Advances in Chance Discovery Yukio Ohsawa, Akinori Abe, 2012-08-01. Since year 2000, scientists on artificial and natural intelligences started to study chance discovery methods for discovering events/situations that significantly affect decision making. Partially because the editors Ohsawa and Abe are teaching at schools of Engineering and of Literature with sharing the interest in chance discovery, this book reflects interdisciplinary aspects of progress. First, as an interdisciplinary melting pot of cognitive science, computational intelligence, data mining, visualization, collective intelligence, etc., chance discovery came to reach new application domains, e.g., health care, aircraft control, energy plant management, technologies, product designs, innovations, marketing, finance, etc. Second, basic technologies and sciences including sensor technologies, medical sciences, communication technologies, etc., joined this field and interacted with cognitive/computational scientists in workshops on chance discovery to obtain breakthroughs by stimulating each other. Third, time came to be introduced explicitly as a significant variable ruling causalities, background situations causing chances, and chances causing impacts on events and actions of humans in the future. Readers may urge us to list the fourth, fifth, sixth, but let us stop here and open this book. *Investment Analysis and Management* John Walter Bowyer, 1972. *2020 International Conference on Applications and Techniques in Cyber Intelligence* Jemal H. Abawajy, Kim-Kwang Raymond Choo, Zheng Xu, Mohammed

Atiquzzaman, 2020-08-12. This book presents innovative ideas, cutting edge findings, and novel techniques, methods, and applications in a broad range of cybersecurity and cyberthreat intelligence areas. As our society becomes smarter, there is a corresponding need to secure our cyberfuture. The book describes approaches and findings that are of interest to business professionals and governments seeking to secure our data and underpin infrastructures, as well as to individual users.

Transactions on Rough Sets XVII James F. Peters, Andrzej Skowron, 2014-03-03. The LNCS journal *Transactions on Rough Sets* is devoted to the entire spectrum of rough sets related issues from logical and mathematical foundations through all aspects of rough set theory and its applications such as data mining, knowledge discovery, and intelligent information processing to relations between rough sets and other approaches to uncertainty, vagueness, and incompleteness such as fuzzy sets and theory of evidence. Volume XVII is a continuation of a number of research streams which have grown out of the seminal work by Zdzislaw Pawlak during the first decade of the 21st century. The research streams represented in the papers cover both theory and applications of rough, fuzzy, and near sets, as well as their combinations. **Macroeconomic Risk and**
