Modifying Man Craig W. Ellison, 1978 Based on papers presented at the International Conference on Human Engineering and the Future of Man July 21-24 1975 Wheaton College Wheaton Ill      Changing Human Nature James Peterson, 2010-10-22 Nature around us and indeed our own human nature are constantly changing The question before us then is not if there will be change but rather whether we will be conscious and conscientious about the course of that change In Changing Human Nature James Peterson helps us to think through what our part should be from a Christian perspective

Cloning Human Beings: Commissioned papers United States. National Bioethics Advisory Commission, 1997      **Cloning Human Beings** United States. National Bioethics Advisory Commission, 1997      ThirdWay, 1978-06-15 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture      The Reality of Christian Learning Harold Heie, David L. Wolfe, 2004-01-20 Building on foundational studies on the relationship of faith and learning this book presents concrete examples of ways in which a Christian perspective can be brought to bear on scholarship in various academic disciplines The editors present a typology of various strategies for faith discipline integration which are then exemplified by two essays in each of seven disciplines political science sociology psychology biology mathematics the arts and philosophy In each discipline a principal essayist addresses a significant issue from a Christian perspective a respondent then analyzes that essay suggesting at least one alternative approach      Ethical Issues in Psychosurgery John Kleinig, 2022-02-26 First published in 1985 Ethical Issues in Psychosurgery examines the continuing debate surrounding the treatment of psychiatric disorder by psychosurgery and its ethical implications Psychosurgery represents a radical treatment and it therefore raises in a particularly acute and challenging fashion questions which are implicit In most therapy The book offers a focussed study in bioethics a model for bioethical inquiry as well as introduction to some of the major problems in bioethics These range from detailed discussions of informed consent the sanctity of the brain and the use of experimental therapies to wider questions of social contract and professionalization John Kleinig's balanced and informed treatment of the questions will make this book invaluable not only to those concerned with the philosophy of legal and medical ethics but also to those in the fields of psychiatric practice and research      The Ethics of Nanotechnology, Geoengineering, and Clean Energy Andrew Maynard, Jack Stilgoe, 2020-07-26 Nanotechnology clean technology and geoengineering span the scale of human ingenuity from the imperceptibly small to the unimaginably large Yet they are united by a commonality of ethics that permeates how and why they are developed and how the resulting consequences are managed The articles in this volume provide a comprehensive account of current thinking around the ethics of development and use within each of the technological domains and addresses challenges and opportunities that cut across all three In particular the collection provides unique insights into the ethics of noumenal technologies technologies that are impossible to see or detect or conceive of with human senses or conventional tools This collection will be of relevance to anyone who is

actively involved with ensuring the responsible and sustainable development of nanotechnology geoengineering or clean technology
