Repertoires and Cycles of Collective Action Mark Traugott, 1995 The modern era has generated a bewildering profusion of popular protest including widespread social movements and sporadic revolutionary upheaval Despite the seemingly chaotic character of such collective action social scientists have increasingly noted the remarkable regularities exhibited by even the most tumultuous social change In this volume sociologists political scientists and historians come together to assess the complementary concepts of repertoires and cycles as tools for illuminating the consistent patterns that emerge from the apparent chaos The significance of repertoires recurrent forms or tactics of social protest is explored in an essay on eighteenth and nineteenth century Britain by the originator of the concept Charles Tilly Sidney Tarrow whose work has most directly linked the concept of repertoires with that of cycles the recurrent peaks and troughs in the historical incidence of collective action contributes an essay that focuses on twentieth century Italy Other essays investigate the rhythms and logic of social change in contexts as diverse as sixteenth through nineteenth century Japan nineteenth century Europe and twentieth century America Through inquiries into the consequences of violent repression for social mobilization the struggle to control the linguistic terms of social conflict the unacknowledged antecedents of contemporary movements and the importance of movement families this volume demonstrates the usefulness of these two concepts and defines the relationship between them Collected from past issues of *Social Science History* with a new introduction and two new essays *Repertoires and Cycles of Collective Action* will reward an interdisciplinary audience of readers with the extraordinary vitality that emerges from this rich blend of historical perspectives Contributors Charles Brockett Craig Calhoun Doug McAdam Marc Steinberg Sidney Tarrow Charles Tilly Mark Traugott James White

Redescriptions Pasi Ihalainen, 2006 The 2006 volume of *Redescriptions* has two main themes the political principles and practices of democratic political representation and the temporal dimension of politics discussed in six articles and two review articles Different principles and organizational arrangements play a key role in theories of political representation in the democratization of suffrage and in the present debates on the modes of equal representation of women The articles discussing the proper time for politics also refer to issues closely connected to debates on democracy and representation today

primary texts giving them a point of reference when they find themselves stuck Discusses each concept in an introductory way Offers further reading guidance for independent learning This is an essential companion for reading for students across the social sciences who are exploring critical theory for the first time Sound and Sense in Contemporary Theatre

Matthew Tomkinson,2025-01-11 This book is among the first to consider the subject of mad auralities in theatre and performance asking what does it mean to hear and listen madly Drawing widely upon mad studies critical disability studies theatre studies sound studies queer studies and critical race theory it seeks to explore the theatrical relationship between sound and mental health differences by examining a range of case studies in which audience members are immersed in auditory simulations of madness Ultimately however this critical study investigates the shortcomings of simulation as a representational practice in keeping with the critical tradition of disability studies and mad studies **Experiencing**

Psychosis Jim Geekie,Patte Randal,Debra Lampshire,John Read,2013-03 Extensive scientific research has been conducted into understanding and learning more about psychotic experiences However in existing research the voice of subjective experience is rarely taken into consideration In this book first person accounts are brought centre stage and examined alongside current research to suggest how personal experience can contribute to professional understanding and therefore the treatment of psychosis Experiencing Psychosis brings together a range of contributors who have either experienced psychosis on a personal level or conducted research into the topic Chapters are presented in pairs providing information from both personal and research perspectives on specific aspects of psychosis including hearing voices delusional beliefs and trauma as well as cultural existential and spiritual issues Experts from the field recognise that first and foremost psychosis is a human experience and that those who suffer from psychotic episodes must have some involvement in any genuine attempts to make sense of the experience This book will be essential reading for all mental health professionals involved with psychosis The accessible style and compelling personal histories will also attract service users and their families **Old**

Cloud Ethics Louise Amoore, 2020-05-01 In *Cloud Ethics* Louise Amoore examines how machine learning algorithms are transforming the ethics and politics of contemporary society. Conceptualizing algorithms as ethicopolitical entities that are entangled with the data attributes of people, Amoore outlines how algorithms give incomplete accounts of themselves, learn through relationships with human practices, and exist in the world in ways that exceed their source code. In these ways, algorithms and their relations to people cannot be understood by simply examining their code, nor can ethics be encoded into algorithms. Instead, Amoore locates the ethical responsibility of algorithms in the conditions of partiality and opacity that haunt both human and algorithmic decisions. To this end, she proposes what she calls cloud ethics: an approach to holding algorithms accountable by engaging with the social and technical conditions under which they emerge and operate. **Two Sides of a Barricade** Christian Scholl, 2013-12-28 *Two Sides of a Barricade* argues that to construct global democracy, conflict and dissent must be taken seriously. Christian Scholl explores the political significance of the confrontations within four sites of interaction: bodies, space, communication, and law. Each site of struggle provides a different entry point to understand the influence of protester and police tactics on each other. At the same time, the four sites of struggle allow a comprehensive analysis of how the contestation of global hegemonic forces during summit protests triggers a preemptive shift in social control through increased deployment of biopolitical forms of power. His sudden and unexpected death sent me reeling down a path I needed to travel if I ever wanted to escape the forest of grief and loss in which I found myself. This book recounts my journey to come to terms with the death of my son. The path I started down to fulfill a promise I had made to my son while he was alive—to find answers to the mental problems he suffered—took me places I had not anticipated. The path became a network of four intersecting paths, and my journey took me far beyond the death of a son to the human condition where we are governed by forces both internal and external over which we have little control and little understanding. Intricately connected, the four paths explored in this book are: 1) the autobiographical story of my life with my son Mitchell as we struggled with the mental problems that eventually led to his suicide; 2) the diagnostic: the various diagnostic tools available to psychiatrists which illustrate the level of knowledge in the field and show some of the failings of our present approach to mental disorders; 3) historical fiction narrative accounts of the lives and deaths by suicide of both historical and fictional characters, including the son of Queen Isabella of Spain, Meriwether Lewis, Vincent Van Gogh, Miguel, a slave working at the Count of Valencianas silver mine, La Boca del

Infierno in 18th century Mexico and Michele a passenger on the Titanic By telling these stories sometimes in the first person I found a way to express my own anguish and pain something I could not do directly as well as a way to explore further my relationship with my son and my sons complexity and fullness as a person 4 scientific explanation of how the brain works a theory of how the brain works explaining in detail how mental images and thoughts are formed and travel through the nervous system how we live in a world of illusions and how mental illness can be explained in these terms These four paths are intricately connected and reinforce each other in the book The diagnostic explains in technical terms what the autobiographical recounts the autobiographical recounts events which help to explain the complexities and subtleties of human behavior within the context of how the brain works the historical fiction ties into the autobiographical elements and the diagnostic The book also confronts the issue of suicide itself It answers that elusive question Why do people commit suicide The book presents a personal honest biographical testimonial of the experience of the suicide of a son The book speaks from experience not some abstract philosophical point of view The organization and contents of the book are unique a weaving together of four distinct yet related subjects the suicide of a son the classification of mental illnesses narratives of historical fiction and a theory of how the brain works The most outstanding feature of this book is that it presents for the first time to my knowledge a comprehensive theory of the brain that explains mental disorders such as dementia delirium depression manic depression and schizophrenia For the first time suicide is placed in a scientific context and why and how it happens is explained In particular the brain theory here is presented in a simplified form accessible to most particularly because of the anecdotes and stories that help illustrate how the brain functions and malfunctions The book also deals with other related subjects the importance of love in our lives the possibilities of past lives how to deal with grief and loss the possible reasons for the rise of suicide rates in industrialized nations the failures of the system to cure and prevent suicide and other mental disorders and possible directions that therapies and medications might explore in the future The writing is forceful

Triumph of the Wizard King: The Wizard King Trilogy Book Three Chad Corrie, 2021-10-05 The first battle has been fought but the war has just begun As Cadrith savors his success the mercenaries deal with the aftermath of their last confrontation The thread that s bound them to this point is hard to break and is pulling them into yet another conflict where even the gods are bracing their gates The battle lines have been drawn The pieces are in place The conflict to come will be waged on many fronts and through many faces but victory is far from assured Warring gods secret plots ancient feuds and cosmic adventure fill this final volume of the Wizard King Trilogy returning readers to a world rich in history faith and tales of adventure of which this story is but one of many Corrie has created a world of warring gods and goddesses peopled it with humans dwarves elves and other races and infused it with life and color This saga of faith triumphant belongs in larger fantasy collections Library Journal Corrie manages to stick the landing and deliver an ending to his trilogy that is both epic and emotional Geek d Out
