British Museum Catalogue of printed Books, 1892 **Escritos sobre ciencia y género** Antonio Francisco Canales Serrano, Amparo Gómez Rodríguez, 2019-07-11 Es posible una ciencia sin sesgos de ningún tipo Tendemos a pensar en la ciencia como una herramienta infalible de estudio del ser humano Sin embargo hay quienes la entienden como un producto en sí mismo permeable a los valores que imperan en cada momento Por desgracia sabemos que existen malas ciencias que han servido como herramienta para justificar las distintas opresiones y discriminaciones que la sociedad ha llevado a cabo a lo largo de su historia Los diversos artículos de este libro firmados por la desaparecida Amparo Gómez Rodríguez abordan sesgos malos prácticos y terrenos inexplorados de la ciencia desde la perspectiva de género Esta obra nace del deseo de recopilar algunos de los mejores textos de la filosofía muchos de los cuales publicados a lo largo de los noventa en medios locales siguen siendo textos de referencia con el fin de visibilizarlos y facilitar su uso Fundadora del Centro de Estudios de la Mujer en la Universidad de La Laguna y directora de la revista Clepsydra de estudios feministas Amparo persiguió tanto la crítica fundamentada a la ciencia ya hecha y pensada por hombres como la búsqueda y creación de una nueva ciencia feminista y escrita por mujeres Una ciencia que permita a las mujeres pensarse a sí mismas que aborde el objeto de estudio desde una perspectiva objetiva que incluya epistemologías diferentes y que busque respuestas a preguntas formuladas por sujetos con modos de pensar distintos pues como se afirma entre estas páginas los problemas que pueden interesar a todo el mundo no tienen que ser los de los hombres blancos Creer lo contrario supone dejar inexplicadas muchas cuestiones y aspectos de las cosas fundamentales

Proceedings of the Academy of Natural Sciences of Philadelphia , 1881 *Making Pre-Algebra Come Alive* Alfred S. Posamentier, 2000-07-21 Activities in Pre Algebra is a set of versatile enrichment exercises that covers a very broad range of mathematical topics and applications from the Moebius strip to the googol Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we want this book to achieve the goal of being attractive to people who thought they didn't like mathematics To accomplish this it is necessary for the activities to be quite different from what students encounter in their basal texts different in both substance and form This seems especially critical no matter how excellent a basal text is being used nearly every class experiences the blahs Unfortunately this sort of boredom is often well entrenched long before the teacher and perhaps even the students are aware of it Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject
