**Technology versus Ecology: Human Superiority and the Ongoing Conflict with Nature** Schultz, Robert A., 2013-09-30 Although human beings are technically part of the ecosystem there still remains a conceptual conflict between technology and nature These concerns highlight the idea of human superiority in which the priority is given to technology versus living in synchronization with nature Technology versus Ecology Human Superiority and the Ongoing Conflict with Nature explores the issues revolving around the conflict between technology versus human beings the concern for the separation of human beings in the ecosystem and the negative consequences that may follow as ecosystems are being damaged This book is a significant reference source for researchers instructors and students interested in the constant evolution of technology and ecology

*A New Development Model and China's Future* Deng Yingtao, 2014-04-24 The need for China to find a new environmentally sustainable development path is accepted widely among Chinese scholars and policy makers This book makes available for the first time to an English speaking audience Deng Yingtao's ground breaking book *New Development Model and China's Future* Published in 1991 the book was far ahead of its time Deng subjects the development model of the high income countries to rigorous analysis and explores the environmental implications of China following this model His clear conclusion is that the carrying capacity of the physical environment and nature is limited that economic and social development should not exceed the carrying capacity of resources and that China should not adopt the western development path Based on insights from economics engineering and human psychology the book analyses the environmental impact of the current western development model demonstrates the catastrophic impact this would have in terms of China's own development and in terms of China's relationship with the world and argues that China's rich intellectual and scientific tradition will allow Chinese people to play a central role in finding the solution to the profound environmental and development challenges the world currently faces

*Can Our Civilisation Survive the Changes Generated by New Technology? Analysing Society and Media* Vesna Lukovic, Marja Novak Vogric, 2024-07-09 Human history is a history of powerful civilisations which collapsed for various reasons but behind all of those reasons there was the inability of each civilisation to adapt to changes that were introduced by the human race itself or by the external environment Judging from history we can expect that our civilisation might collapse as well This book takes a look at the huge changes brought by new technology that was introduced by humans over the past few decades and might have the power to destroy the modern civilisation It analyses social disadvantages of the new technology and attempts to answer the question of what has to be done to enable society to adapt to the new technology embrace it and use it for the collective good It also explains how to recognize fake news why Orson Welles was a fake news visionary and why Monica Lewinsky was one of the first victims of the modern new technology

*Marconi's Wireless and the Rhetoric of a New Technology* Aaron A. Toscano, 2012-02-09 This book examines the discourse surrounding the wireless created by the Anglo Italian inventor

Guglielmo Marconi The wireless excited early twentieth century audiences before it even became a viable black box technology The wireless adhered to modernist values speed efficiency militarization and progress Language surrounding the wireless is a form of technical communication overlooked by today s practitioners This book establishes a broader definition for technical communication by examining a selection of the discourse surrounding Marconi s wireless The book s main themes are the following 1 technical communication is all discourse surrounding technology 2 the field of technical communication or technical writing should incorporate analyses of discourse surrounding technologies into its epistemology 3 the wireless is a product of the society from which it comes early twentieth century Western civilization and 4 the discourse surrounding the wireless is infused with tropes of progress speed efficiency evolution and ahistoricity

**The Environment, Our Natural Resources, and Modern Technology** Thomas R. DeGregori, 2008-06-02 Always controversial Thomas DeGregori has released another classic volume that is sure to inform confound and present new perspectives on today's environmental issues This time he is taking on the environmentalists naturalists green consumerists and those that hail the natural lifestyle as the healthy politically correct thing to do DeGregori examines the economics of green consumerism the reality of saving the environment how historical cultures may have influenced environmental damage and how being ecologically correct may have a more damaging effect on

our environment Not just a regurgitation of theories DeGregori offers real time strategies and alternatives to enhance our natural resources and our environment in harmony with today s modern technology This is the book everyone will be talking about for years to come      *English Writings of Hu Shih* Hu Shih,2013-02-01 Hu Shih 1891 1962 In the 1910s Hu studied at Cornell University and later Columbia University both in the United States At Columbia he was greatly influenced by his professor John Dewey and became a lifelong advocate of pragmatic evolutionary change He received his Ph D in Philosophy in 1917 and returned to lecture at Peking University Hu soon became one of the leading and most influential intellectuals during the May Fourth Movement and later the New Culture Movement His most widely recognized achievement during this period was as a key contributor to Chinese liberalism and language reform in his advocacy for the use of written vernacular Chinese Hu Shih was the Republic of China s Ambassador to the United States of America 1938 1942 and later Chancellor of Peking University 1946 1948 In 1939 Hu Shih was nominated for a Nobel Prize in literature and in 1958 became president of the Academia Sinica in Taiwan where he remained until his death in Nangang at the age of 71 This diverse collection brings together his English essays speeches and academic papers as well as book reviews all written between 1919 and 1962 *English Writings of Hu Shih* represents his thinking and insights on such topics as scientific methodology liberalism and democracy and social problems It can also serve as a helpful resource for those who study Hu Shih and his views on ancient and modern China The first volume *Chinese Philosophy and Intellectual History* allows readers to trace the development of Chinese thought and see the historical methodology applied therein The second volume *Literature and Society* mainly includes Hu Shih s works on language reform which owing to his advocacy for the use of written vernacular Chinese were a success in both the educational and literary fields The third volume *National Crisis and Public Diplomacy* mainly collects Hu s articles and speeches from his term as Ambassador of China to the U S A between 1938 and 1942      *Gandhi and the World Order* ,1996      *Concerns and Issues in Won Buddhism* Bokin Kim,2000-01-01 The world of Won Buddhism the Great Master described has three realms the spirit of Re creation the morality of Grace and the revival of Buddhism According to this new understanding of our world we are not separated from Buddha Dharma and the Buddha even though we are living in this secular world On the contrary they are present in the very fabric of life Thus where freedom equality and gratitude are fully manifested our everyday common lives take place in the realm of spirituality and holiness There is an increasing need and demand for Won Buddhist resources in the English language It is my hope that the essays in this collection contribute to a greater understanding of the world of Won Buddhism      *New & Enlarged Handbook of Christian Theology* Donald W. Musser,Joseph Price,2011-09-01 This handbook provides thorough introductory articles on important themes in Christian theology Along with cross references and select bibliographies it is an indispensable reference source The Handbook consists of 148 topical entries arranged alphabetically Instead of a Table of Contents a Routes For Reading page suggests related entries and cross referencing makes surfing this volume easier than ever      *Dynamics of World History* Christopher

Dawson,2014-05-20 In scope and in vision Christopher Dawson's historiography ranks with the work of men like Spengler Northrop and Toynbee Several major themes run through Dawson's work but perhaps his most unique contribution was his insistence on the importance of religion in shaping and sustaining civilizations Religion Dawson believed is the great creative force in any culture and the loss of a society's historic religion therefore portends a process of social dissolution For this reason Dawson concluded that Western society must find a way to revitalize its spiritual life if it is to avoid irreversible decay Progress the real religion of modernity is insufficient to sustain cultural health And an ahistorical secularized Christianity is an oxymoron a pseudo religion only nominally related to the historic religion of the West Dawson maintained that the hope of the present age lay in the reconciliation of the religious tradition of Christianity with the intellectual tradition of humanism and the new knowledge about man and nature provided by modern science Dynamics of World History shows that though such a task may be difficult it is not impossible **Civilization's Crisis: A Set Of Linked Challenges** John Scales

Avery,2017-04-20 Modern civilization faces a broad spectrum of daunting problems but rational solutions are available for them all This book explores the following issues 1 Threats to the environment and climate change 2 a growing population and vanishing resources 3 the global food and refugee crisis 4 intolerable economic inequality 5 the threat of nuclear war 6 the military industrial complex and 7 limits to growth These problems are closely interlinked and their possible solutions are discussed in this book **The Rhythms of History** Stephen Blaha,2002-08 The Rhythms of History presents a quantitative theory of civilizations supported by the data in Toynbee's classic 12 volume A Study of History Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 New York Public Library. Civilizations Felipe Fernandez-Armesto,2001-09-14 In Civilizations Felipe Fernandez Armesto once again proves himself a brilliantly original historian capable of large minded and comprehensive works here he redefines the subject that has fascinated historians from Thucydides to Gibbon to Spengler to Fernand Braudel the nature of civilization To Fernandez Armesto a civilization is civilized in direct proportion to its distance its difference from the unmodified natural environment by its taming and warping of climate geography and ecology The same impersonal forces that put an ocean between Africa and India a river delta in Mesopotamia or a 2 000 mile long mountain range in South America have created the mold from which humanity has fashioned its own wildly differing cultures In a grand tradition that is certain to evoke comparisons to the great historical taxonomies each chapter of Civilizations connects the world of the ecologist and geographer to a panorama of cultural history In Civilizations the medieval poem Sir Gawain and the Green Knight is not merely a Christian allegory but a testament to the thousand year long deforestation of the trees that once covered 90 percent of the European mainland The Indian Ocean has served as the world's greatest trading highway for millennia not merely because of cultural imperatives but because the regular monsoon winds blow one way in the summer and the other in the winter In the words of the author Unlike previous attempts to write the comparative history of civilizations it is arranged environment by

environment rather than period by period or society by society Thus seventeen distinct habitats serve as jumping off points for a series of brilliant set piece comparisons thus tundra civilizations from Ice Age Europe are linked with the Inuit of the Pacific Northwest and the Mississippi mound builders and the deforesters of eleventh century Europe are both understood as civilizations built on woodlands Here of course are the familiar riverine civilizations of Mesopotamia and China of the Indus and the Nile but also highland civilizations from the Inca to New Guinea island cultures from Minoan Crete to Polynesia to Renaissance Venice maritime civilizations of the Indian Ocean and South China Sea even the Bushmen of Southern Africa are seen through a lens provided by the desert civilizations of Chaco Canyon More here are fascinating stories brilliantly told of the voyages of Chinese admiral Chen Ho and Portuguese commodore Vasco da Gama of the Great Khan and the Great Zimbabwe Here are Hesiod's tract on maritime trade in the early Aegean and the most up to date genetics of seed crops Erudite wide ranging a work of dazzling scholarship written with extraordinary flair Civilizations is a remarkable achievement a tour de force by a brilliant scholar

**Ethical Tensions from New Technology** Harvey S James Jr, 2018-08-20 The introduction of new technologies can be controversial especially when they create ethical tensions as well as winners and losers among stakeholders and interest groups While ethical tensions resulting from the genetic modification of crops and plants and their supportive gene technologies have been apparent for decades persistent challenges remain This book explores the contemporary nature type extent and implications of ethical tensions resulting from agricultural biotechnology specifically and technology generally There are four main arenas of ethical tensions public opinion policy and regulation technology as solutions to problems and older versus new technologies Contributions focus on one or more of these arenas by identifying the ethical tensions technology creates and articulating emerging fault lines and where possible viable solutions Key features include focusing on contemporary challenges created by new and emerging technologies especially agricultural biotechnology Identifying a unique perspective by considering the problem of ethical tensions created or enhanced by new technologies Providing an interdisciplinary perspective by including perspectives from sociologists economists philosophers and other social scientists This book will be of interest to academics in agricultural economics sociology and philosophy and policymakers concerned with introducing new technology into agriculture

**A History of Civilizations** Fernand Braudel, 1995-04-01 Written from a consciously anti ethnocentric approach this fascinating work is a survey of the civilizations of the modern world in terms of the broad sweep and continuities of history rather than the event based technique of most other texts
