**China's Military Procurement in the Reform Era** Yoram Evron, 2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping Jiang Zemin and Hu Jintao It shows how China s political and military leaders have sought to adjust military procurement policy to meet China s strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation s military procurement it traces the considerations and negotiations among China s civilian and military leaderships By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China s military procurement directions as well as their limitations prospects and operational implications As the first book to study comprehensively and systematically the attributes shaping China s military procurement it will be of great interest to students and scholars of Chinese politics Chinese history and military and strategic studies *2007 Report to Congress of the U.S.-China Economic and Security Review Commission, November 2007,*

Bush, Michael E. O'Hanlon, 2007-04-01 Nobody approaches the objectivity and precision of Bush and O Hanlon when it comes to analysis of the military and political dimensions of the Taiwan issue This is one challenge that U S policymakers and military strategists cannot afford to get wrong and scholars cannot afford to ignore Michael Green former Senior Director for Asian Affairs National Security Council The Showdown to Come In 1995 during a heated discussion about that year s Taiwan crisis a Chinese general remarked to a U S diplomat In the end you care more about Los Angeles than you do about Taipei In a single sentence he both questioned the level of America s commitment to a longtime ally and threatened massive perhaps nuclear retaliation should the United

States intervene militarily on Taiwan's behalf. In the end, President Clinton sent two aircraft carriers to the region and China ceased its military exercises in the Taiwan Strait. A decade later, however, China is much stronger both economically and militarily and it holds a significant amount of America's national debt. If another Taiwan crisis should occur, as it almost certainly will, would China back down? In a war like no other, you'll discover how little it would take to transform the close cooperation and friendly rivalry between the United States and the People's Republic of China into the first ever shooting war between two nuclear powers. This chilling look into one possible future offers thoughtful advice to both governments on how to reduce the chances of such a nightmare actually occurring. Two Brookings Institution scholars offer specific prescriptions on how the two nations can improve communications especially in times of crisis, avoid risky behavior even when provoked, and above all, remember which buttons not to push.

**The US-China Military and Defense Relationship during the Obama Presidency** James Johnson, 2018-04-28. This book offers a timely and compelling explanation for the deterioration of U.S.-China security relations during the Obama Presidency. The U.S.-China relationship has become one of, if not the most vital features of contemporary world politics, and with the arrival of Donald Trump to the White House in 2017, this vital geopolitical relationship sits at a precarious and dangerous crossroads. This book assesses a wide array of sources to systematically unpack the policy rhythms, drivers, and dynamics that defined the course of Sino-American security relations during the Obama era. It fills several gaps in the literature on international security and conflict and offers a nuanced and innovative comparative approach to examine individual military domains. The case study chapters draw on recent Chinese and English sources on military doctrine, capabilities, and defense strategy to build a clear understanding of the main sources of U.S.-China misperceptions and highlight the problems these assessments can create for the conduct of statecraft across strategically competitive geopolitical dyads. The book builds a sobering picture of U.S.-China relations that will appeal to specialists and generalists alike with an interest in future warfare, emerging military technologies, military studies, arms control, and foreign policy issues in the Asia-Pacific region more broadly.

**PLA Influence on China's National Security Policymaking** Phillip C. Saunders, Andrew Scobell, 2015-09-09. In recent years, there have been reports of actions purportedly taken by People's Liberation Army (PLA) units without civilian authorization and of Chinese Communist Party (CCP) civilian leaders seeking to curry favor with the military, suggesting that a nationalistic and increasingly influential PLA is driving more assertive Chinese policies on a range of military and sovereignty issues. To many experienced PLA watchers, however, the PLA remains a party army that is responsive to orders from the CCP. PLA Influence on China's National Security Policymaking seeks to assess the real relationship between the PLA and its civilian masters by moving beyond media and pundit speculation to mount an in-depth examination and explanation of the PLA's role in national security policymaking. After examining the structural factors that shape PLA interactions with the Party-State, the book uses case studies to explore the PLA's role in foreign policy crises. It then assesses the PLA's role in China's territorial disputes and in military

interactions with civilian government and business exploring the military's role in China's civil-military integration development strategy. The evidence reveals that today's PLA does appear to have more influence on purely military issues than in the past but much less influence on political issues and to be more actively engaged in policy debates on mixed civil-military issues where military equities are at stake.

**Handbook of Military Administration** Jeffrey A. Weber, Johan Eliasson, 2007-12-07 While policy makers are perpetually conceptualizing new reform packages the actual enactment of those reforms is typically more challenging. Remarkably the one public institution that is able to meet that challenge is also the largest: The United States Department of Defense which employs over 600 000 people and deals with 500 billion in funding.

**Shaping China's Security Environment** Andrew Scobell, Larry M. Wortzel, 2006 The contributions contained herein address the role of the Chinese military in shaping its country's security environment. Of course the PLA itself is shaped and molded by both domestic and foreign influences. In the first decade of the 21st century the PLA is not a central actor in China's foreign policy the way it was just a few decades ago. Nevertheless the significance of the PLA must be understood. The military remains a player that seeks to play a role and influence China's policy towards such countries and regions as the United States, Japan, the Koreas, Southeast Asia, South Asia and of course Taiwan. It is important not to overlook that in times of crisis or conflict the role and influence of the PLA rise significantly.

**China at the Beginning of the 21st Century** Łukasz Gacek, Ewa Trojnar, 2014 China at the beginning of the 21st century intrigues many researchers around the world. The problems discussed within this volume provide the readers with a background of most vital issues in modern China. They are related to the challenges of the Chinese society and state's international skirmishes which is depicted by the book's division into two separate parts. While the first part provides the insight into social change creating tremendous opportunities and no less significant threats for the country's future development the second part looks further and beyond borders to focus our attention on security issues.

**China's Military Power** Roger Cliff, 2015-09-15 This book provides a comprehensive assessment of China's military capabilities in 2000 and 2010 with projections for 2020. Recognizing that military power encompasses more than weaponry it develops an original empirical framework for measuring militaries that also includes doctrine, training and organizational structure.

**Why Taiwan? Geostrategic Rationales for China's Territorial Integrity** Alan M. Wachman, 2008 Why has the PRC been so determined that Taiwan be part of China? Why since the 1990s has Beijing been feverishly developing means to prevail in combat with the U.S. over Taiwan's status? Why is Taiwan worth fighting for? To answer this book focuses on the territorial dimension of the Taiwan issue and highlights arguments made by PRC analysts about the geostrategic significance of Taiwan rather than emphasizing the political dispute between Beijing and Taipei. It considers Beijing's quest for Taiwan since 1949 against the backdrop of recurring Chinese anxieties about the island's status since the seventeenth century.
