interdisciplinary examination and appreciation of Aldous Huxley's three visionary novels *Brave New World* 1932 *Ape and Essence* 1948 and *Island* 1962 to reveal the extent to which Huxley's prognoses into our possible futures was prophetic. The author assesses each novel to reveal the foresights that define our current educational, social, religious, political, and economic institutions while also exposing our conflicts within those institutions. This volume examines the educational, cultural, and technological changes that have shaped our society since Huxley's work with special reference to the enduring legacy of educational philosopher John Dewey. It offers profound insights into the educational forces and moral foundations of our society that shape us both inside and outside of our schools. It is the first of its kind to focus exclusively on all three of Huxley's visionary novels and detail their relevance to our world today.

Foundational Concepts in Neuroscience: A

Brain-Mind Odyssey (Norton Series on Interpersonal Neurobiology) David E. Presti, 2015-12-14. Key concepts in neuroscience presented for the non-medical reader. A fresh take on contemporary brain science. This book presents neuroscience, the scientific study of brain, mind, and behavior, in easy-to-understand ways with a focus on concepts of interest to all science readers. Rigorous and detailed enough to use as a textbook in a university or community college class, it is at the same time meant for any and all readers: clinicians and non-clinicians alike interested in learning about the foundations of contemporary brain science. From molecules and cells to mind and consciousness, the known and the mysterious are presented in the context of the history of modern biology and with an eye toward better appreciating the beauty and growing public presence of brain science.

Brainwashing David Seed, 2004. An examination of the literary and cinematic representations of brainwashing during the Cold War era. CIA operative who was a tireless campaigner against communism, it took hold quickly and became a means to articulate fears of totalitarian tendencies in American life. David Seed traces the assimilation of the notion of brainwashing into science fiction, political commentary, and conspiracy narratives of the Cold War era. He demonstrates how these works grew out of a context of political and social events and how they express the anxieties of the time. *The Manchurian Candidate*. Seed provides new interpretations of writers such as Orwell and Burroughs within the history of psychological manipulation for political purposes, using declassified and other documents to contextualise the material. He explores the shifting view points of how brainwashing is represented, changing from an external threat to American values to an internal threat against individual American liberties by the U.S. government. Will welcome this study.

American Trip Ido Hartogsohn, 2020-07-14. How historical, social, and cultural forces shaped the psychedelic experience in midcentury America, from CIA LSD experiments to the Harvard Psilocybin Project. Are psychedelics invaluable therapeutic medicines or dangerously unpredictable drugs that precipitate psychosis? Tools for spiritual communion or cognitive enhancers that spark innovation? Activators for one's private muse or part of a political movement? In the 1950s and 1960s, researchers studied psychedelics in all these incarnations, often arriving at contradictory results. In *American Trip*, Ido Hartogsohn examines how the psychedelic experience in midcentury America was shaped by historical, social, and cultural

forces by set the mindset of the user and setting the environments in which the experience takes place He explores uses of psychedelics that range from CIA and military experimentation to psychedelic inspired styles in music fashion design architecture and film Along the way he introduces us to a memorable cast of characters including Betty Eisner a psychologist who drew on her own experience to argue for the therapeutic potential of LSD and Timothy Leary who founded the Harvard Psilocybin Project and went on to become psychedelics most famous advocate Hartogsohn chronicles these developments in the context of the era s cultural trends including the cold war the counterculture the anti psychiatric movement and the rise of cybernetics Drawing on insights from the study of science technology and society he develops the idea of LSD as a suggestible technology the properties of which are shaped by suggestion He proposes the concept of collective set and setting arguing that the historical and sociocultural context of midcentury America offered a particular set and setting creating the conditions for what he calls the American trip

Aldous Huxley and Self-Realization Dana Sawyer, Julian Piras, Uwe Rasch, 2019 Throughout his writing career and especially in the last thirty years of his life Aldous Huxley exhibited a deep interest in human potentialities which he often described as our greatest unused natural resource The present volume is the first book to focus on this Huxleyan core concern It is based on presentations given at the Sixth International Aldous Huxley Symposium held in 2017 at the University of Almer a Spain This volume collects essays by eleven scholars from eight countries that discuss Huxley s concept of human potentialities from an interdisciplinary perspective This is another innovative feature of this book since today Huxley is mainly remembered as a novelist although only eleven of his fifty published works belong to that genre The topics of this volume span Huxley s mature philosophy including his theories relating to the expansion of consciousness the development of nonverbal humanities the need to improve bio ethics the role of nature the role of beliefs and prejudice and other subjects These essays review Huxley s various positions shedding light on their possible significance for today Huxley marshalled his remarkable intellect to the project of improving the human condition and here we find an up to date report card of his theories and their efficacy

Aldous Huxley Between East and West, 2021-11-01 Although the title of this volume is Aldous Huxley between East and West the order of the articles found within goes from West to East which naturally imitates Huxley's own progress especially since he went to the trouble of stepping out as far West as possible before starting for the East Indeed one could argue that he was already on his way there before he left for California a continuous journey perhaps since from the Californian shores of the Pacific the East is the further West After the Introduction which places Huxley between East and West the book starts with a consideration of Huxley's family connections then goes onto his earliest fictions his interest in science and the issue of modernity and his experiments with drama and their inherent philosophical concerns The poetry with which he began his writing career is then viewed as a link between his earlier Western self and his later Oriental interests suggesting that the latter was always inherent in the former A number of considerations of the Utopian themes in Huxley's middle and later fiction leads the volume to a climax with four articles surveying the foibles and the wisdom of Huxley's encounter with Eastern religious thought and philosophy his misunderstandings as well as ours of what actually he had learned and wished to pass on to the Western world

Neuropsychedelica Nicolas Langlitz, 2013 *Neuropsychedelica* examines the revival of psychedelic science since the Decade of the Brain After the breakdown of this previously prospering area of psychopharmacology and in the wake of clashes between counterculture and establishment in the late 1960s a new generation of hallucinogen researchers used the hype around the neurosciences in the 1990s to bring psychedelics back into the mainstream of science and society This book is based on anthropological fieldwork and philosophical reflections on life and work in two laboratories that have played key roles in this development a human lab in Switzerland and an animal lab in California It sheds light on the central transnational axis of the resurgence connecting American psychedelic culture with the home country of LSD In the borderland of science and religion *Neuropsychedelica* explores the tensions between the use of hallucinogens to model psychoses and to evoke spiritual experiences in laboratory settings Its protagonists including the anthropologist himself struggle to find a place for the mystical under conditions of late modern materialism

Huxley Annual Bernfried Nugel, 2012-11-28 Aldous Huxley Annual is the official publication of the Aldous Huxley Society at the Center for Aldous Huxley Studies in Münster Germany. The Society publishes essays on the life times and interests of Aldous Huxley and his circle. It aspires to be the sort of periodical that Huxley would have wanted to read and to which he might have contributed. Aldous Huxley Annual celebrates its 10th anniversary with a special double numbered issue. The chief contributor on this momentous occasion is Aldous Huxley himself. Volume 10/11 contains a treasure trove of new Huxley items such as letters, poems, stories, talks, proposals, introductions, and playlets, all arranged in chronological order. The contributions date from 1916 and run through 1963, the year of Huxley's death. Moreover, for the first time, Huxley is presented as an accomplished painter; the book's editors are proud to have procured reproductions of five Huxley paintings owned by his grandchildren, Teresa and Mark Trevenen Huxley. The concluding section of the book consists of several articles on particular aspects of Huxley's work. Series: Aldous Huxley Annual Vol. 10.
