horticulture crops Therefore if any segment of DNA from any organism is inserted into a DNA segment containing the molecular sequences required for DNA replication and the resulting recombinant DNA is introduced into the organism from which the replication sequences were obtained then the foreign DNA will be replicated along with the host cell's DNA in the transgenic organism The book has been designed for students research scholars and teachers involved in the field Lab II - Microbial Genetics, Molecular Biology & rDNA Technology Mr. Rohit Manglik, 2024-10-24 Hands on lab in microbial genetics molecular biology and rDNA technology with applications in food and dairy microbiology
