Modernist Visions And The Contemporary American City:

Modernist Visions and the Contemporary American City, 1989 **The Urbanism of Frank Lloyd Wright** Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city. Stunningly comprehensive, *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism. Neil Levine places Wright's projects produced over more than fifty years within their historical, cultural, and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century. Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City. Rather, Levine reveals Wright's larger, more varied, interesting, and complex urbanism demonstrated across the span of his lengthy career. Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial, mixed-use, civic, and cultural centers for Chicago, Madison, Washington, Pittsburgh, and Baghdad, Levine demonstrates Wright's place among the leading contributors to the creation of the modern city. Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis. Lavishly illustrated with drawings, plans, maps, and photographs, this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives. *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come.

Cross-cultural Visions in African American Modernism Yoshinobu Hakutani, 2006 Yoshinobu Hakutani traces the development of African American modernism, which initially gathered momentum with Richard Wright's literary manifesto *Blueprint for Negro Writing* in 1937. Hakutani dissects and discusses the cross-cultural influences on the then burgeoning discipline in three stages: American dialogues, European and African cultural visions, and Asian and African American cross-cultural visions. In writing *Black Boy*, the centerpiece of the Chicago Renaissance, Wright was inspired by Theodore Dreiser. Because the European and African cultural visions that Wright, Ralph Ellison, Alice Walker, and Toni Morrison acquired were buttressed by the universal humanism that is common to all cultures, this ideology is shown to transcend the problems of society. Fascinated by Eastern thought and art, Wright, Walker, Sonia Sanchez, and James Emanuel wrote highly accomplished poetry and prose. Like Ezra Pound, Wright was drawn to classic haiku as reflected in the 4,000 haiku he wrote at the end of his life. As W.B. Yeats's symbolism was influenced by his cross-cultural visions of Noh theatre and Irish folklore, so is James Emanuel's jazz haiku energized by his cross-cultural rhythms of Japanese poetry and African American music. The book demonstrates some of the most visible cultural exchanges in modern and postmodern African American literature. Such a study can be extended to other contemporary African American writers whose works also thrive on their cross-cultural visions, such as Amiri Baraka, Ishmael Reed, Charles Johnson, and haiku poet

Lenard Moore **Werner Hegemann And The Search For Universal Urbanism** Craseman Christine Collins, 2005-04-26
 Werner Hegemann 1881 1936 a German born multidisciplinary critic of the built environment was well known in Europe and the United States in his lifetime A critic rather than a designer he did not fit easily into any school or category To those seeking to promote modernism Hegemann was something of an awkward figure influential and undoubtedly authoritative but unorthodox Today however when studies of modernism have largely shed their proselytizing role he is of great relevance Our interest now is less in those who proposed the answers than in those who asked the questions and particularly the way in which those questions were framed For this Hegemann is a key figure Based on documentation largely unavailable in English including Hegemann s published and unpublished writings his correspondence his diaries the author s interviews archival materials lent to her by Hegemann s widow and the author s own substantial collection this is the first comprehensive study of Hegemann for historians architects and urbanists **BOOK JACKET**

Spatial Theories for the Americas Fernando Luiz Lara, 2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of Spatial Theories for the Americas offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses Spatial Theories for the Americas proposes a fundamental step in that direction

Wright on Exhibit Kathryn Smith, 2022-07-12 The first history of Frank Lloyd Wright's exhibitions of his own work a practice central to his career More than one hundred exhibitions of Frank Lloyd Wright's work were mounted between 1894 and his death in 1959 Wright organized the majority of these exhibitions himself and viewed them as crucial to his self presentation as his extensive writings He used them to promote his designs appeal to new viewers and persuade his detractors Wright on Exhibit presents the first history of this neglected aspect of the architect's influential career Drawing extensively from Wright's unpublished correspondence Kathryn Smith challenges the preconceived notion of Wright as a self promoter who displayed his work in search of money clients and fame She shows how he was an artist architect projecting an avant garde program an innovator who expanded the palette of installation design as technology evolved and a social activist driven to revolutionize society through design While Wright's earliest exhibitions were largely for other architects by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture The nature of his exhibitions expanded with the times beyond models drawings and photographs to include more immersive tools such as slides film and even a full scale structure built especially for his 1953 retrospective at the Guggenheim Museum Placing Wright's exhibitions side by side with his writings Smith shows how integral these exhibitions were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century Wright on Exhibit features color renderings photos and plans as well as a checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright's supervision
