

## Modest Proposals for a Lunar Base After 2024

Woohyun Kang

### Research Question

What is an appropriate framework for a sustainable lunar base that is cost-conscious, ensures mission success, and holds 100 researchers to survive and study the Moon?

### Abstract

As humanity's natural inclination to explore pushes society to advance, the National Aeronautics and Space Administration(NASA) plans to land humans back on the Moon in 2024 [1]. A research base situated on the Moon will bring humanity into a new phase of interplanetary civilization. Such a project will generate new frontiers for exploration, economic opportunities, and inspire a new generation of scientifically minded people [1]. A lunar base is proposed for construction after the completion of the Artemis III mission. Vital components required for supporting 100 permanent residents on the Moon include residence, transportation, satellites, and agriculture infrastructure. The south pole of the Moon is the location considered for this lunar base. The Foundational Surface Habitat (FSH), Lunar Terrain Vehicle (LTV), Habitable Mobility Platform (HMB), solar sail satellites, and the Gateway space station are main lunar technologies that will be used in the lunar base after 2024 [2, 3]. In the lunar base, the atmosphere composition of a pressurized residence facility must be oxygen/nitrogen based on abundance and cost. Nitrogen is best sourced from Earth through nitrogen generators due to its absence on the Moon, and oxygen is best sourced from cold ice traps on the south pole. Depending on the area of ice considered, the available amount for breathing varies from 240 years' worth to 3.9 millions years' worth of oxygen. The astronauts would receive food to meet a daily caloric requirement calculated per person based on biological measurements, and the World Health Organization (WHO) provides accurate mineral and vitamin intake information [4, 5]. The average required nutrients in calories for astronauts per male per day is 2968 kcal and per female per day is 2465.75 kcal. The base provides equipment and space such that astronauts can exercise at least 2 hours a day to counteract the weak gravity of the moon. Agriculture would employ hydroponics and aeroponics. Spinach, leek, and peas are recommended crops due to their high amounts of vital nutrients such as protein [6].

*The Battle for the Soul of Capitalism* John C. Bogle,2005-01-01 The founder and former chief executive of the Vanguard mutual funds argues for a return to a governance structure in which owners capital that has been put at risk is used in their interests rather than in the interests of corporate and financial managers **Multitude**

Michael Hardt,Antonio Negri,2005-07-26 In their international bestseller *Empire* Michael Hardt and Antonio Negri presented a grand unified vision of a world in which the old forms of imperialism are no longer effective But what of *Empire* in an age of American empire Has fear become our permanent condition and democracy an impossible dream Such pessimism is profoundly mistaken the authors argue *Empire* by interconnecting more areas of life is actually creating the possibility for a new kind of democracy allowing different groups to form a multitude with the power to forge a democratic alternative to the present world order Exhilarating in its optimism and depth of insight *Multitude* consolidates Hardt and Negri s stature as two of the most important political philosophers at work in the world today *Intimacy and Mission* Luther E. Smith,2007-07-01

Is radical discipleship really possible today With all the competing demands we face can the church empower us to fully respond to God s call Can the church rise far enough above the demands of institutional survival to live out a radical gospel *Intimacy and Mission* invites readers into Christian communities working at answering such questions The author offers a carefully researched yet accessible study of five religious communities Church of the Messiah Koinonia Partners Patchwork Central Sojourners and Voice of Calvary He shows how the experience of these communities can help local congregations discern possibilities for radical discipleship By revealing not only the strengths of intentional community but also the struggles experienced by each of the five communities Smith has also created a fascinating human interest narrative

**Literature as Dialogue** Roger D. Sell,2014-08-15 How is it that some texts achieve the status of literature Partly at least because the relationship they allow between their writers and the people who respond to them is fundamentally egalitarian This is the insight explored by members of the bo literary communication network who in this new book develop fresh

approaches to literary works of widely varied provenance The authors examined have written in Ancient Greek T'ing Dynasty Chinese Middle Modern and Contemporary English German Romanian Polish Russian and Hebrew But each and every one of them is shown as having offered their human fellows something which despite some striking appearances to the contrary amounts to a welcoming invitation This their audiences have then been able to negotiate in a spirit of dialogical interchange Part I of the book poses the question How in offering their invitation have writers respected their audiences human autonomy This is the province of what bo scholars call communicational criticism Part II asks how an audience negotiating a literary invitation can be encouraged to respect the human autonomy of the writer who has offered it In bo parlance such encouragement is the task of mediating criticism These two modes of criticism naturally complement each other and in their shared concern for communicational ethics ultimately seek to further a post postmodern world that would be global without being hegemonic

**Social Justice, Global Dynamics** Ayelet Banai,Miriam Ronzoni,Christian Schemmel,2011-04-06 Many theoretical publications make assumptions about the facts of globalization and in particular about the role and autonomy of the nation state These factual claims and assumptions often play an important role in justifying the normative conclusions yet remain under explored This interdisciplinary volume examines questions that are central to the problems of both social and international justice and in particular to their interdependence How do global and transnational factors influence the capacity of states to be internally just Has the state lost its capacity for autonomous action in the global economy and thus its ethical significance for theories of justice If so which institutional reforms could address this problem What is the role of the state in a just international order The authors address important connections between domestic social justice and global dynamics by identifying problematic practices and trends in the current global order They examine political economic and legal changes and offer normative views on concrete policies and institutions that are particularly important and or problematic i e international health policies the World Bank taxation policies and the World Trade Organization Focusing on the relationship between social and global justice and establishing connections between political theory and empirical research this book is vital reading for students and scholars of Politics International Relations and Development Studies

**European Citizenship : National Legacies and Transnational Projects** Klaus Eder,Berhard Giesen,2001-02-01 Is there a common ground on which a European citizenship can be constructed This volume looks at four foundations of citizenship in Europe the legacy of national identities current designs and projects for social and political citizenship in Europe a transitional public space as the basis of an active European Citizenship in Europe

and a transitional collective identity as a symbolic boundary marker for European citizenship Such options raise the theoretical question of how to conceive citizenship in a transnationalizing world Since the idea of European citizenship cannot escape the problem of defining who is a European citizen and who is not the theoretical problem is tackled by defining the collective bonds of European citizens beyond primordial or traditional bonds that have dominated European history A Political Biography of Jonathan Swift David Oakleaf,2015-10-06 Most famous as the author of Gulliver s Travels Jonathan Swift 1667 1745 was one of the most important propagandists and satirists of his day This study seeks to contextualize Swift within the political arena of his day Speaking of Profit William T. Rowe,2020-10-26 In the first half of the nineteenth century the Qing Empire faced a crisis It was broadly perceived both inside and outside of government that the prosperous age of the eighteenth century was over Bureaucratic corruption and malaise population pressure and food shortages ecological and infrastructural decay domestic and frontier rebellion adverse balances of trade and eventually a previously inconceivable foreign threat from the West seemed to present hopelessly daunting challenges This study uses the literati reformer Bao Shichen as a prism to understand contemporary perceptions of and proposed solutions to this general crisis Though Bao only briefly and inconsequentially served in office himself he was widely recognized as an expert on each of these matters and his advice was regularly sought by reform minded administrators From examination of his thought on bureaucratic and fiscal restructuring agricultural improvement the grain tribute administration the salt monopoly monetary policy and foreign relations Bao emerges as a consistent advocate of the hard nosed pursuit of material profit in the interests not only of the rural populace but also of the Chinese state and nation anticipating the arguments of self strengthening reformers later in the century
