Mohammed Charlemagne And The Origins Of Europe:

Mohammed, Charlemagne & the Origins of Europe Richard Hodges, David Whitehouse, 1983 In this concise book Richard Hodges and David Whitehouse review the Pirenne thesis in the light of archaeological information from northern Europe the Mediterranean and western Asia Mohammed, Charlemagne, and the Origins of Europe Richard Hodges, 1983

Mohammed, Charlemagne & the Origins of Europe Richard Hodges, David Whitehouse, 1983 *Mohammed, Charlemagne, & the Origins of Europe* Richard Hodges, David Whitehouse, 1983 Mohammed, Charlemagne and the Origins of Europe Richard Hodges, David Whitehouse, 1983 No Marketing Blurb Mohammed & Charlemagne Revisited Emmet Scott, 2012-01 During the 1920s Belgian historian Henri Pirenne came to an astonishing conclusion the ancient classical civilization which Rome had established throughout Europe and the Mediterranean world was not destroyed by the Barbarians who invaded the western provinces in the fifth century it was destroyed by the Arabs whose conquest of the Middle East and North Africa terminated Roman civilization in those regions and cut off Europe from any further trading and cultural contact with the East According to Pirenne it was only in the mid seventh century that the characteristic features of classical life disappeared from Europe after which time the continent began to develop its own distinctive and somewhat primitive medieval culture Pirenne's findings published posthumously in his *Mohammed et Charlemagne* 1937 were even then highly controversial for by the late nineteenth century many historians were moving towards a quite different conclusion namely that the Arabs were actually a civilizing force who rekindled the light of classical learning in Europe after it had been extinguished by the Goths Vandals and Huns in the fifth century And because Pirenne went so diametrically against the grain of this thinking the reception of his new thesis tended to be hostile Paper after paper published during the 1940s and 50s strove to refute him The most definitive rebuttal however appeared in the early 1980s This was *Mohammed Charlemagne and the Origins of Europe* by English archaeologists Richard Hodges and David Whitehouse These in common with Pirenne's earlier critics argued that classical civilization was already dead in Europe by the time of the Arab conquests and that the Arabs arrived on the scene as civilizers rather than destroyers Hodges and Whitehouse claimed that the latest findings of archaeology fully supported this view and their work was highly influential So influential indeed that over the next three decades Pirenne and his thesis was progressively sidelined so that recent years have seen the publication of dozens of titles in the English language alone which fail even to mention his name In *Mohammed and Charlemagne Revisited* historian Emmet Scott reviews the evidence put forward by Hodges and Whitehouse as well as the more recent findings of archaeology and comes to a rather different conclusion For him the evidence shows that classical civilization was not dead in Europe at the start of the seventh century but was actually experiencing something of a revival Populations and towns were beginning to grow again for the first time since this second century a development apparently attributable largely to the spread of Christianity In addition the real centres of classical civilization in the Middle East were experiencing an unprecedented

Golden Age at the time with cities larger and more prosperous than ever before Excavation has shown that these were destroyed thoroughly and completely by the Arab conquests with many never again reoccupied And it was precisely then says Scott that Europe s classical culture also disappeared with the abandonment of the undefended lowland villas and farms of the Roman period and a retreat to fortified hilltop settlements the first medieval castles For Scott archaeology demonstrated that the Arabs did indeed blockade the Mediterranean through piracy and slave raiding precisely as Pirenne had claimed and he argues that the disappearance of papyrus from Europe was an infallible proof of this Whatever classical learning survived after this time says Scott was due almost entirely to the efforts of Christian monks The Pirenne thesis has taken on a new significance in the post 9 11 world Scott s take on the theory will certainly ignite further and perhaps heated debate

Mohammed and Charlemagne Henri Pirenne,2001-08-28 Remarkable classic that developed the revolutionary theory of how the advance and influence of Islam caused the Europe of the Roman Empire to evolve into the Europe of the Middle Ages An important seminal book worthy to close one of the most distinguished careers in European scholarship Saturday Review of Literature **Mohammad, Charlemagne and the Origins of Europe** Richard Hodges,David Whitehouse,1983

Origins of the European Economy Michael McCormick,2001 For fifty years debate has raged about early European commerce during the period between antiquity and the middle ages Was there trade If so in what and with whom New evidence and new ways of looking at old evidence are now breaking the stalemate Analysis of communications the movements of people ideas and things is transforming our vision of Europe and the Mediterranean in the age of Charlemagne and Harun al Rashid This is the first comprehensive analysis of the economic transition during this period for over sixty years Using new materials and new methodology it will attract all social and economic historians of antiquity and the middle ages and anyone concerned with the origins of Europe the history of the slave trade medicine and disease cross cultural contacts and the Muslim and Byzantine worlds [God's Crucible: Islam and the Making of Europe, 570-1215](#) David Levering Lewis,2009-01-12 From the two time Pulitzer Prize winning author God s Crucible brings to life a furiously complex age New York Times Book Review Resonating as profoundly today as when it was first published to widespread critical acclaim a decade ago God s Crucible is a bold portrait of Islamic Spain and the birth of modern Europe from one of our greatest historians David Levering Lewis s narrative filled with accounts of some of the most epic battles in world history reveals how cosmopolitan Muslim al Andalus flourished a beacon of cooperation and tolerance while proto Europe floundered in opposition to Islam making virtues out of hereditary aristocracy religious intolerance perpetual war and slavery This masterful history begins with the fall of the Persian and Roman empires followed by the rise of the prophet Muhammad and five centuries of engagement between the Muslim imperium and an emerging Europe Essential and urgent God s Crucible underscores the importance of these early world altering events whose influence remains as current as today s headlines

methodologies at play in the field today and the directions that beckon tomorrow **Europe and Globalization** H. Kierzkowski, 2002-06-14 Globalization has provoked passionate debate and street demonstrations reminiscent of May 1968 The central question of Europe and Globalization is what did Europe do for globalization in the past and what is globalization doing for Europe today The contributors to the volume assess this complex process and Europe's role within it Bringing together a team of leading international scholars from different disciplinary backgrounds this is a valuable and wide ranging contribution to the debate , Byzantine Trade, 4th-12th Centuries Marlia Mundell Mango, 2016-12-05 The 28 papers examine questions relating to the extent and nature of Byzantine trade from Late Antiquity into the Middle Ages The Byzantine state was the only political entity of the Mediterranean to survive Antiquity and thus offers a theoretical standard against which to measure diachronic and regional changes in trading practices within the area and beyond To complement previous extensive work on late antique long distance trade within the Mediterranean based on the grain supply amphorae and fine ware circulation the papers concentrate on local and international trade The emphasis is on recently uncovered or studied archaeological evidence relating to key topics These include local retail organisation within the city some regional markets within the empire the production and or circulation patterns of particular goods metalware ivory and bone glass pottery and objects of international trade both exports such as wine and glass imports such as materia medica and the lack of importation of for example Sasanian pottery In particular new work relating to specific regions of Byzantium's international trade is highlighted in Britain the Levant the Red Sea the Black Sea and China Papers of the 38th Spring Symposium of Byzantine Studies held in 2004 at Oxford under the auspices of the Committee for Byzantine Studies **The Charisma of Distant Places** Courtney Luckhardt, 2019-07-15 This cultural history of early medieval travel and religion reveals how movement affected society demonstrating the connectedness of people and regions between 500 and 850 CE In *The Charisma of Distant Places* Courtney Luckhardt enriches our understanding of migration through her examination of religious movement Vertical links to God and horizontal links to distant regions identified religious travelers both men and women as holy connected to the human and the divine across physical and spiritual distances Using textual sources material culture and place studies this project is among the first to contextualize the geographic and temporal movement of early medieval people to reveal the diversity of religious travel from the voluntary journeys of pilgrims to the forced travel of Christian slaves Luckhardt offers new ways of understanding ideas about power holiness identity and mobility during the transformation of the Roman world in the global Middle Ages By focusing on the religious dimensions of early medieval people and the regions they visited this book addresses probing questions including how and why medieval people communicated and connected with one another across boundaries both geographical and imaginative **The Making of Europe** Christopher Dawson, 2002 Christopher Dawson concludes that the period of the fourth to the eleventh centuries commonly known as the Dark Ages is not a barren prelude to the creative energy of the medieval world Instead he argues

that it is better described as ages of dawn for it is in this rich and confused period that the complex and creative interaction of the Roman empire the Christian Church the classical tradition and barbarous societies provided the foundation for a vital unified European culture In an age of fragmentation and the emergence of new nationalist forces Dawson argued that if our civilization is to survive it is essential that it should develop a common European consciousness and sense of historic and organic unity But he was clear that this unity required sources deeper and more complex than the political and economic movements on which so many had come to depend and he insisted prophetically that Europe would need to recover its Christian roots if it was to survive In a time of cultural and political ambiguity The making of Europe is an indispensable work for understanding not only the rich sources but also the contemporary implications of the very idea of Europe [A History of the Middle Ages, 300-1500](#) John M. Riddle, 2016-02-25 This clear and comprehensive text covers the Middle Ages from the classical era to the late medieval period Distinguished historian John Riddle provides a cogent analysis of the rulers wars and events both natural and human that defined the medieval era Taking a broad geographical perspective Riddle includes northern and eastern Europe Byzantine civilization and the Islamic states Each he convincingly shows offered values and institutions religious devotion toleration and intolerance laws ways of thinking and changing roles of women that presaged modernity In addition to traditional topics of pen sword and word the author explores other driving forces such as science religion and technology in ways that previous textbooks have not He also examines such often overlooked issues as medieval gender roles and medicine and seminal events such as the crusades from the vantage point of both Muslims and eastern and western Christians In addition to a thorough chronological narrative the text offers humanizing features to engage students Each chapter opens with a theme setting vignette about the lives of ordinary and extraordinary people The book also introduces students to key controversies and themes in historiography by featuring in each chapter a prominent medieval historian and how his or her ideas have shaped contemporary thinking about the Middle Ages Richly illustrated with color plates this lively engaging book will immerse readers in the medieval world an era that shaped the foundation for the modern world **The Oxford Encyclopedia of Economic History** Joel Mokyr, 2003 What were the economic roots of modern industrialism Were labor unions ever effective in raising workers living standards Did high levels of taxation in the past normally lead to economic decline These and similar questions profoundly inform a wide range of intertwined social issues whose complexity scope and depth become fully evident in the Encyclopedia Due to the interdisciplinary nature of the field the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history demographic history business history and the histories of technology migration and transportation The articles all written and signed by international contributors include scholars from Europe Latin America Africa and Asia Covering economic history in all areas of the world and segments of economies from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique
