Islam and Modernity Nasar Meer, 2017 The relationship between Islam and modernity has generated a rich but complex literature While competing accounts sometimes appear incommensurable there is at least some convergence on the view that Islam and modernity reflect an unsettled encounter For some this is self evident because the relationship rests on contested foundational questions not least whose modernity and which Islam For others it is a less a theoretical and more a historical issue in so far as there has been a process underway in which Islam has proved slow in catching up This Major Work gives space to an evolving conversation between Islam and four component parts of modernity It has a comprehensive introduction newly written by the editor which places the collected material in its historical and intellectual context

was by no means clear but around the 18th century a growing number of European intellectuals and scholars realized that the changes that had been in the making since the late 15th century were irreversible and could not be contained in any particular region or confined to particular sectors of society but would ultimately transform all spheres of life Like other thinkers sociologists observed this transformation with awe and their attitude towards it has always been ambivalent The 20th century during which modernity gradually began to break through globally was also a century during which many sociologists became increasingly disillusioned with the promises of the modern project But with the exhaustion of the energies of postmodernism the intellectual movement that wanted to bury modernity the interest in modernity began to resurface again not least because it became increasingly clear that the world is far from approaching a societal condition pointing systematically beyond modernity Instead we are witnessing an intensification of modernization processes around the world But what is modernity anyway The aim of the present volume is to contribute to the ongoing discussion about the meaning of modernity and about the significance of modernization processes in non Western societies As befits a subject matter as controversial and complex at this one the book s chapters offer no conclusive answers to the questions they raise and address The debate about modernity must and will continue and one hopes that it will be conducted in an atmosphere of mutual respect despite sometimes fierce disagreement between the participants For only if we listen to each other can we make genuine intellectual progress

The Oxford Handbook of Critical Concepts in Music Theory

Alexander Rehding,Steven Rings,2019-11-19 Music Theory has a lot of ground to cover Especially in introductory classes a whole range of fundamental concepts are introduced at fast pace that can never be explored in depth or detail as other new topics become more pressing The short time we spend with them in the classroom belies the complexity and in many cases the contradictions underlying these concepts This book takes the time to tarry over these complexities probe the philosophical assumptions on which these concepts rest and shine a light on all their iridescent facets This book presents music theoretical concepts as a register of key terms progressing outwards from smallest detail to discussions of the music theoretical project on the largest scale The approaches individual authors take range from philosophical historical or analytical to systematic cognitive and critical theoretical covering the whole diverse spectrum of contemporary music theory In some cases authors explore concepts that have not yet been widely added to the theorist s toolkit but deserve to be included in other cases concepts are expanded beyond their core repertory of application This collection does not shy away from controversy Taken in their entirety the essays underline that music theory is on the move exploring new questions new repertories and new approaches This collection is an invitation to take stock of music theory in the early twenty first century to look back and to encourage discussion about its future directions Its chapters open up a panoramic view of the contemporary music theoretical landscape with its expanding repertories and changing guiding questions and offers

suggestions as to where music theory is headed in years to come

Critical Concepts M. Janine Brodie, 2001-07 **Shi'i Sectarianism in the Middle East** Elisheva Machlis, 2014-09-17 The eruption of violent sectarianism in Iraq following the US invasion in 2003 brought the question of Sunni Shi'i relations in the country to the forefront of the international public agenda. It also strengthened the popular belief that contemporary Shi'ism is inherently sectarian. Yet several decades earlier Ayatollah Khomeini had declared an Islamic revolution and downplayed its Shi'i origins and links. So what is the true orientation of Shi'i Islam in the contemporary era and how did modernisation alter its sectarian affiliation? This book contends that early Shi'i reformist thought set the foundations for a more universal oriented Shi'ism. Prominent reformists in the first half of the twentieth century from the holy cities of Karbala and Najaf in Iraq and from the Shi'i centres in Southern Lebanon played a significant role in the renewal of Shi'ism and laid the groundwork for its reinvention in the modern era. Exploring this shift towards a more ecumenical perception of Islam, Elisheva Machlis here provides a fresh perspective on inter-sectarian relations in contemporary Iraq and illuminates the intellectual roots of the Islamic revolution by examining networks of Shi'i scholars such as Mu'ammad usayn K ashif al Ghi and Mu' sin al Am n al mil operating within a more globalised Muslim world. Drawing on the experiences of early Shi'i reformists such as Abd al usayn Sharaf al D n al M saw in Lebanon and Mu'ammad Jaw d Mughniyya in Damascus, this book gives new insight on the future of inter-Muslim relations at a time of growing inter-sectarian contention from the Iran-Iraq war to the post-2003 Sunni Shi'i conflict in Iraq and al-Qa'ida's anti-Shi'i message, taking into account questions of theology, historiography, jurisprudence and politics which all played a vital role in the transition to the contemporary era. The author here analyses the broad scholarly connections between Iran, Iraq and Lebanon in the twentieth century while debating paramount questions of leadership, identity and group membership in the development of modern Shi'ism. Examining the relationship between intellectual thought and socio-political development in the region, this book provides a new perspective concerning the future of an increasingly globalised Muslim world and will prove essential reading for students and specialists.

Knowledge Production, Area Studies and Global Cooperation Claudia Derichs, 2017-04-27 Whereas Area Studies and cross-border cooperation research conventionally demarcates groups of people by geographical boundaries, individuals might in fact feel more connected by shared values and principles than by conventional spatial dimensions. Knowledge Production, Area Studies and Global Cooperation asks what norms and principles lead to the creation of knowledge about cross-border cooperation and connection. It studies why theories, methods and concepts originate in one place rather than another, how they travel and what position the scholar adopts while doing research, particularly in the field. Taking case studies from Asia, the Middle East and North Africa, the book links the production of alternative epistemologies to the notion of global cooperation and reassesses the ways in which the concept of connectedness can be applied at the translocal and individual

rather than the formal international and collective level Knowledge Production Area Studies and Global Cooperation provides an innovative and critical approach towards established means of producing knowledge about different areas of the world demonstrating that an understanding of pluri local connectivity should be integrated into the production of knowledge about different areas of the world and the behavioural dimension of global cooperation By shifting the view from the collective to the individual and from the formal to often invisible patterns of connectedness this book provides an important fresh perspective which will be of interest to scholars and students of Area Studies Politics International Relations and Development Studies

John Wayne's World Russell Meeuf, 2013-09-01 This cultural study examines the significance of John Wayne as a global symbol of masculinity in the mid twentieth century In a film career that spanned five decades John Wayne became a US icon of heroic individualism and rugged masculinity His widespread popularity however was not limited to the United States he was beloved among moviegoers in Asia Africa Latin America and Europe In John Wayne s World Russell Meeuf considers the actor s global popularity and makes the case that Wayne s depictions of masculinity in his most popular films of the 1950s reflected the social disruptions of global capitalism and modernization during that time John Wayne s World places the actor at the center of gender and nation based ideologies opening a dialogue between film history gender studies political and economic history and popular culture Moving chronologically Meeuf provides new readings of the films Fort Apache Red River Hondo The Searchers Rio Bravo and The Alamo and connects Wayne s characters with a modern image of masculinity taking shape after World War II Considering Wayne s international productions such as Legend of the Lost and The Barbarian and the Geisha Meeuf shows how they resonated with US ideological positions about Africa and Asia Meeuf concludes that in his later films Wayne s image shifted to one of grandfatherly nostalgia for the past as his earlier brand of heroic masculinity became incompatible with the changing world of the 1960s and 1970s Handbook of

Forms Clare Pettitt, 2020-06-04 *Serial Forms The Unfinished Project of Modernity 1815 1848* proposes an entirely new way of reading the transition into the modern It is the first book in a series of three which will take the reader up to the end of the First World War moving from a focus on London to a global perspective *Serial Forms* sets out the theoretical and historical basis for all three volumes It suggests that as a serial news culture and a stadial historicism developed together between 1815 and 1848 seriality became the dominant form of the nineteenth century Through serial newsprint illustrations performances and shows the past and the contemporary moment enter into public visibility together *Serial Forms* argues that it is through seriality that the social is represented as increasingly politically urgent The insistent rhythm of the serial reorganizes time recalibrates and rescales the social and will prepare the way for the 1848 revolutions which are the subject of the next book By placing their work back into the messy print and performance culture from which it originally appeared *Serial Forms* is able to produce new and exciting readings of familiar authors such as Scott Byron Dickens and Gaskell Rather than offering a rarefied intellectual history or chopping up the period into Romantic and Victorian Clare Pettitt tracks the development of communications technologies and their impact on the ways in which time history and virtuality are imagined
