Tradition in the Twenty-First Century Trevor J. Blank, Robert Glenn Howard, 2013-05-15 In *Tradition in the Twenty First Century* eight diverse contributors explore the role of tradition in contemporary folkloristics For more than a century folklorists have been interested in locating sources of tradition and accounting for the conceptual boundaries of tradition but in the modern era expanded means of communication research and travel along with globalized cultural and economic interdependence have complicated these pursuits Tradition is thoroughly embedded in both modern life and at the center of folklore studies and a modern understanding of tradition cannot be fully realized without a thoughtful consideration of the past's role in shaping the present Emphasizing how tradition adapts survives thrives and either mutates or remains stable in today's modern world the contributors pay specific attention to how traditions now resist or expedite dissemination and adoption by individuals and communities This complex and intimate portrayal of tradition in the twenty first century offers a comprehensive overview of the folkloristic and popular conceptualizations of tradition from the past to present and presents a thoughtful assessment and projection of how tradition will fare in years to come The book will be useful to advanced undergraduate or graduate courses in folklore and will contribute significantly to the scholarly literature on tradition within the folklore discipline Additional Contributors Simon Bronner Stephen Olbrys Gencarella Merrill Kaplan Lynne S McNeill Elliott Oring Casey R Schmitt and Tok Thompson

The End of Tradition? Nezar Alsayyad, 2004-08-02 Rooted in real world observations this book questions the concept of tradition whether contemporary globalization will prove its demise or whether there is a process of simultaneous ending and renewing In his introduction Nezar Alsayyad discusses the meaning of the word tradition and the current debates about the end of tradition Thereafter the book is divided into three parts The three chapters in part I explore the inextricable link between tradition and modern revealing the geopolitical implications of this link Part II looks at tradition as a process of invention and here the three chapters are all concerned with the making of landscapes and landscape myths showing how the spectacle of history can be aestheticized and naturalized Finally Part III shows how tradition is a regime programmed and policed and how it has been deployed resisted and reworked through hegemonic struggles that seek to create both built environments and citizen subjects

Questions of Tradition Mark Salber Phillips, Mark Phillips, Gordon J. Schochet, 2004-01-01 Tradition is a central concern for a wide range of academic disciplines interested in problems of transmitting culture across generations Yet the concept itself has received remarkably little analysis A substantial literature has grown up around the notion of invented tradition but no clear concept of tradition is

to be found in these writings since the very notion of invented tradition presupposes a prior concept of tradition and is empty without one this debunking usage has done as much to obscure the idea as to clarify it In the absence of a shared concept the various disciplines have created their own vocabularies to address the subject Useful as they are these specialized vocabularies of which the best known include hybridity canonicity diaspora paradigm and contact zones separate the disciplines and therefore necessarily create only a collection of parochial and disjointed approaches Until now there has been no concerted attempt to put the various disciplines in conversation with one another around the problem of tradition Combining discussions of the idea of tradition by major scholars from a variety of disciplines with synoptic synthesizing essays Questions of Tradition will initiate a renewal of interest in this vital subject **Wilson Harris and the Modern**

Tradition Sandra E. Drake,1986-08-13 **New Religious Movements in Modern Asian History** David W.

Kim,2020-09-30 This book provides evidence that the emergence of Asian new religious movements NRMs was predominantly the result of anti colonial ideology from local religious groups or individuals The contributors argue that when traditional religions were powerless to maintain their cultural heritage the leadership of NRMs adduced alternative principles and the new teachings of each NRM attracted the local people enough for them to change their beliefs The contributors argue that as a whole the Asian new religious movements overall were very ardent and progressive in transmitting their new ideologies The varied viewpoints in this volume attest to the consistent development of Asian NRMs from domestic and international dimensions by replacing old traditional religions Hobbes's Critique of Religion and Related Writings Leo Strauss,2011-05-15 Leo Strauss s The Political Philosophy of Hobbes deservedly ranks among his most widely acclaimed works In it Strauss argues that the basis for Hobbes s natural and political science is his interest in self knowledge of man as he really is The writings collected in this book each written prior to that classic volume complement that account Thus at long last this book allows us to have a complete picture of Strauss s interpretation of Hobbes the thinker pivotal to the fundamental theme of his life s work the conflicting demands of philosophy and revelation or as he termed it the theologico political problem It is no exaggeration to say that Strauss s work on Hobbes s critique of religion is essential to his analysis of Hobbes s political philosophy and vice versa This volume will spark new interest in Hobbes s explication of the Bible and in his understanding of religion by revealing previously neglected dimensions and motives of Hobbes s theology At the same time scholars interested in the intellectual development of Leo Strauss will find in these writings the missing link as it were between his two early books Spinoza s Critique of Religion and The Political Philosophy of Hobbes In addition this volume makes available for the first time in English a letter a book outline an extended review an engagement with legal positivism and an account of Strauss s work on Hobbes by Heinrich Meier all of which shed light on Strauss s concerns and his approach to Hobbes in particular as well as to modern political thought and life **The Sociology of Zygmunt**

Bauman Michael Hviid Jacobsen,Poul Poder,2016-03-03 Zygmunt Bauman is one of the most inspirational and controversial

thinkers on the scene of contemporary sociology For several decades he has provided compelling analyses and diagnoses of a vast variety of aspects of modern and liquid modern living This book considers the theoretical significance of his contribution to sociology but also discusses and adopts a critical stance towards his work The Sociology of Zygmunt Bauman introduces and critically appraises some of the most significant as well as some of the lesser known of Bauman s contributions to contemporary sociology An international team of scholars delineates and discusses how Bauman s treatment of these themes challenges conventional wisdom in sociology thereby revising and revitalizing sociological theory As a special feature the book concludes with Bauman s intriguing reflections and contemplations on his own life and intellectual trajectory published here for the first time in English In this postscript aptly entitled Pro Domo Sua About Myself he describes the pushes and pulls that throughout the years have shaped his thinking

The Law of the Heart Sam B. Girgus, 1979-05-01 The Law of the Heart is a vigorous challenge to the prevailing concept of the antidemocratic image of the self in the American literary and cultural tradition Sam B Girgus counters this interpretation and attempts to develop a new understanding of democratic individualism and liberal humanism in American literature under the rubric of literary modernism The image of the individual self who retreats inward conforming to a distorted law of the heart emerges from the works of such writers as Cooper and Poe and composer Charles Ives Yet as Girgus shows other American writers relate the idea of the self to reality and culture in a more complex way the self confronts and is reconciled to the paradox of history and reality In Girgus view the tradition of pragmatic humanistic individualism provides a foundation for a future where individual liberty is a major priority He uses literary modernism as a bridge for relating contemporary social conditions to crises of the American self and culture as seen in the works of writers including Emerson Howells Whitman Henry James William James Fitzgerald Bellow and McLuhan
