Evidence for Reductionist or Anti-Reductionist Approaches of Mental Processing Francesca Strappini, Mark Couch, Antonino Carcione, Marialuisa Martelli, 2024-02-16 As scientists or clinicians we all have an implicit theory about how the mind relates to the nervous system which infuses our research and practice This theory entails what has been traditionally known as the mind body problem Intrinsically connected to the question of potentials and constraints of human and conscious artificial life it still represents an open and highly debated philosophical and empirical question The common assumption for many cognitive neuropsychologists and neuropsychiatrists is that by looking at the anatomical brain function
