Journal of the United States Artillery, 1945 *Women in Allied Naval Intelligence in the Second World War*
Sarah-Louise Miller, 2024-10-17 Closely examining the work of women in the US and British naval services towards Allied naval intelligence during the Second World War this book focuses on their contributions during the Battle of the Atlantic and Pacific Naval War in order to shed new light on arenas of war from which women's narratives are almost always absent Including personal testimonies from those involved and surveying a wide cross section of different roles Sarah Louise Miller analyses the work of women at every level and rank in the US and British naval services and offers a much wider picture of how they assisted the Allied forces behind closed doors With exploration of the work of the WRNS and WAVES on developing naval intelligence this book argues that they played a crucial role in the British and American SIGINT systems and within programs such as those at Bletchley Park and OP 20 G therefore directly impacting the organisation and outcome of Anglo American naval efforts Including analysis of the development of the modern kill chain Miller also re evaluates the effect of the combat taboo to demonstrate that the WRNS and WAVES were in fact at the cutting edge of the emergence of modern warfare *Journal of the Aeronautical Sciences*, 1940 *Congressional Record* United States. Committee on Undersea Warfare, 1954 **Manpower and the Armies of the British Empire in the Two World Wars** Andrew L. Brown, Douglas E. Delaney, Mark Frost, 2021-06-15 In the first and only examination of how the British Empire and Commonwealth sustained its soldiers before during and after both world wars a cast of leading military historians explores how the empire mobilized manpower to recruit workers care for veterans and transform factory workers and farmers into riflemen Raising armies is more than counting people putting them in uniform and assigning them to formations It demands efficient measures for recruitment registration and assignment It requires processes for transforming common people into soldiers and then producing officers staffs and commanders to lead them It necessitates balancing the needs of the armed services with industry and agriculture And often overlooked but illuminated incisively here raising armies relies on medical services for mending wounded soldiers and programs and pensions to look after them when demobilized *Manpower and the Armies of the British Empire in the Two World Wars* is a transnational look at how the empire did not always get these things right But through trial error analysis and introspection it levied the large armies needed to prosecute both wars Contributors Paul R
