this dilemma Sperry's ideas about consciousness challenged the behaviorist orthodoxy that prevailed in psychology in the 1950s and 60s and provided a way of understanding the relationship between brain and mind that not only more accurately reflected reality but also promised a reconciliation between the conflicting claims of hard edged objective fact and the realm of human emotion and subjective experience *Beyond A World Divided* chronicles the neuroscientist's groundbreaking research his efforts to refine and win acceptance for his ideas and his struggle to advance his work despite the onslaught of the degenerative nerve disease that eventually killed him The book concludes by surveying the debate in the psychological and philosophical communities about the impact of Sperry's ideas a debate which still continues
