Modernizing China A. Doak Barnett, 2019-03-05 Since the death of Mao China has entered a new period in its development Turning away from the all encompassing emphasis on revolutionary struggle and ideological transformation that characterized the last years of the Maoist era China's leaders under Deng Xiaoping have initiated dramatic new reform and development policies In original essays the contributors all senior specialists on contemporary China analyze the reasons for the new policies the nature and impact of the changes now occurring and the prospects for a continuation of these policies in the future Specifically they examine the Chinese polity as a consultative authoritarian system the farreaching changes in China's agriculture important shifts in foreign economic relations the gradual modernization policy pursued by its military leaders the relaxation of controls on cultural life and the possibility that current social policies may well increase equality rather than inequality in Chinese society The authors conclude that it is too early to judge the eventual long term outcome of current reforms which they believe grew out of the political crises and chronic economic problems that afflicted China in the late 1960s and early 1970s Although they see some opposition and built in limits to reform on balance they foresee strong support for continued reform and believe it will be difficult for future leaders to reverse course *China's Automotive Modernization* G. Chin, 2010-01-29 As a window for understanding the relationship between globalization and the state's pursuit of national industrial development this book examines how and why the Chinese government succeeded in leveraging China's international competitive advantages to modernize the country's automotive industry The Statesman's Year-Book 1988-89 J. Paxton, 2016-12-16 The classic reference work that provides annually updated information on the countries of the world *1988-1989* John Paxton, 2021-06-21 No detailed description available for 1988 1989 *The Transformation of Chinese Socialism* Chun Lin, 2006 A significant contribution to both political theory and China studies this volume provides a critical assessment of the past and future Chinese socialism **Handbook of Comparative and Development Public Administration** Ali Farazmand, 2019-02-21 With contributions from nearly 80 international experts this comprehensive resource covers diverse issues aspects and features of public administration and policy around the world It focuses on bureaucracy and bureaucratic politics in developing and industrialized countries and emphasizing administrative performance and policy implementation as well as political system maintenance and regime enhancement The book covers the history of public administration and bureaucracy in Persia Greece Rome and Byzantium and among the Aztecs Incas and Mayas public administration in small island states Eastern Europe and ethics and other contemporary issues in public administration **De Facto Federalism in China** Yongnian Zheng, 2007 This book is the first attempt to conceptualize China's central local relations from the behavioral perspective Although China does not have a federalist system of government the author believes that with deepening reform and openness China's central local relations is increasingly functioning on federalist principles Federalism as a functioning system in China is under studied The author

defines the political system existing in China as OC de facto federalismOCO and provides a detailed analysis of its sources and dynamics in the book The system is mainly driven by two related factors OCo inter governmental decentralization and globalization While economic decentralization since the 1980s has led to the formation of de facto federalism globalization since the 1990s has accelerated this process and generated increasingly high pressure on the Chinese leadership to institutionalize de facto federalism by various measures of selective recentralization Explaining Chinese Democratization Shaohua Hu,2000-01-30 Hu seeks to explain China s failure to establish a democratic system He demonstrates both continuity and change in China s democratization process Modern China regards power and wealth as primary goals and treats a strong state as a major means to these ends Such a preference puts democracy on a back burner Employing a theoretical framework which consists of five factors historical legacies local forces the world system socialist values and economic development Hu shows that while all of these factors were at work in all eras each assumes a special significance in a particular period Traditional China before the 1911 Revolution attempted to adjust itself to a new Western dominated world In the Republican era the control of local forces topped the political agenda Nationalist China sought to survive and develop in the world system while Maoist China set for itself the task of building a socialist state And of course economic development has been the priority of the Deng era As Hu shows these five factors have had determining impacts on the long struggle for democracy in China **Modern China** Bruce A. Elleman,S. C. M. **The Chinese State in the Era of Economic Reform : the Road to Crisis** Jay D White, 2016-09-16 Presents ten tales featuring Lord Bau a wise judge who was a champion of righteousness and protector of the weak against the powerful

China, State Sovereignty and International Legal Order Phil C.W. Chan, 2015-05-19 China's rise has aroused apprehension that it will revise the current rules of international order to pursue and reflect its power and that in its exercise of State sovereignty it is unlikely to comply with international law This book

explores the extent to which China's exercise of State sovereignty since the Opium War has shaped and contributed to the legitimacy and development of international law and the direction in which international legal order in its current form may proceed. It examines how international law within a normative institutional framework has moderated China's exercise of State sovereignty and helps mediate differences between China's and other States' approaches to State sovereignty such that State sovereignty and international law may be better understood.      **Translation and Minority** Lawrence

Venuti, 2016-04-29 The premise of this volume is a question: What can the concept of minority bring to the practice and study of translation? Minority is understood here to mean a cultural or political position that is subordinate, whether the social context that so defines it is local, national, or global. This position is occupied by languages and literatures that lack prestige or authority, the non-standard and the non-canonical, what is not spoken or read much by a hegemonic culture. Yet minorities also include the nations and social groups that are affiliated with these languages and literatures, the politically weak or underrepresented, the colonized and the disenfranchised, the exploited and the stigmatized. Translation today is itself a minor use of language, a lesser art, an invisible craft that commands less cultural capital and fewer legal privileges than original composition. Yet the focus in this collection is not on what translators worldwide have in common, but on the distinctive forms that translating takes when it is done by or on behalf of minorities. The articles in this volume present a variety of case studies that illuminate the linguistic and cultural problems posed by such translating, as well as the economic and political agendas it has served. Together, these pieces show that the concept of minority is worth exploring because it inspires innovation in translation practice and research. Minor cultures are coincident with new translation strategies, new translation theories, and new syntheses of the diverse methodologies that constitute the discipline of translation studies.
