Mogollon Culture In The Forestdale Valley East Central Arizona:

Mogollon Culture in the Forestdale Valley, East-central Arizona Emil Walter Haury, 1985-04 Classic site reports establish the Mogollon on their own cultural track distinct from the Anasazi and also document the earliest known association of tree ring dates with pottery in the Southwest

Mogollon Culture in the Forestdale Valley, East-Central Arizona Emil W. Haury, 2015-11-01 Forestdale did more than any other single area to validate the emerging concept of a separate Mogollon culture and in this compilation Haury provides the reader with not only the complete archaeological picture of this valley but also the history of the development of the concept Any Southwestern archaeologist and readers who want to stay abreast of the details of North American prehistory should read this book American Antiquity Classic site reports establish the Mogollon on their own cultural track distinct from the Anasazi and also document the earliest known association of tree ring dates with pottery in the Southwest The excavations of Mogollon sites reported on in this volume were conducted at the early 1939 1941 field schools in Forestdale Arizona

Excavations in the Forestdale Valley Emil Walter Haury, 1941

Ancient Burial Practices in the American Southwest Douglas R. Mitchell, Judy L. Brunson-Hadley, 2001 Prehistoric burial practices provide an unparalleled opportunity for understanding and reconstructing ancient civilizations and for identifying the influences that helped shape them

The Archaeology of Tribal Societies William A. Parkinson, 2002-03-01 Anthropological archaeologists have long attempted to develop models that will let them better understand the evolution of human social organization In our search to understand how chiefdoms and states evolve and how those societies differ from egalitarian bands we have neglected to develop models that will aid the understanding of the wide range of variability that exists between them This volume attempts to fill this gap by exploring social organization in tribal or autonomous village societies from several different ethnographic ethnohistoric and archaeological contexts from the Pre Pottery Neolithic Period in the Near East to the contemporary Jivaro of Amazonia

Religion in the Prehispanic Southwest Todd L. VanPool, Christine S. VanPool, David A. Phillips Jr., 2007-01-19 Religion mattered to the prehistoric Southwestern people just as it matters to their descendants today Examining the role of religion can help to explain architecture pottery agriculture even commerce But archaeologists have only recently developed the theoretical and methodological tools with which to study this topic Religion in the Prehispanic Southwest marks the first book length study of prehistoric religion in the region Drawing on a rich array of empirical approaches the contributors show the importance of understanding beliefs and ritual for a range of time periods and southwestern societies For professional and avocational archaeologists for religion scholars and students Religion in the Prehispanic Southwest represents an important contribution

The Architecture of Chaco Canyon, New Mexico Stephen H. Lekson, 2007-06-13 A fresh volume on the ancient structures of Chaco Canyon built by native peoples between AD 850 and 1130 that unifies older information on the area with new advanced research techniques focusing on studies of technology and building types analyses of architectural change and

readings of the built environment aided by over 150 maps floor plans elevations and photos **House of Rain** Craig Childs,2007-02-22 A beautifully written travelogue that draws on the latest scholarly research as well as a lifetime of exploration to light on the extraordinary Anasazi culture of the American Southwest Entertainment Weekly The greatest unsolved mystery of the American Southwest is the fate of the Anasazi the native peoples who in the eleventh century converged on Chaco Canyon in today s southwestern New Mexico and built what has been called the Las Vegas of its day a flourishing cultural center that attracted pilgrims from far and wide a vital crossroads of the prehistoric world The Anasazis accomplishments in agriculture in art in commerce in architecture and in engineering were astounding rivaling those of the Mayans in distant Central America By the thirteenth century however the Anasazi were gone from Chaco Vanished What was it that brought about the rapid collapse of their civilization Was it drought pestilence war forced migration mass murder or suicide For many years conflicting theories have abounded Craig Childs draws on the latest scholarly research as well as on a lifetime of adventure and exploration in the most forbidding landscapes of the American Southwest to shed new light on this compelling mystery **Archaeology of Prehistoric Native America** Guy E. Gibbon,2022-01-26 First published in 1998 Did prehistoric humans walk to North America from Siberia Who were the inhabitants of the spectacular Anasazi cliff dwellings in the Southwest and why did they disappear Native Americans used acorns as a major food source but how did they get rid of the tannic acid which is toxic to humans How does radiocarbon dating work and how accurate is it Written for the informed lay person college level student and professional Archaeology of Prehistoric Native America An Encyclopedia is an important resource for the study of the earliest North Americans including facts theories descriptions and speculations on the ancient nomads and hunter gathers that populated continental North America **The Origin and Development of the Pueblo Katsina Cult** E. Charles Adams,2017-05-23 A series of meditations from the renowned gardening writer on her backyard desert Southwest garden offers readers sixteen essays on nature wildlife and the meaning of life By the author of A Sense of Place **Connected Communities** Matthew A. Peeples,2018-02-20 The Cibola region on the Arizona New Mexico border has fascinated archaeologists for more than a century The region s core is recognized as the ancestral homeland of the contemporary Zuni people and the area also spans boundaries between the Ancestral Puebloan and Mogollon culture areas The complexity of cross cutting regional and cultural designations makes this an ideal context within which to explore the relationship between identity and social change at broad regional scales In Connected Communities Matthew A Peeples examines a period of dramatic social and political transformation in the ancient Cibola region ca A D 1150 1325 He analyzes archaeological data generated during a century of research through the lens of new and original social theories and methods focused on exploring identity social networks and social transformation In so doing he demonstrates the value of comparative synthetic analysis The book addresses some of the oldest enduring questions in archaeology How do large scale social identities form How do they change How can we study such processes using material remains Peeples approaches these

questions using a new set of methods and models from the broader comparative social sciences relational sociology and social networks to track the trajectories of social groups in terms of both networks of interactions relations and expressions of similarity or difference categories He argues that archaeological research has too often conflated these different kinds of social identity and that this has hindered efforts to understand the drivers of social change In his strikingly original approach Peeples combines massive amounts of new data and comparative explorations of contemporary social movements to provide new insights into how social identities formed and changed during this key period

The Sociopolitical Structure Of Prehistoric Southwestern Societies Steadman Upham, Kent G Lightfoot, Roberta A. Jewett, 2019-06-26 This book examines current archaeological approaches for studying the organizational structure of prehistoric societies in the American Southwest It presents the historical background of the divergent theoretical models that have been used to interpret Southwestern socio political organizations

Western Pueblo Identities Andrew I. Duff, 2016-12-15 Identifying distinct social groups of the past has always challenged archaeologists because understanding how people perceived their identity is critical to the reconstruction of social organization Material culture has been the standard measure of distinction between groups and the distribution of ceramics and other artifacts has often been used to define group boundaries Western Pueblo Identities argues that such an approach is not always appropriate demographic and historical factors may affect the extent to which material evidence can define such boundaries Andrew Duff now examines a number of other factors relationships among settlement size regional population densities the homogeneity of material culture and local and long distance exchange in order to trace the history of interaction and the formation of group identity in east central Arizona and west central New Mexico from A D 1275 to 1400 Using comparative data from the Upper Little Colorado and Zuni regions Duff demonstrates differences in patterns of interaction within and between regions with different population densities He then links these differences to such factors as occupational history immigrant populations the negotiation of social identities and the emergence of new ritual systems Following abandonments in the Four Corners area in the late 1200s immigrants with different historical backgrounds occupied many Western Pueblo regions in contrast to the Hopi and Zuni regions which had more stable populations and deeper historical roots Duff uses chemical analyses of ceramics to document exchange among several communities within these regions showing that people in less densely settled regions were actively recruited by residents of the Hopi and Zuni regions to join their settlements By the time of the arrival of the Spaniards two distinct social and territorial groups the Hopi and Zuni peoples had emerged from this scattering of communities Duff s new interpretations along with new data on ceramic exchange patterns suggest that interaction is a better way to measure identity than more commonly used criteria His work offers new perspectives on the role of ritual in social organization and on identity formation in Pueblo IV society and is rich in implications for the study of other sedentary middle range societies

Religious Transformation in the Late Pre-Hispanic Pueblo World Donna M. Glowacki, Scott Van Keuren, 2012-02-01 The mid

thirteenth century AD marks the beginning of tremendous social change among Ancestral Pueblo peoples of the northern US Southwest that foreshadow the emergence of the modern Pueblo world Regional depopulations long distance migrations and widespread resettlement into large plaza oriented villages forever altered community life Archaeologists have tended to view these historical events as adaptive responses to climatic environmental and economic conditions Recently however more attention is being given to the central role of religion during these transformative periods and to how archaeological remains embody the complex social practices through which Ancestral Pueblo understandings of sacred concepts were expressed and transformed The contributors to this volume employ a wide range of archaeological evidence to examine the origin and development of religious ideologies and the ways they shaped Pueblo societies across the Southwest in the centuries prior to European contact With its fresh theoretical approach it contributes to a better understanding of both the Pueblo past and the anthropological study of religion in ancient contexts This volume will be of interest to both regional specialists and to scholars who work with the broader dimensions of religion and ritual in the human experience

Pushing Boundaries in Southwestern Archaeology Stephen E. Nash, Erin L. Baxter, 2023-04-07 Pushing Boundaries in Southwestern Archaeology draws together the proceedings from the sixteenth biennial Southwest Symposium In exploring the conference theme contributors consider topics ranging from the resuscitation of archaeomagnetic dating to the issue of Athapaskan origins from collections based studies of social identity foodways and obsidian trade to the origins of a rock art tradition and the challenges of a deeply buried archaeological record The first of the volume s four sections examines the status history and prospects of Bears Ears National Monument the broader regulatory and political boundaries that complicate the nature and integrity of the archaeological record and the cultural contexts and legal stakes of archaeological inquiry The second section focuses on chronological big data in the context of pre Columbian history and the potential and limits of what can be empirically derived from chronometric analysis of the past The chapters in the third section advocate for advancing collections based research focusing on the vast and often untapped research potential of archives previously excavated museum collections and legacy data The final section examines the permeable boundaries involved in Plains Pueblo interactions obvious in the archaeological record but long in need of analysis interpretation and explanation Contributors James R Allison Erin Baxter Benjamin A Bellorado Katelyn J Bishop Eric Blinman J Royce Cox J Andrew Darling Kaitlyn E Davis William H Doelle B Sunday Eiselt Leigh Anne Ellison Josh Ewing Samantha G Fladd Gary M Feinman Jeffrey R Ferguson Severin Fowles Willie Grayeyes Matthew Guebard Saul L Hedquist Greg Hodgins Lucas Hoedl John W Ives Nicholas Kessler Terry Knight Michael W Lindeman Hannah V Mattson Myles R Miller Lindsay Montgomery Stephen E Nash Sarah Oas Jill Onken Scott G Ortman Danielle J Riebe John Rupple Will G Russell Octavius Seowtewa Deni J Seymour James M Vint Adam S Watson *New Approaches to Old Stones* Yorke M. Rowan, Jennie R. Ebeling, 2016-04-08 Ground stone artefacts were widely used in food production in prehistory However the archaeological community has widely neglected the

dataset of ground stone artefacts until now New Approaches to Old Stones offers a theoretical and methodological analysis of the archaeological data pertaining to ground stone tools The essays draw on a range of case studies from the Levant Egypt Crete Anatolia Mexico and North America to examine ground stone technologies From medieval Islamic stone cooking vessels and late Minoan stone vases to the use of stone in ritual and as a symbol of luxury New Approaches to Old Stones offers a radical reassessment of the impact of ground stone artefacts on technological change production and exchange

Archaeology of Performance Takeshi Inomata, Lawrence S. Cohen, 2006-03-09 Performances in the premodern communities shaped identities created meanings generated and maintained political control But unlike other social scientists archaeologists have not worked much with these concepts Archaeology of Performance shows how the notions of theatricality and spectacle are as important economics and politics in understanding how ancient communities work Without sacrificing conceptual rigor the contributors draw on the wide ranging literature on performance Without sacrificing material evidence they try to see how performance creates meaning and ideology Drawing on evidence from societies large and small Archaeology of Performance offers an important new way of understanding ancient theaters of power

Southwest Archaeology in the Twentieth Century Linda S Cordell, Don D Fowler, 2005-11-10 Mesa Verde Chaco Canyon Canyon de Chelly and Paquim are well known to tourists and scholars alike as emblems of the American Southwest This region has been the scene of intense archaeological investigations for more than a hundred years with more research done here than in any other part of the United States With contributions from well known archaeologists Southwest Archaeology in the Twentieth Century reviews the histories of major archaeological topics of the region during the twentieth

century giving particular attention to the vast changes in southwestern archaeology during the later decades of the century. Included are the huge influence of field schools, the rise of cultural resource management (CRM), the uses and abuses of ethnographic analogy, the intellectual contexts of archaeology in Mexico, and current debates on agriculture, sedentism, and political complexity. This book provides an authoritative retrospective of intellectual trends as well as a synthesis of current themes in the arena of the American Southwest.
